Subject: Update to the North Platte River Stipulation Relating to the Allocation of Water During Periods of Shortage

Dear North Platte Project Contractor:

In accordance with the provisions of the "Stipulation among the State of Wyoming, the State of Nebraska, and the United States relating to the Allocation of Water during Periods of Shortage" dated December 17, 1998, (Appendix E to the Final Settlement Stipulation), during the first week of June, the Bureau of Reclamation shall determine the amount of water stored and the forecasted inflow through July, based on snowmelt runoff forecasts, and contrast the forecasted supply against the approximate irrigation demand of 1,100,000 acre-feet, to further assess the need to allocate storage during the subsequent irrigation season.

Based on our June expected forecasted inflow and using the methodology set forth in the Stipulation, we are advising you that an allocation is not expected.

Enclosed for your use and information is the worksheet displaying the June forecasted supply used in making our determination.

If you have any questions, please contact me at 307-261-5671.

Sincerely,

Carlie A. Ronca
Area Manager
