NeDNR Floodplain Management

Erin Wendt, CFM

Outreach Coordinator

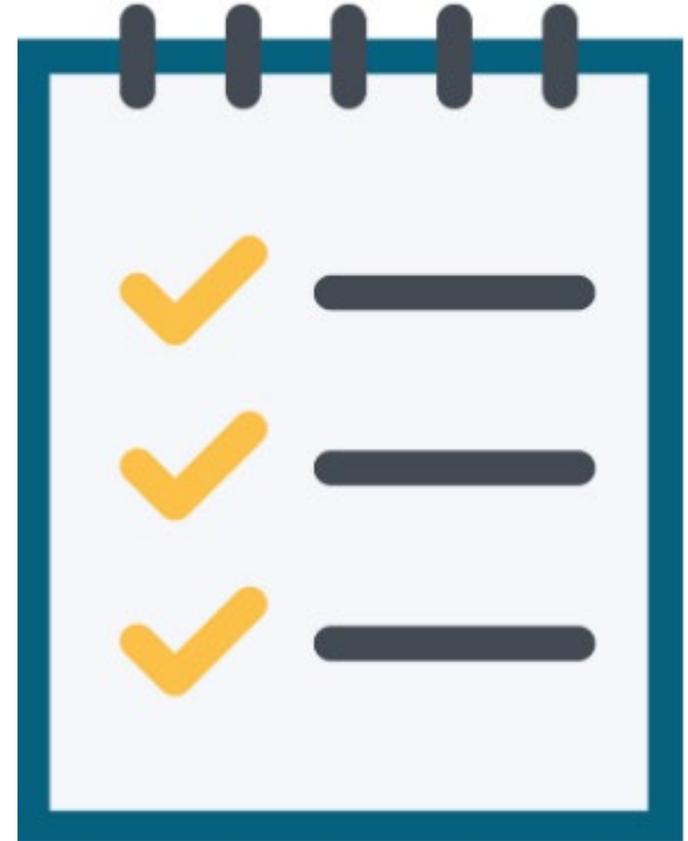

NeDNR Floodplain Management

NEBRASKA

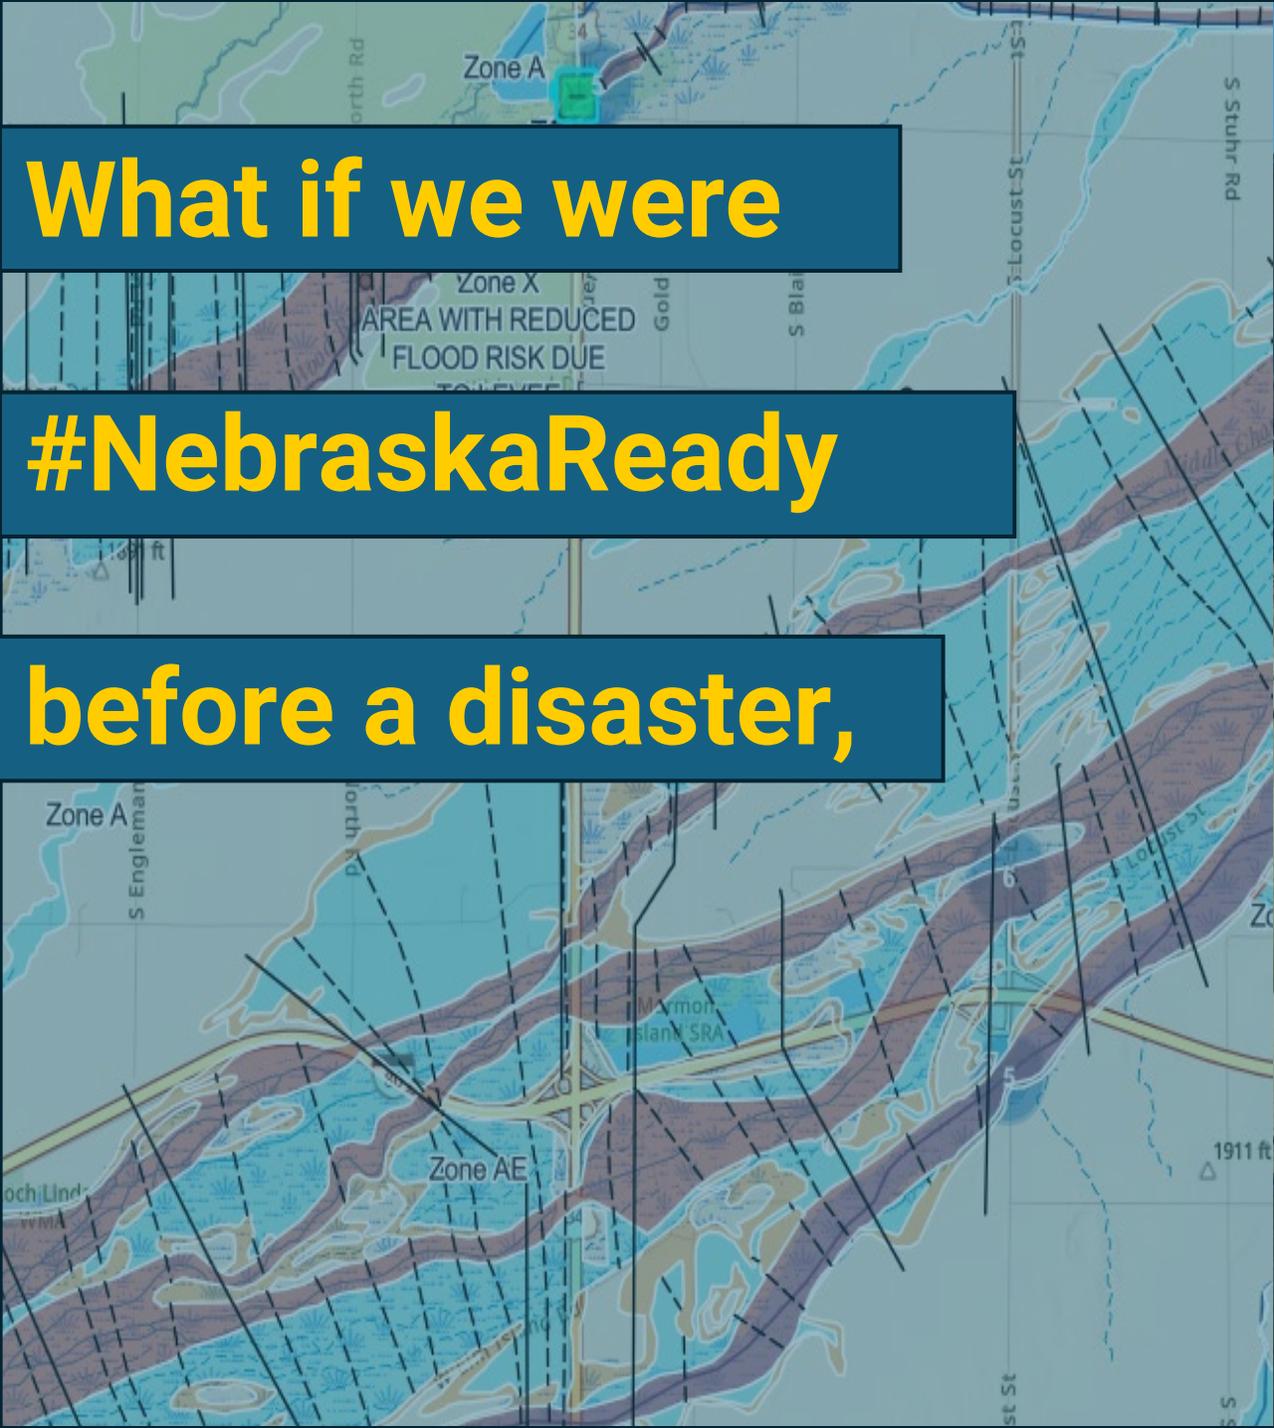

Good Life. Great Water.

Agenda

- 01** Introduction to Preparedness
- 02** Preparedness Tips
- 03** How to Prepare Your Community for a Flood
- 04** Resources & Strategies
- 05** Key Takeaways

Introduction to Preparedness

What if we were

#NebraskaReady

before a disaster,

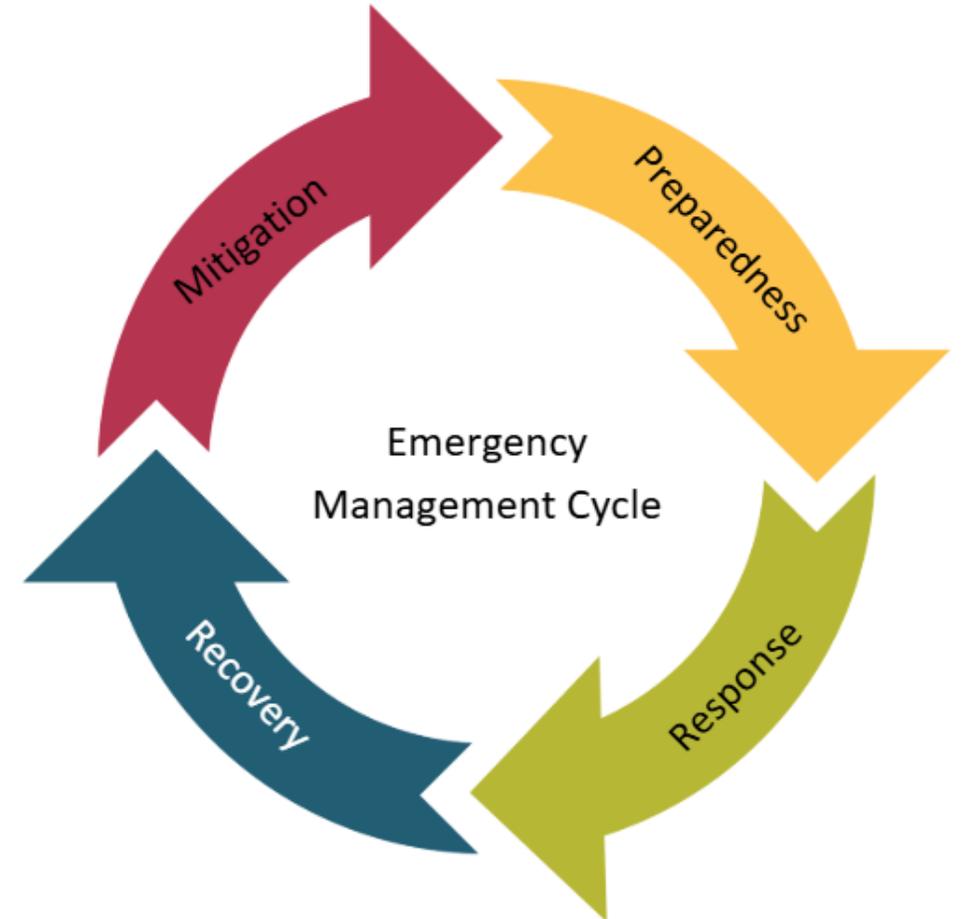

not just

#NebraskaStrong

afterward?

Preparedness

- One piece of the Emergency Management Cycle
- Preparedness and planning is continual

Preparedness

- FEMA defines preparedness as: “actions taken to plan, organize, equip, train, and exercise to build and sustain the capabilities necessary to:
 - Prevent,
 - Protect against,
 - Mitigate the effects of,
 - Respond to, and
 - Recover from those threats that pose the greatest risk.”

Why Preparedness is Important

- Save lives
- Improve response and recovery efficiency
 - Permitting repairs
 - Substantial damage assessments
- Property owners are aware of potential impacts and understand required steps during the recovery process.
- Reduces fear and anxiety around emergencies and disasters

An aerial photograph of a residential neighborhood, showing houses, streets, and a large industrial building on the right. The entire image is overlaid with a semi-transparent blue filter. The text "Preparedness Tips" is centered in white, bold font.

Preparedness Tips

NEBRASKA
Good Life. Great Water.

Know Your Hazards

NATURAL HAZARDS

HUMAN HAZARDS

TECHNOLOGICAL
HAZARDS

Know Your Flood Hazards

- What are your flood sources
- What areas are commonly affected by flooding
- How many and what type structures are in your flood risk area
- Who makes up the affected population
- Historic flood data

Personal Preparedness

- Create a plan
 - Meeting location
 - Uncompromised evacuation routes
 - Shelter location
 - How to receive emergency alerts and warnings
- Consider household specific needs
 - Non-native English speakers
 - Pets or service animals
 - School-aged children
 - Disabilities

Personal Preparedness

- Create an Emergency Kit
 - Flashlights
 - Canned food/non-perishables
 - Manual can opener
 - Bottled water
 - Battery operated radio
 - Extra batteries
 - Walkie-Talkies
 - Fully charged portable chargers
 - Medications
 - Important documents
 - Birth certificates, social security cards, titles/deeds to homes/cars, etc.

NEBRASKA
EMERGENCY MANAGEMENT AGENCY

Family Disaster Preparedness Kit

Get a kit. Make a plan. Be informed.

Nebraska Emergency Management Agency and local emergency managers across the state want all Nebraskans to be as prepared as possible for potential disasters. When disaster strikes, you may not have much time to act, so NOW is the time to prepare for an emergency. Knowing what type of emergency or disaster is most likely to occur in your community and having a family plan are important first steps to being prepared. Discuss and practice your plan to make sure all family members know what to do in the event of an emergency. Contact your local emergency management agency if you need information on which types of disasters are most likely to occur in your area or if you need ideas on how to prepare. Nebraska's local emergency managers are listed at <https://nema.nebraska.gov/overview/county-emergency-management-director-coordinators>. For more information visit www.nema.nebraska.gov or bereadynebraska.gov.

FOOD/WATER

- 3-day supply (or more) of non-perishable food. Rotate food every six months.
- Water (one gallon per person per day). Store in sealed, unbreakable containers. Identify the storage date and replace every six months.
- Canned juices
- High energy foods, i.e. peanut butter, nuts, granola, crackers, dried fruit
- Canned meats, tuna, fruits, and vegetables
- Fruit: canned, dried, roll-ups)
- Meats: canned or dried
- Vegetables: canned
- Powdered milk
- Soap: canned
- High-energy bars
- Paper plates, plastic cups, utensils, paper towels
- Non-electric can opener.

BABY

- Baby food/ Formula
- Blanket
- Bottles
- Diapers/wipes
- Hat
- Extra clothes
- Milk, food, formula

Clothes

- Disposable bottles and liners
- Blankets, sheets, bed liners
- Medications
- Portable crib
- Toys
- Jacket/sweater
- Pacifier
- Powdered milk
- Socks/bootsies
- Sunscreen
- Toys

FIRST AID KIT

- First aid instruction booklet
- 2 absorbent compress dressings (5 x 9 inches)
- 25 adhesive bandages (assorted sizes)
- Adhesive cloth tape (10 yards x 1 inch)
- 5 antibiotic ointment packets
- 5 antiseptic wipe packets
- 2 packets of aspirin (81 mg each)
- 1 blanket (space blanket)
- 1 breathing barrier (with one-way valve)
- 1 instant cold compress
- 2 pair of nonlatex gloves
- 2 hydrocortisone ointment packets
- Scissors
- 1 roller bandage (3 inches wide)

1 roller bandage (4 inches wide)

- 5 sterile gauze pads (3x3 inches)
- 5 sterile gauze pads (4x4 inches)
- Oral thermometer (non-mercury/nonglass)
- Tweezers
- First aid instruction booklet
- Prescription medications

PERSONAL SUPPLIES

- Blankets/sleeping bags
- Contact lenses/supplies
- Deodorant
- Extra change of clothing
- Extra eye glasses
- Extra underwear/socks
- Feminine supplies
- Hat
- Insect repellent
- Jacket (waterproof)
- Pillows
- Shampoo/conditioner
- Soap, toothbrush, deodorant
- Sunscreen
- Work boots/sturdy shoes
- Sunglasses
- Toothbrush, toothpaste, dental floss, mouthwash
- Umbrellas

PET SUPPLIES

- Pet food and extra water for pets

Whistle (on a lanyard for each person) to signal for help
Cell phone with charger, extra battery and solar charger

ITATION

Batteries
Disinfectant
Facemask to prevent disease spread
Dust masks or cotton T-shirt to filter the air
Household chlorine bleach and medicine dropper. (When diluted nine parts water to one part bleach, bleach can be used as a disinfectant. Bleach can be used to treat water. Use 16 drops of only regular household liquid bleach per gallon of water.)
Plastic garbage bags, twist ties
Rubber gloves
Soap, liquid detergent
Toilet paper, towelettes

EMERGENCY CAR KIT

Battery powered radio, flashlight and extra batteries
Blanket
Booster cables
Fire extinguisher (5 lb., A-B-C type)
First aid kit and manual
Bottled water and non-perishable high energy food such as granola bars, raisins and peanut butter
Maps, oil, flares
Tire repair kit and pump

DOCUMENTS
(Keep in a waterproof container)

- Contact list: include police, fire, poison control, family doctor, hospital, local Red Cross, emergency services, emergency family contact, insurance agent, utility company, employers, daycare, school, church, bank
- Written instructions on how to turn off electricity, gas and water in case authorities advise you to do so.
- Home inventory list with photos and videos

WINTER ITEMS

- Blankets
- Hat
- Mittens/gloves
- Jacket
- Long pants
- Long sleeved shirts
- Long underwear
- Rock salt
- Sleeping bags
- Snow shovel
- Sweater
- Tin can or pot (for heating and melting snow)
- Towels
- Water-resistant snow boots
- Wool socks

Plastic bags and keep these items in large easy-to carry, water- or plastic tub
Name and address
Warning or evacuation order is issued

- Each month, check for items that you might need to add or replace. Re-think your items and family needs, especially if new medications are needed or if children have grown
- Store the kit in a safe place near a main exit. Tell family members where the kit is located.
- Store at least a three-day supply of water (one gallon of water per person per day). **Rotate your water every six months so it stays fresh.

Community Preparedness

- Conduct a Risk Assessment
 - Identify potential hazards
 - Learn where and how to improve
- Ensure resources are publicly available
 - Emergency services numbers
 - Emergency manager and personnel
 - Local regulations
 - Hazardous zones map
 - Special Flood Hazard Area (SFHA) / Floodplain Maps, etc.
 - Critical infrastructure locations

COUNTY EMERGENCY MANAGEMENT DIRECTORY

Filter Table

Search... Select Filter

[Export to Excel](#)

County And/Or Jurisdiction	Name/Position	Address	Phone	Email
ADAMS PET Region: South Central	Ron Pughes - Emergency Manager	2965 S. Baltimore Hastings, NE 68901	402-461- 2361	rpughes@acema.org
ANTELOPE, MADISON, PIERCE PET Region: Northeast	Bobbi Risor - Emergency Manager	701 Koenigstein Ave. Norfolk, NE 68701	402-844- 2050	brisor@norfolkne.gov
ARTHUR PET Region: North Central	Calvin Turner - Emergency Manager	205 Fir St. Arthur, NE 69121	308-785- 7911	sheriff@arthurcountyne.gov
BANNER, SCOTTS BLUFF EM Region: Region 22	Rob Crowder - Regional Coordinator	1825 10th St. Gering, NE 69341	308-436- 6689	rob.crowder@scottsbluffcountyne.gov

Community Preparedness

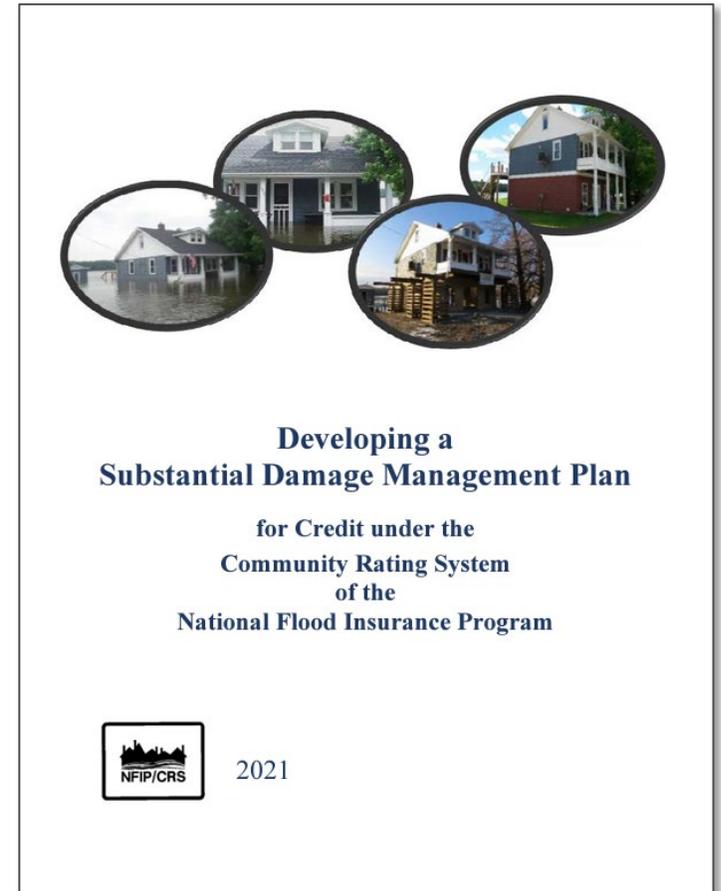

- Know your vulnerable populations
 - Those with mental and/or physical disabilities or limited mobility
 - Non-native English speakers
 - Low-income individuals/households
 - Single-parent households
 - Children
 - Elderly
 - Those without access or limited access to resources
 - Transportation, internet, cell phones, etc.

Community Preparedness

- Participate in local or multi-jurisdictional Hazard Mitigation Plans or Substantial Damage Plans
 - Identifies and prioritizes hazards likely to affect your community
 - Outlines plan and funding sources to prepare for and mitigate the hazard
- Resources:
 - [2021 State Hazard Mitigation Plan](#)
 - [2022 State Flood Hazard Mitigation Plan](#)

Creating a Substantial Damage Management Plan

- The Substantial Damage Management Plan allows communities to think about these actions before a disaster
- Can be updated as part of your community's Emergency Action Plan and/or Hazard Mitigation Planning
- Template is available from https://crsresources.org/files/500/developing_subst_damge_mgmt_plan.pdf
- Communities not in CRS don't need to follow each step exactly in order

Creating a Substantial Damage Management Plan

- The best way to fight misinformation during a disaster is to have a clear, transparent planning process before one occurs
- This plan allows you to:
 - Identify at-risk structures
 - Develop outreach strategies to the public
 - Garner support from community leadership
 - Have mitigation projects ready if/when your community receives disaster funding
 - Be prepared

Community Preparedness

- Emergency Shelters
 - Pre-arranged locations to house displaced individuals from hazard
 - Back-up generators for critical facilities
 - Fire stations
 - Police stations
 - Hospitals
 - Elderly care facilities
 - Mutual Aid Agreements & Compacts with neighboring communities
 - Work with your local or county Emergency Manager
- 

Community Preparedness

- Be aware of the Voluntary Organizations Active in Disaster (VOADs) and other non-profits and Non-governmental organizations (NGOs)
 - Approximately 1.5 million NGOs operate in the United States

Key Activities:

- Emergency Assistance
- Medial Aid
- Food/water distribution
- Shelter/infrastructure support
- Collaboration with local partners, governments etc.

How to Prepare your Community for a Flood

NEBRASKA

Good Life. Great Water.

Flood Preparedness

- Know which types of flooding are likely to affect your community
 - Flash floods
 - Riverine flooding
 - Ice jams
 - Dam/levee failures
 - Shallow sheet flooding
 - Ponding

Flood Preparedness

- Proper flood preparation starts with an ample floodplain management program
 - Mitigate the risk of flood damage before the flooding occurs
 - Elevate or floodproof structures
 - Discourage development in high-risk areas

Flood Preparedness

- Encourage the purchase and maintenance of flood insurance, even for those not in the SFHA or those without a mortgage/loan.

Flood Preparedness

- Ensure your community members are aware of permitting requirements in the SFHA

Floodplain Development Permit Application

Place
Jurisdiction
Seal

FOR OFFICIAL USE ONLY

Jurisdiction: _____

Permit No.: _____ **Date Filed:** _____

Fee: _____ **Receipt No.:** _____

Approved? Y N **Date Decided:** _____

Notes: _____

PROJECT INFORMATION

Project Type: Residential Commercial / Non-Residential Fences / Walls
Check all that apply New Construction - Detached New Construction - Attached Remodel / Rehab
 Grading / Fill / Excavation Mobile Home
 Other: _____

Description of proposed Work:

Cost of Improvements for this project: _____ (a)
Attach an Itemized cost estimate; See FEMA's "Included and Excluded Costs for Damage Repair Estimates".

Appraised Valuation of the Structure: _____ (b)
Attach assessment documents.

Calculate the following: (a) ÷ (b) x 100 = (c) _____ (c) %

Is the project a substantial improvement? Y N
If (c) value is greater than or equal to 50%, then the project constitutes substantial improvement.

FLOODPLAIN INFORMATION

FEMA Flood Zone: A AE X (shaded) Other

Base Flood Elevation: _____ NGVD(29) / NAVD(88)

Required Flood Protection Elevation: _____ NGVD(29) / NAVD(88)

Is the property within the Floodway? Y* N *If any work is proposed within the Floodway, a no-rise certification must be attached.

Appendices | 95

Flood Preparedness

- Know which structures are subject to Substantial Damage
 - Create a database in the FEMA SDE 3.0 Tool
 - Create a team to conduct inspections
 - Practice doing assessments
 - Attend NeDNR trainings

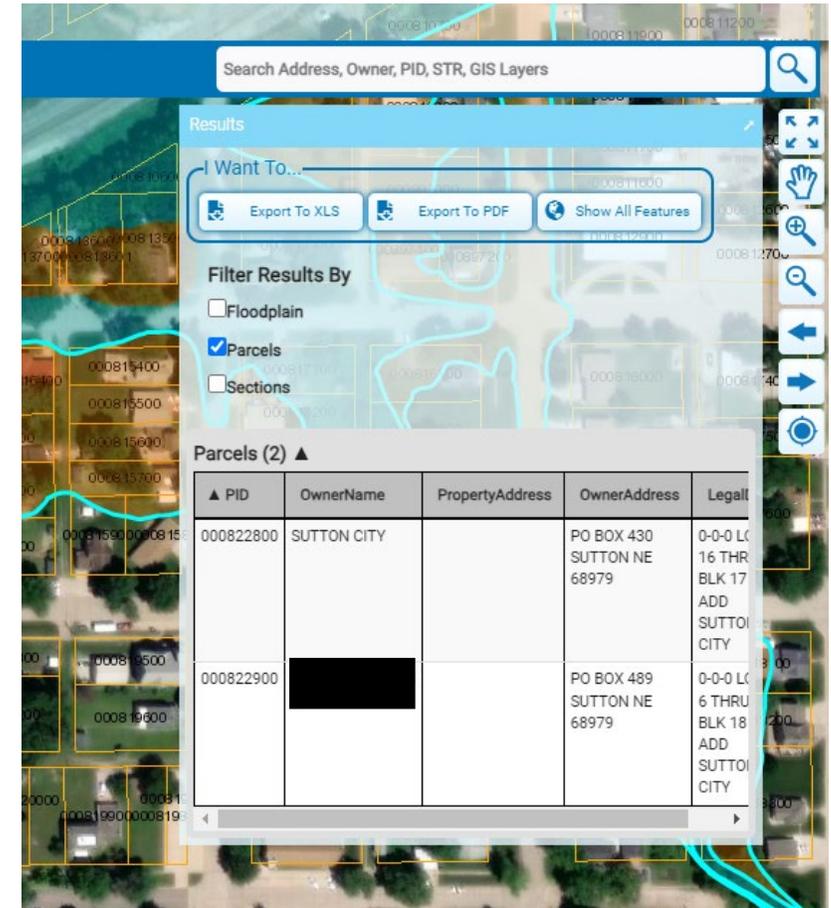

Identifying Floodplain Structures

- Before a disaster, take time to identify existing structures in the floodplain
- Create an inventory or database of structures in the floodplain
- Use this list to determine:
 - How long the SD process may take
 - How many staff or volunteers are needed
 - What compliance actions would need to take place if the structure is SD?

Identifying Floodplain Structures

- We recommend using your county assessor's G-works (or similar) website
 - Users can pull a list of properties into an excel sheet
 - Assessor's office may be able to help
 - Works best if your GIS page has a floodplain layer
 - Downloadable floodplain layers can be found on FEMA's Map Service Center

Flood Preparedness

- If your community has flood protection measures that need human intervention to install – practice installation on a regular schedule to ensure smooth operation!
 - Know who is responsible to install the protection as well

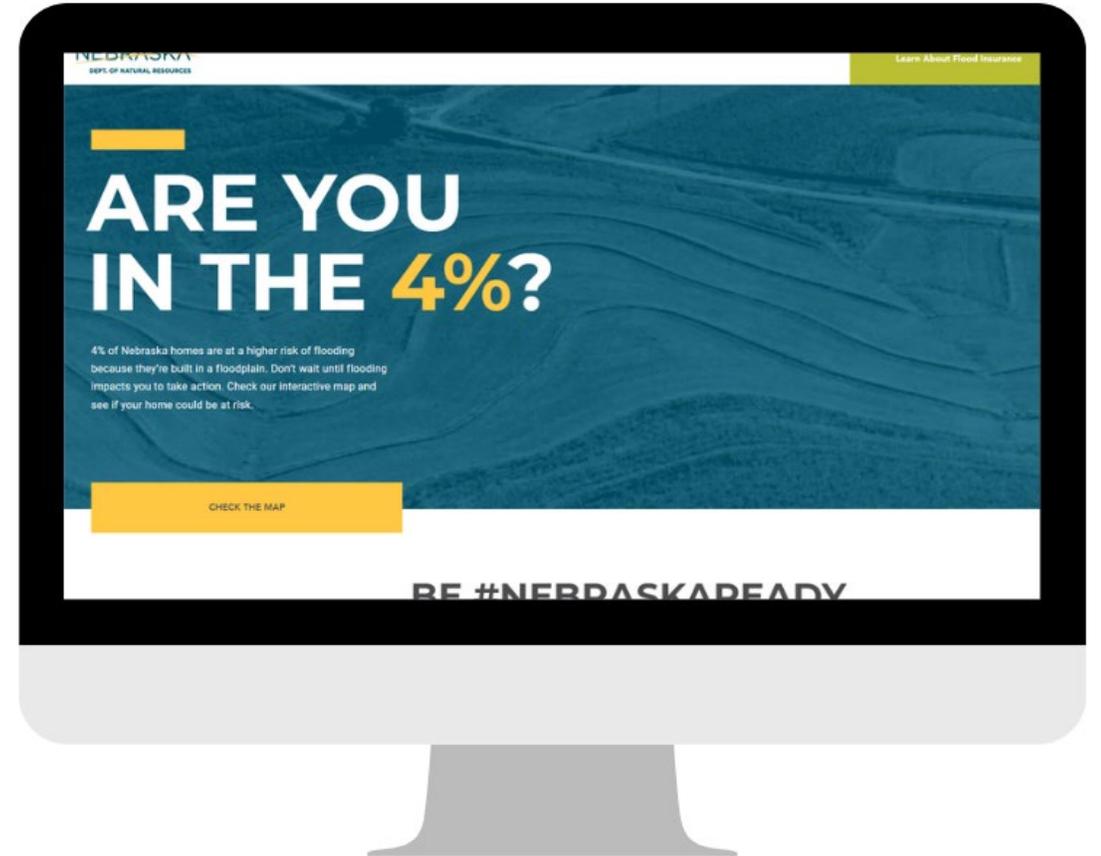

Flood Preparedness

- Inform community members of the likely flood hazards and provide best practices to stay safe before, during, and after a flood
 - Avoid driving in floodwaters, **turn around don't drown**
 - Use caution when entering flooded homes, hidden damage may be present
- Conduct regular outreach campaigns
 - Severe Weather Awareness Week

Resources & Strategies

#NebraskaReady

- Flood preparedness campaign from NeDNR
 1. Pack
 2. Prepare
 3. Be Aware

**ARE YOU
IN THE 4%?**

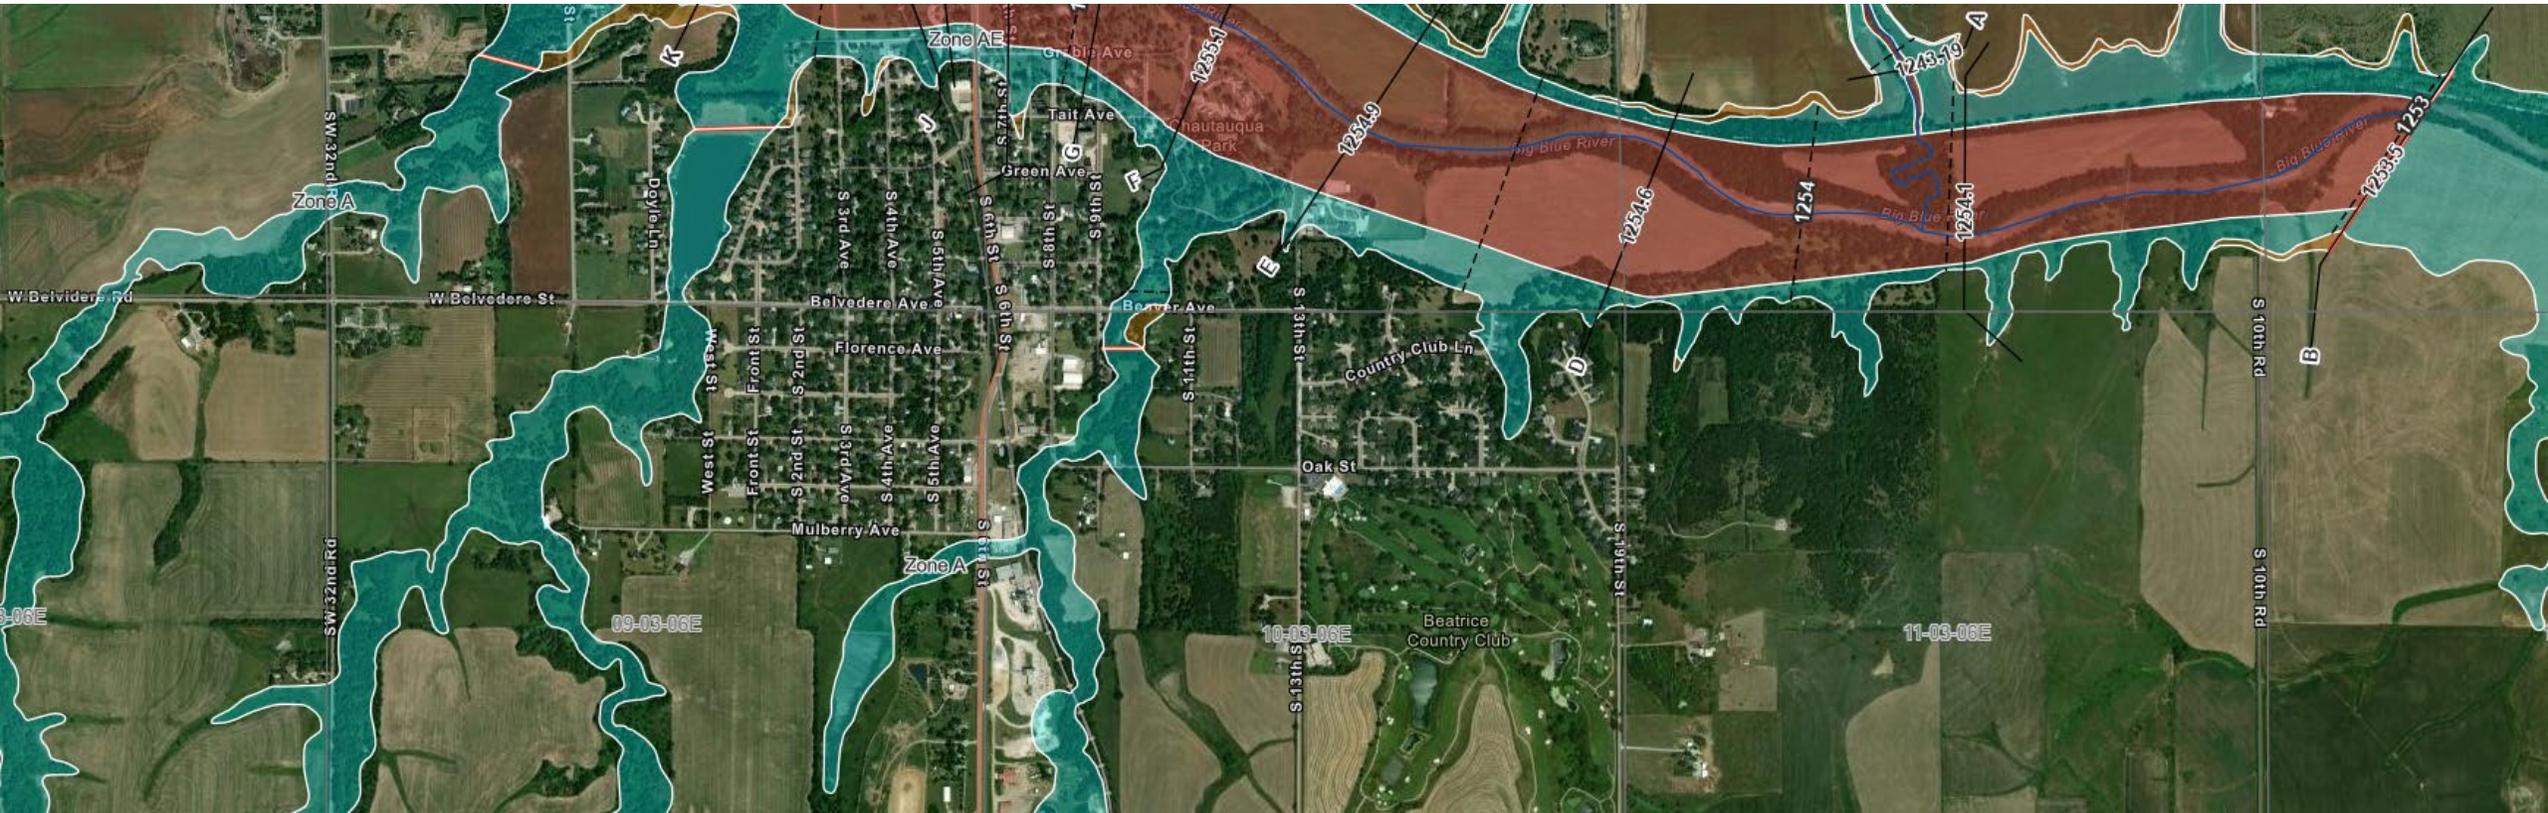

4% of Nebraska homes are at a higher risk of flooding because they're built in a floodplain. Don't wait until flooding impacts you to take action. Check our interactive map and see if your home could be at risk.

CHECK THE MAP

HOW TO FIND OUT IF YOU'RE IN THE 4%

Explore our interactive map to find out if your home is located in a floodplain. Click the link below, then input your address in the top left. Then, use the icons to the left of the address box to toggle map layers on and off. Consult our [map guidance page](#) or [contact Floodplain Management](#) for help interpreting your results.

CHECK THE MAP

#NebraskaReady FAQs

- What you can do if your property is in a floodplain
- Where you can purchase flood insurance
- When flood insurance is mandatory
- How you can help your community in the event of a flood

FREQUENTLY ASKED QUESTIONS

What is a floodplain?

A floodplain is a low-lying area next to a river, lake, or other body of water, which may flood during extreme weather events or high water periods. [FEMA](#) defines regulatory floodplains as the 1% Annual Chance Floodplain or the 100-year Floodplain.

What is a floodway?

A floodway is a natural path for floodwaters to flow through, helping to prevent water from spreading too much into the surrounding areas. Building in a floodway is usually restricted because it's the most dangerous area during a flood.

Is my property in a floodplain?

Visit NeDNR's [Floodplain Interactive Map](#) to locate your property and its proximity to a floodplain. If your community participates in the [National Flood Insurance Program](#) (NFIP), you may also contact your local [floodplain administrator](#). Please note that floodplains can change over time, so check updated flood maps regularly to see if your property is at risk.

My house is in the floodway, what can I do?

If your house is in a floodway and is substantially damaged or if you plan significant improvements, the entire property must comply with your local floodplain ordinance. Rebuilding on the current site may not be allowed. [Contact Floodplain Management](#) for additional resources and information.

What items should I include in my emergency kit?

While this list is not exhaustive, in general, your emergency kit should contain the following: emergency cash (around \$200), a first aid kit, a power bank and charging cable for your phone, canned food and a can opener, bottled water, extra clothing, rubber boots and gloves, NOAA Weather Radio, a battery-operated radio, a whistle (to signal for help),

Flood Terms

- Difference between floodplain and floodway
- The 100-Year Flood
- The 1% Annual Chance
- Flood Insurance

Floodplain vs. Floodway

A floodplain is an area around a river or stream that is prone to flooding. It's generally the flat land that water can spread across when a river overflows. There are certain elevation restrictions to consider when building in a floodplain. These rules are in place to reduce flood risk and protect both people and property.

A floodway is a part of the floodplain that's meant to carry the deepest, fastest-moving water during a flood. It's a natural path for floodwaters to flow through, helping to prevent water from spreading too much into the surrounding areas. Building in a floodway is usually restricted because it's the most dangerous area during a flood.

The 100-Year Flood

The term "100-year flood" refers to a flood event that has a 1% chance of occurring in any given year. It's a statistical way of describing the likelihood of a flood, not a guarantee that such a flood will only happen once every 100 years. A common misunderstanding is that if you've experienced a 100-year flood, you're "safe" for the next 99 years. In reality, multiple 100-year floods can occur within a short period, because each year has that same 1% chance. The term simply reflects the risk level, not a time interval.

The 1% Annual Chance

On a flood map, the term "1% annual chance" typically appears in areas designated as the "100-year floodplain." This means there is a 1% chance of flooding in any given year. If your home is in the 1% Annual Chance Floodplain, your property has at least a 26% chance of being flooded during the course of a 30-year mortgage. The actual risk due to flooding varies depending on your location within the floodplain.

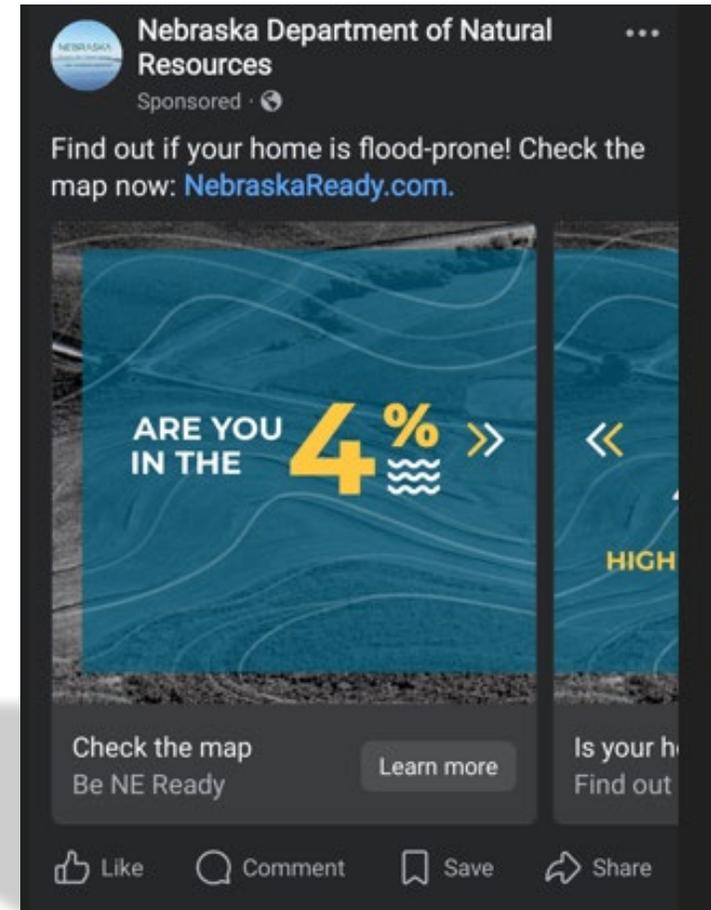

Flood Insurance

People often assume their home insurance covers flooding. However, most policies require a separate flood policy. Flooding can happen anywhere. Flood insurance gives you peace of mind, knowing you're protected if the unexpected happens. Plus, it's often

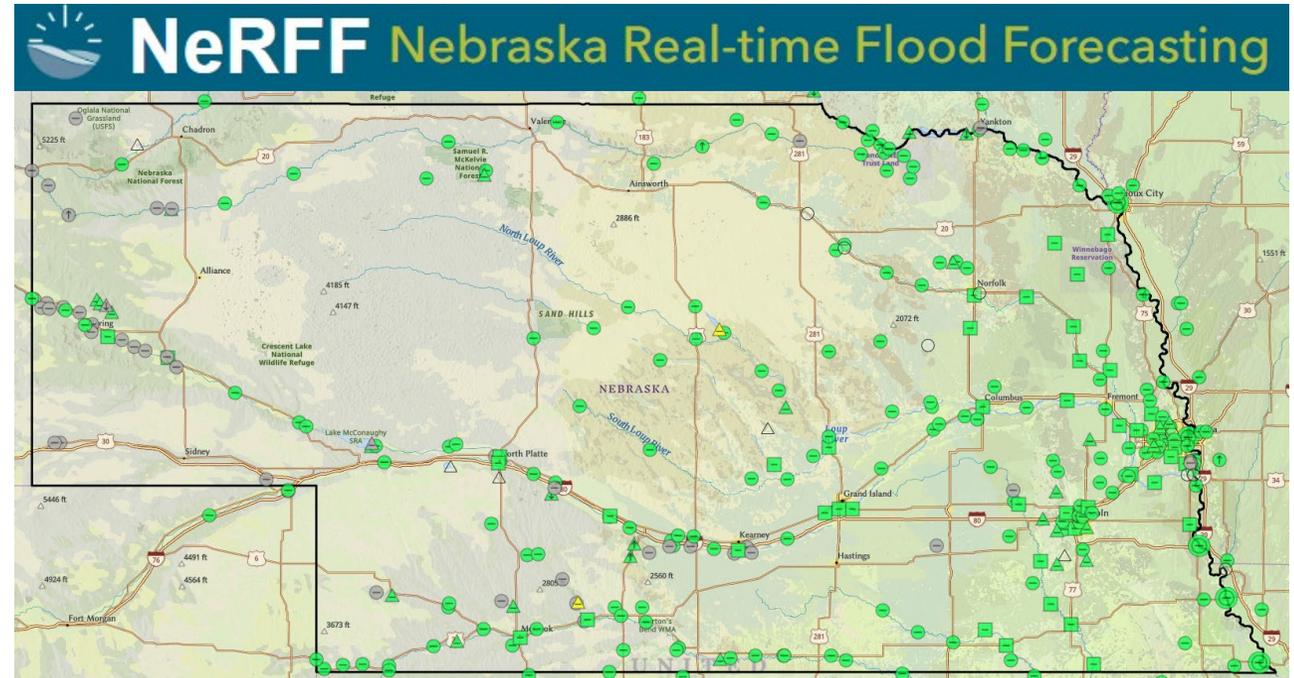

#NebraskaReady Campaign

- Advertisements on social media, search engines, and real estate websites directing them to nebraskaready.com

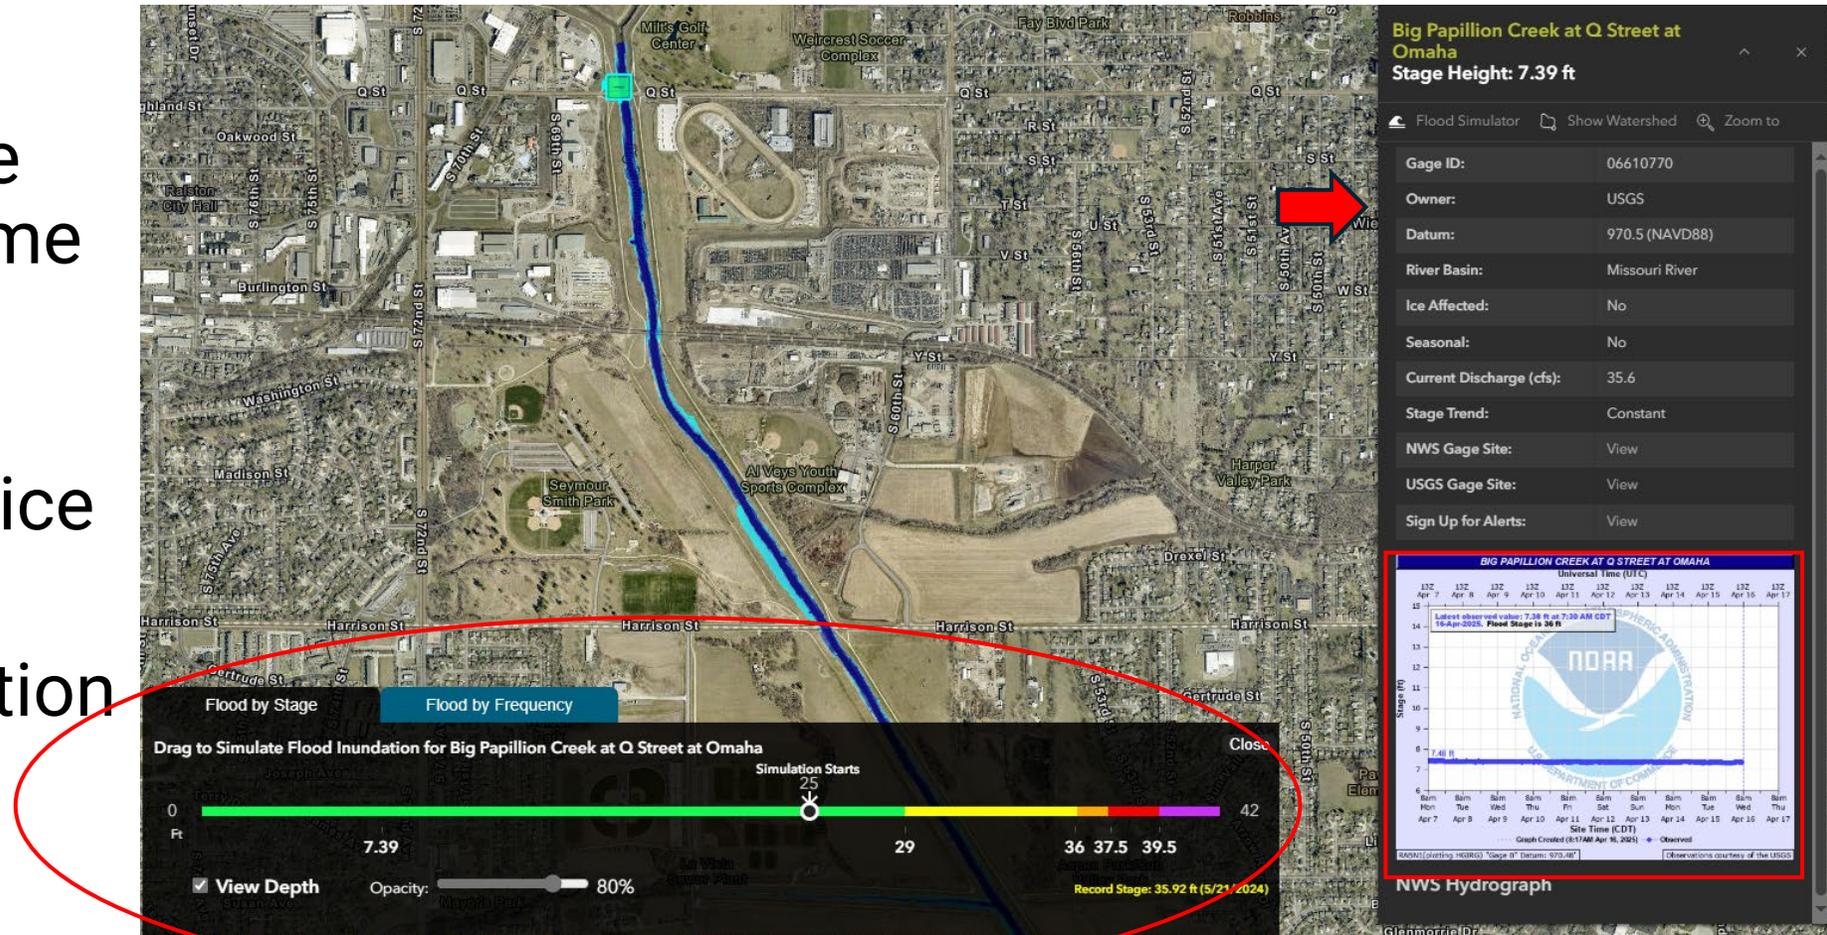

Nebraska Real-Time Flood Forecasting (NeRFF)

- Online flood inundation tool
 - Can show potential flood boundaries based on stream gauge height or recurrence interval (1% annual chance, 0.2% annual chance, etc.)

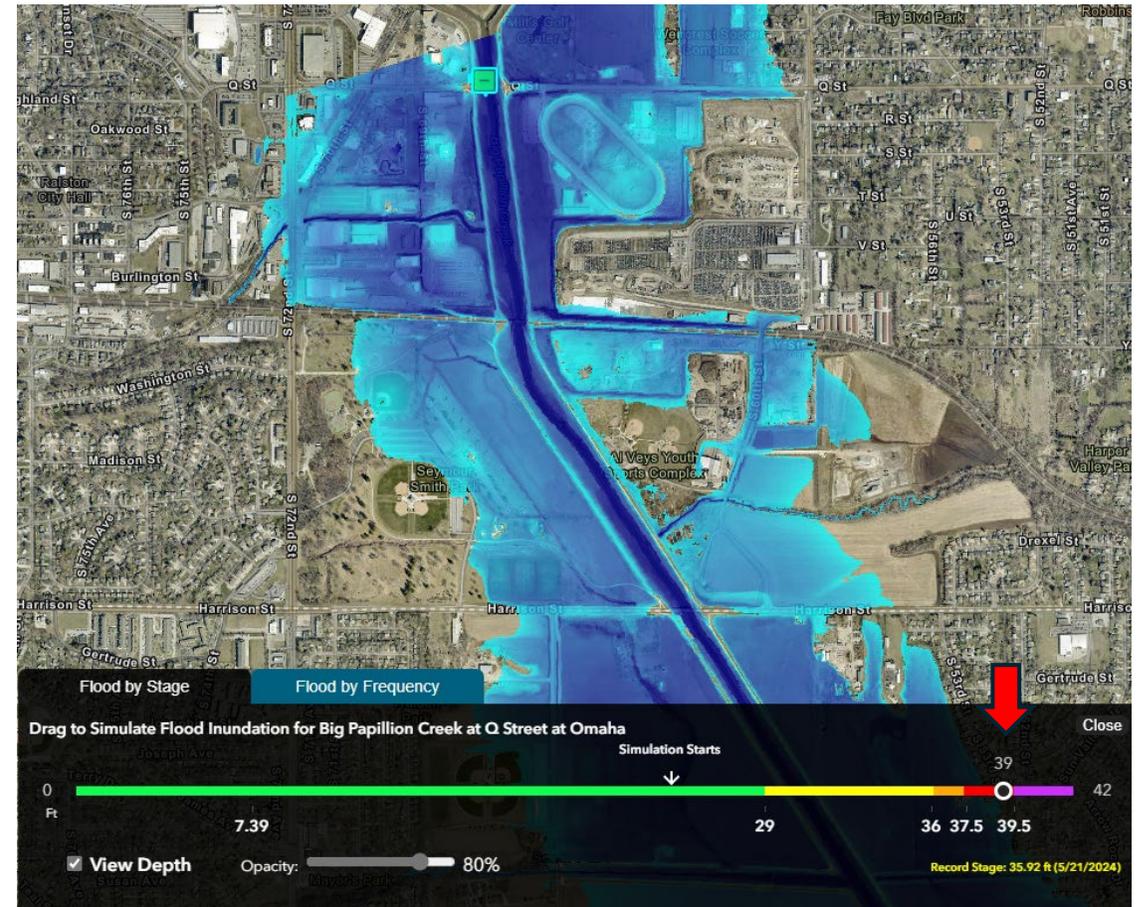

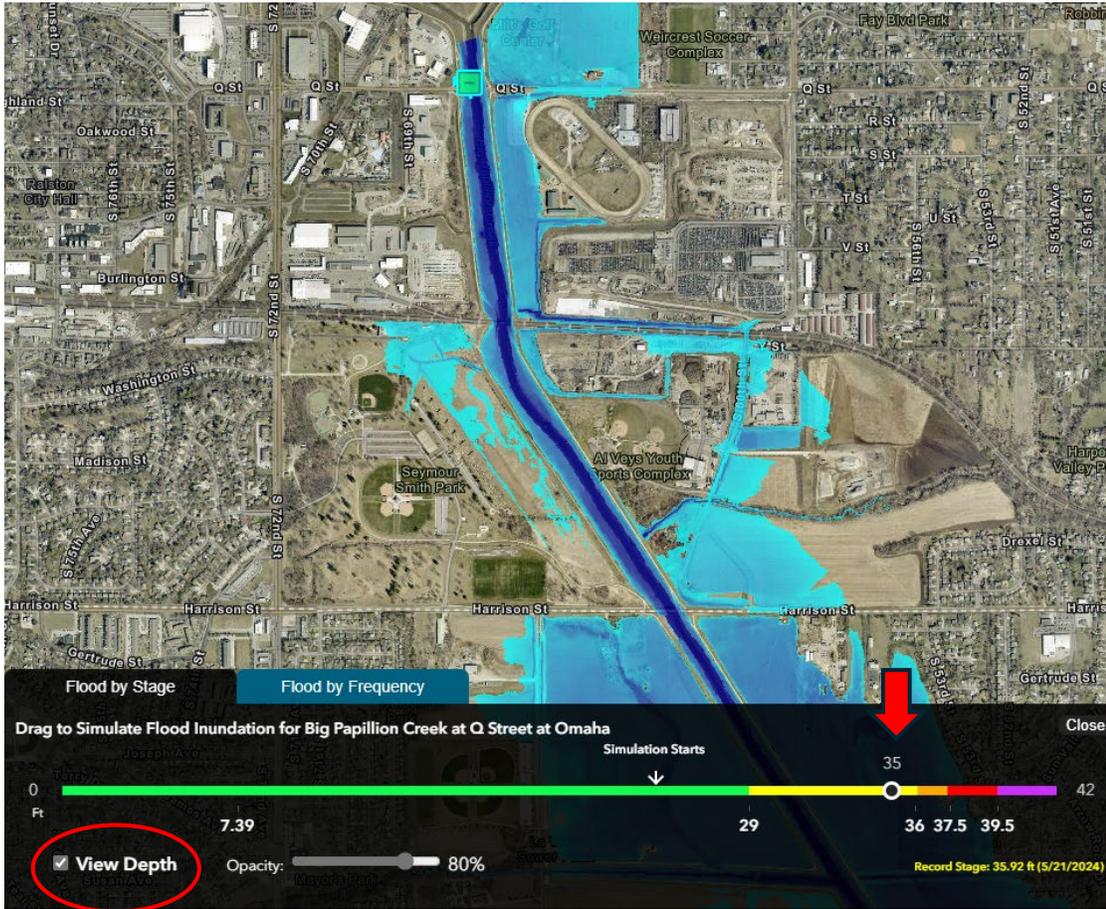

NeRFF Features

- Stream gauge shows real time data
- National Weather Service Hydrograph
- Flood Simulation

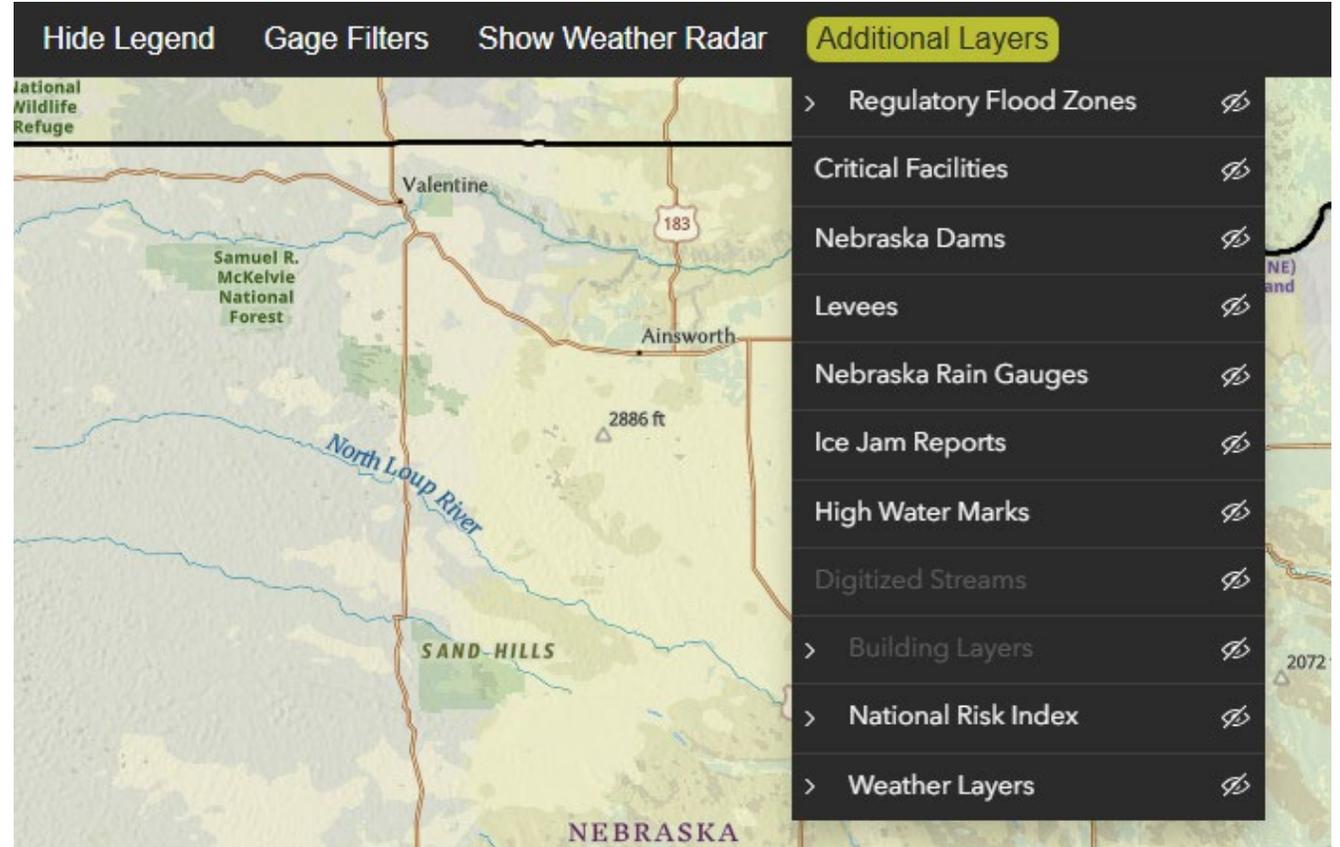

NeRFF Flood Simulator

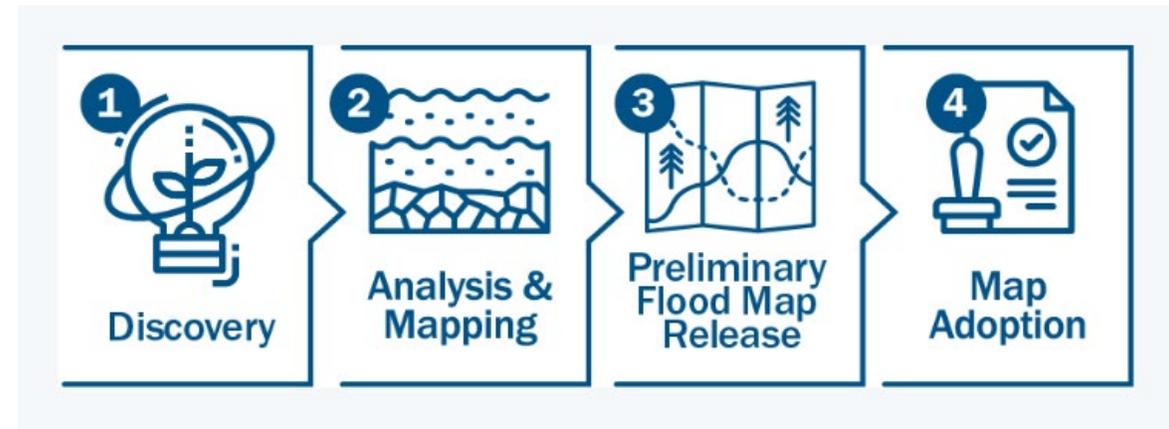

NeRFF Additional Features

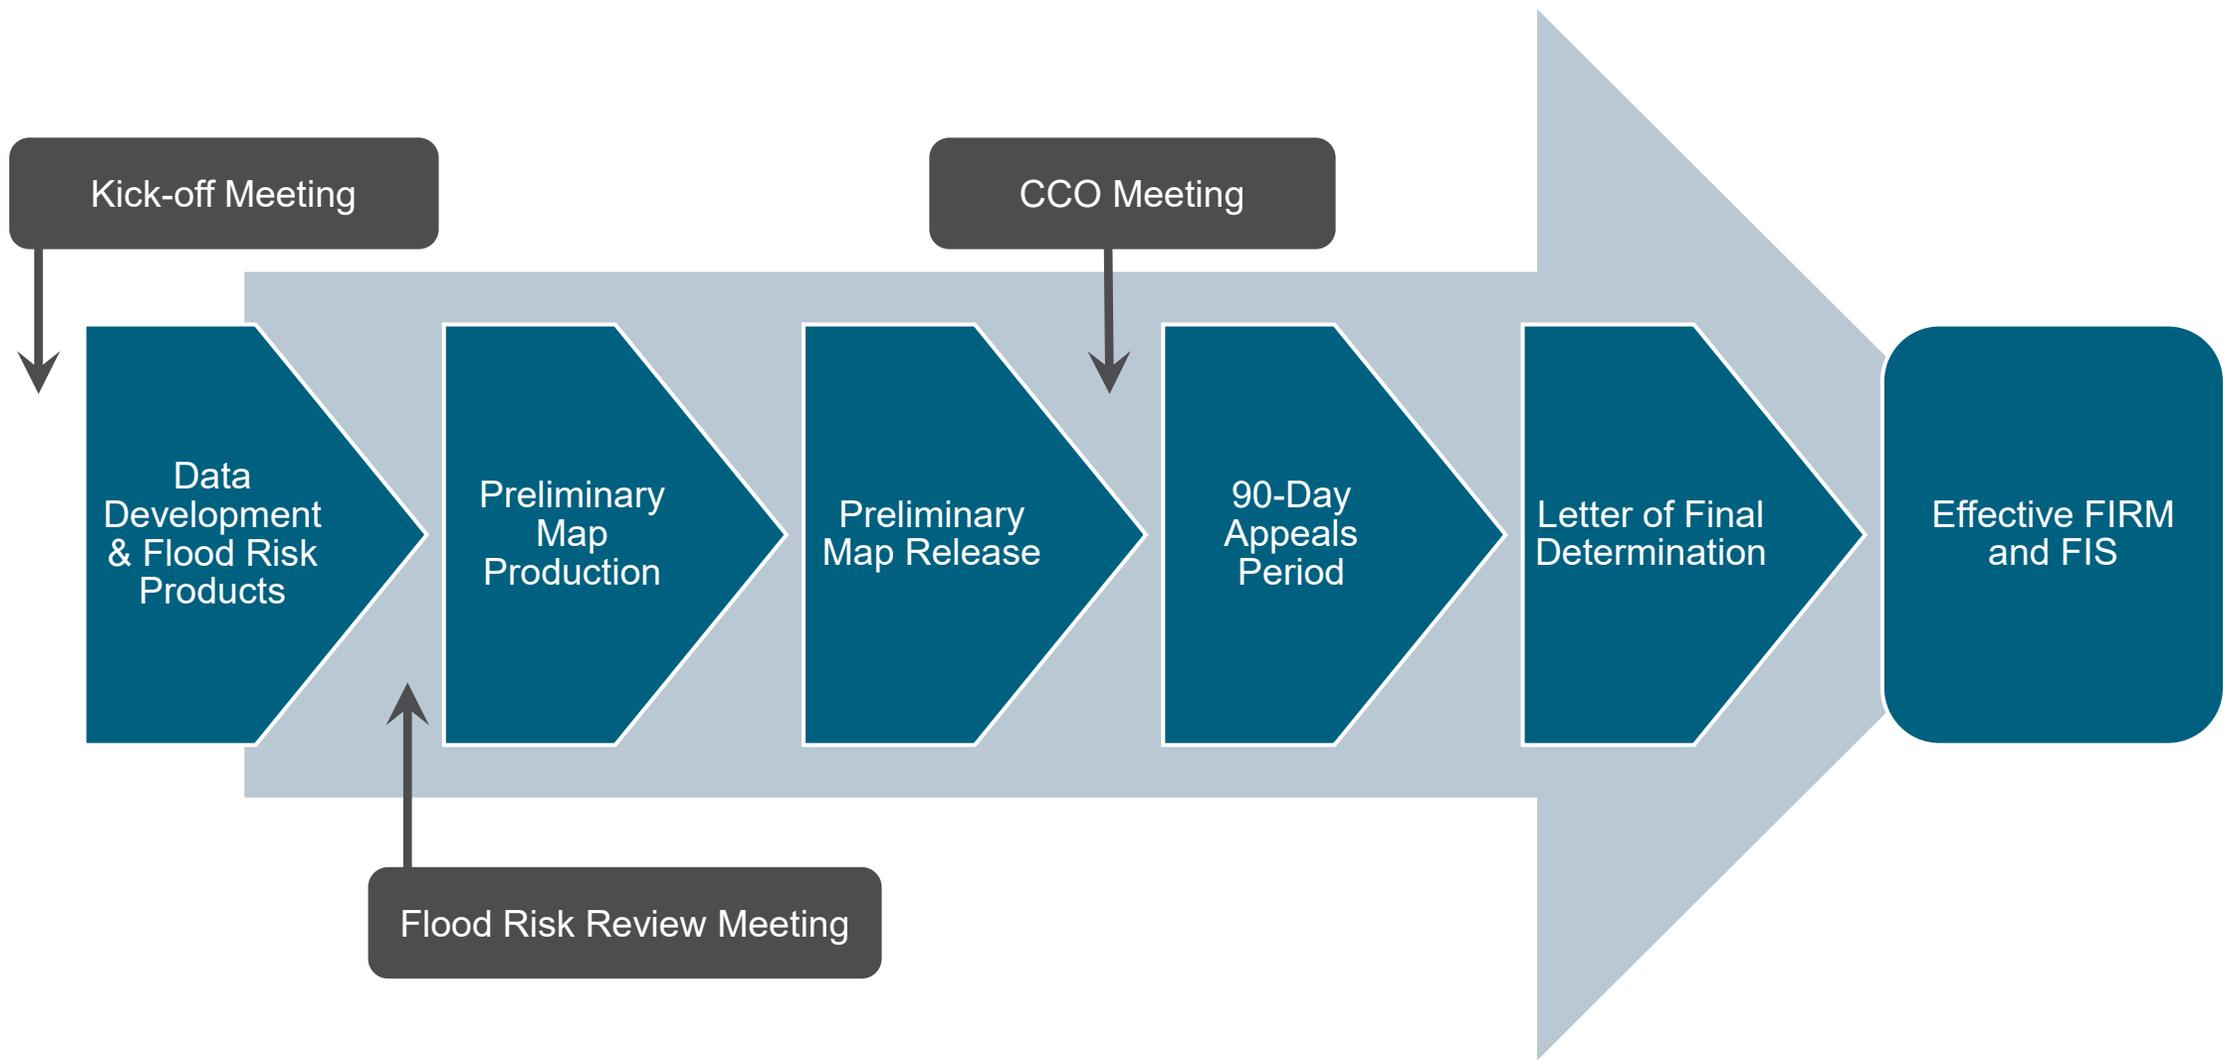

- Stream gage filters
- Weather radar
- Flood zones
- Critical facilities
- Dams and Levees
- Ice jam reports
- Building layers
- National risk index

Risk MAP Outreach

- FEMA Risk Mapping, Assessment, and Planning
 - NeDNR & FEMA working to create new outreach materials to community's receiving new Flood Insurance Rate Maps
 - Postcards sent to community members inviting them to Public Open House meetings
 - Information shared on social media accounts
 - Community involvement is key

Risk Map Timeline

Community's Role – Project Kickoff

- Provide NeDNR with information to help make the maps
 - Corporate boundaries/ETJs
 - Existing Hydrologic/Hydraulic Studies
 - High-water marks or historical storm data
- Begin general outreach to the public
 - Provide the floodplain administrator's contact information
 - Host a local community meeting
 - Ensure floodplain maps are accessible

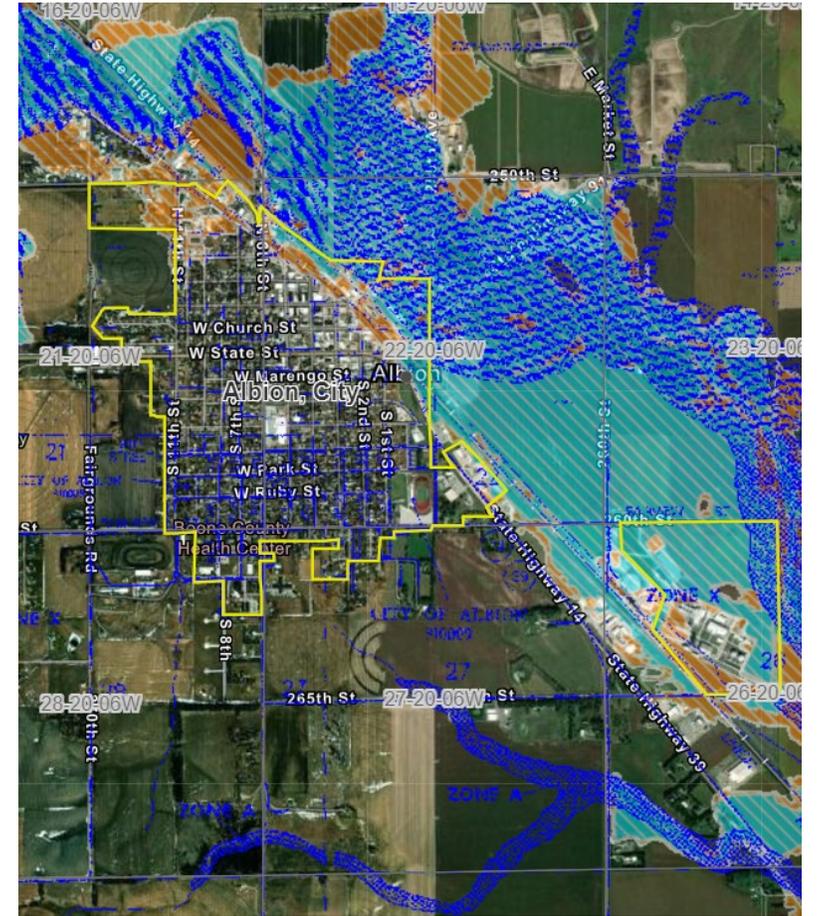

Community's Role – Data Development

- Engage community leadership
- Continue conversations with property owners as data becomes available
- Coordinate additional information with NeDNR
 - Because there are no draft maps, data and floodplain boundaries can still be adjusted

Community's Role – Flood Risk Review

- A meeting with community officials and stakeholders where draft work maps are presented
- Community officials can continue to provide comments on the draft work maps using the NeDNR Interactive Map
- NeDNR will coordinate with communities to invite as many attendees as possible to Public Open Houses
 - Help us get people there!

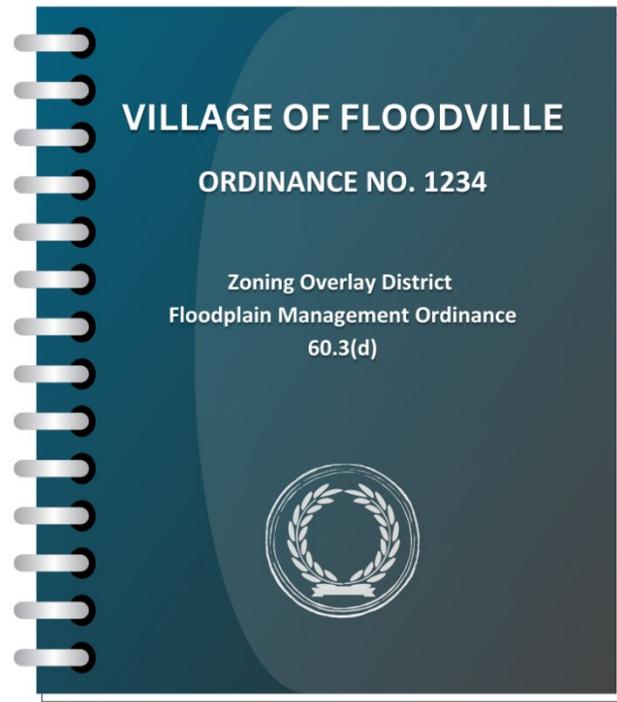

Community's Role – Preliminary Map Release

- NeDNR will present the preliminary maps at the Consultation Coordination Officer meeting
 - FPA and community leadership must attend
- Any additional changes now require technical data provided by communities
 - Must be submitted during appeals period (will open for 90 days)
- The community will be provided with a Summary of Map Action (SOMA)
 - Comprehensive list of all effective Letters of Map Change (LOMC), and the likely outcome after the new maps become effective

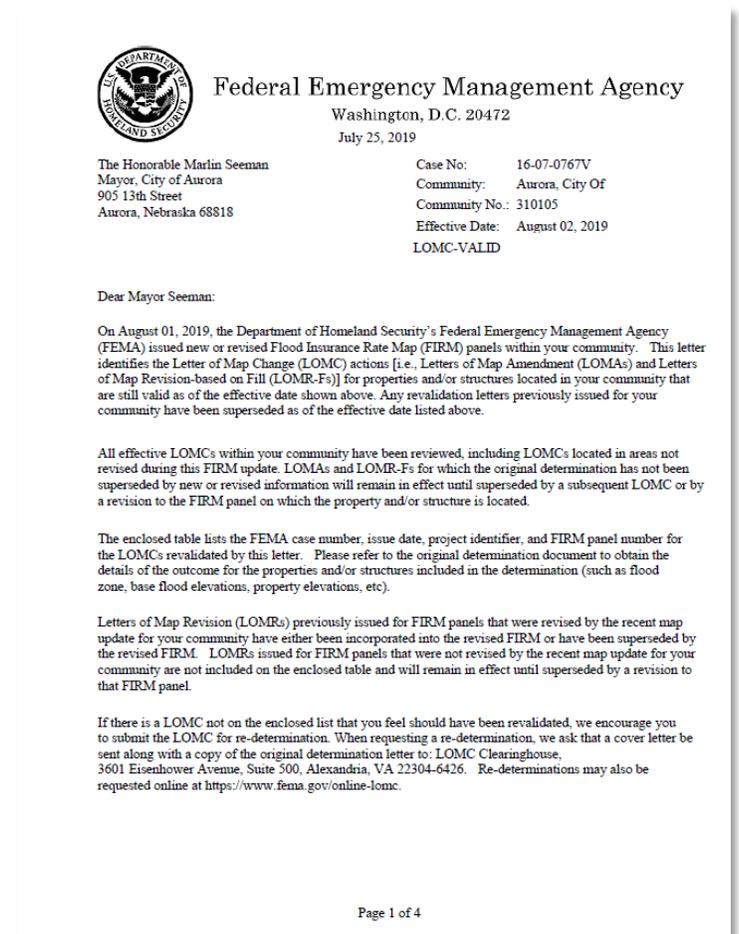

Community's Role – Letter of Final Determination

- The Letter of Final Determination is issued to all community leaders in the project area
- Signifies the start of a 6-month period within which communities must adopt the new maps
- Map adoption is completed through local floodplain ordinances
- NeDNR will likely have already reviewed floodplain ordinances to determine if a new ordinance is needed, or if the existing ordinance can be amended

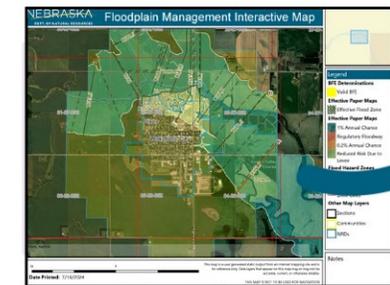

Community's Role – Letter of Final Determination

- Revalidation Letter
 - Issued one day before new map effective date
 - Only lists LOMC that are still in effect with the new maps
 - LOMC that have been superseded, are no longer valid, or were incorporated into the new maps (now shown as out) are not included
 - Again, is only provided to community leadership
 - Share the information with property owners!

Strategies

- Periodic press releases or newspaper articles
- Inserts in mailed bills
- Resources posted on website/social media or community buildings
- Regular discussions with governing body
- Inviting NeDNR to help!
- Other ideas?

Strategies

- Post FIRM panels in office and online
- Ensure floodplain management ordinance is easily accessible either online, in-person, or both!
 - Make the information as easily accessible as possible

ORDINANCE/RESOLUTION NO. {number}

Zoning Overlay District

Floodplain Management Ordinance

60.3(d)

AN ORDINANCE INTRODUCED BY THE GOVERNING BODY CREATING FLOODWAY AND FLOOD FRINGE DISTRICTS DEFINING THE SAME AND SETTING FORTH REGULATIONS THEREOF.

SECTION 1.0 STATUTORY AUTHORIZATION, FINDINGS OF FACT, AND PURPOSES

1.1 STATUTORY AUTHORIZATION

The Legislature of the State of Nebraska has delegated the responsibility to local governmental units to adopt zoning regulations designed to protect the public health, safety, general welfare, and property of the people of the state. The Legislature, in *Nebraska Revised Statutes* Sections 31-1001 to 31-1023 (as amended), has further assigned the responsibility to adopt, administer, and enforce floodplain management regulations to the county, city, or village with zoning jurisdiction over the floodprone area. Therefore the {governing body} of {community name}, Nebraska ordains as follows:

1.2 FINDINGS OF FACT

A. Flood Losses Resulting from Periodic Inundation

The flood hazard areas of {community name}, Nebraska are subject to inundation that results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety, and general welfare.

B. General Causes of the Flood Losses

These flood losses are caused by the cumulative effect of obstructions in floodplains causing increases in flood heights and velocities as well as the occupancy of flood hazard areas by uses vulnerable to floods or hazardous to others that are inadequately elevated or otherwise unprotected from flood damages.

1.3 STATEMENT OF PURPOSE

Strategies

- Use this information you learned in this presentation today to inform community members of the importance of preparedness!

Key Takeaways

NEBRASKA

Good Life. Great Water.

Key Takeaways

- Preparedness has no end date – continue to update plans and practice regularly
 - Ensure you know the hazards most likely to affect your community
 - Proper floodplain management and outreach is the best preparation for a flooding event
 - Establish a relationship with your emergency manager
 - NeDNR is here to help, with a variety of resources!
-
