

# Geographic Area Determined to Have Surface Water Hydrologically Connected to Ground Water for the Purpose of Overappropriated Designation

Determination made by the Department of Natural Resources on September 15, 2004

This map represents the geographic area within which it has been determined that surface water is hydrologically connected to ground water for the purpose of designating the surface water resources within the Platte River Basin above the Kearney Canal Diversion, the North Platte River Basin including Pumpkinseed Creek and the South Platte River Basin including Lodgepole Creek as overappropriated. Additional information regarding the designation can be found in the Order issued by the Department of Natural Resources on September 15, 2004.
