HYDROGRAPHIC REPORT
OF
BUREAU OF IRRIGATION, WATER POWER AND DRAINAGE

1929 - 1932

THIRD HYDROGRAPHIC REPORT
OF THE
BUREAU OF IRRIGATION, WATER
POWER AND DRAINAGE

1929-32

TO THE
GOVERNOR OF NEBRASKA

Claflin Printing Company
Lincoln, Nebraska
1935

Lincoln, Nebraska,
June 25, 1935.

HONORABLE R. L. COCHRAN,
GOVERNOR OF NEBRASKA,
LINCOLN, NEBRASKA.

DEAR SIR:

I have the honor to submit the following Hydrographic Report of the Bureau of Irrigation, Water Power, and Drainage, covering the years 1929 to 1932 inclusive. This report is the third of a series, the first of which was published in 1914.

Respectfully submitted,

A. C. TILLEY,
State Engineer.

EXECUTIVES AND EMPLOYEES
of the
BUREAU OF IRRIGATION, WATER POWER, AND DRAINAGE
AND
COOPERATIVE ASSISTANTS OF THE UNITED STATES
GEOLOGICAL SURVEY

For the Years 1929 to 1932, Inclusive

HONORABLE A. C. TILLEY,
STATE ENGINEER,
DEPARTMENT OF ROADS AND IRRIGATION,
LINCOLN, NEBRASKA.

DEAR SIR:

I have the honor to submit the Hydrographical Report of the Bureau of Irrigation, Water Power, and Drainage covering the years 1929 to 1932 inclusive, prepared under my direction.

The first Hydrographical Report covers the period prior to 1914, the second report covers the period from 1914 to 1928 inclusive, and this report covers the period from 1929 to 1932 inclusive. All future hydrographical data will be published in the Biennial Report.

Respectfully submitted,

R. H. WILLIS, CHIEF,
Bureau of Irrigation, Water
Power, and Drainage.

INTRODUCTION

This hydrographical report covers the years 1929 to 1932 inclusive, and is designated as a supplemental report to fill in the break of the published reports from 1895 to 1932 inclusive. Beginning with the year 1933, all hydrographical data will be included in the State Engineer's Biennial Reports.

Available hydrographical data prior to 1914 were published, but the reports are now out of print. Data acquired from 1914 to 1928 are published, and a supply of the reports is still available for distribution. This supplemental report contains hydrographical data acquired from 1929 to 1932 inclusive.

Additional data are made possible in this report by a cooperative contract with the United States Geological Survey.

Beginning with the year 1931 of this report, hydrographical data are being shown by water year (ending September 30), instead of the calendar year as has been the practice in the past. In making this change there will be a duplication or an overlap for the months of October, November, and December, 1930. In the future all data will be published by water year.

DESCRIPTION OF GAGING STATIONS

PATHFINDER RESERVOIR, WYOMING

LOCATION—The dam, constructed of granite masonry, is located in the channel of the North Platte River, in Section 24, Township 29 North, Range 84 West, three miles below the mouth of the Sweet Water. Its capacity at spillway elevation, 5852 feet above mean sea level, is 1,070,000 acre-feet, at which elevation it submerges an area of about 22,000 acres. The outflow is measured one-quarter mile below the dam, where a foot bridge has been installed.

DISTANCE FROM RESERVOIR—About one-quarter mile.

DRAINAGE AREA—10,700 square miles.

ELEVATION OF OVERFLOW WEIR—5852.00 feet mean sea level.

RECORDS AVAILABLE—May 1, 1909, to September 30, 1932.

GAGE—Chain at north bank near foot bridge.

CHANNEL—Very narrow and through solid granite.

OBSERVER—Observations made and discharges furnished by the United States Bureau of Reclamation.

GUERNSEY RESERVOIR, WYOMING

LOCATION—The Guernsey Dam is located on the North Platte River near the north line of Section 27, Township 27 North, Range 66 West. It is about one and one-half miles northwest of the town of Guernsey, Wyoming. The dam is 192 miles below the Pathfinder Dam. Height 105 feet above river bed and 500 feet in length.

A gaging station is maintained by the United States Bureau of Reclamation a short distance below the Guernsey Dam. An automatic recorder is used in connection with this station.

NORTH PLATTE RIVER AT WHALEN, WYOMING

LOCATION—Section 11, Township 26 North, Range 65 West.

DISTANCE FROM PATHFINDER—200 miles.

DRAINAGE AREA—16,300 square miles.

ELEVATION—Elevation of concrete weir is 4278.50 feet above mean sea level.

RECORDS AVAILABLE—May 1, 1909 to September 30, 1932.

GAGE—The discharges over the weir are determined by use of a vertical staff and computed by weir formula. In addition to this

STATE OF NEBRASKA

NORTH PLATTE RIVER AT WHALEN, WYOMING—Continued

there are also sluice gates through which the discharge is computed. Usually the Ft. Laramie Canal carries water the year around for the Lingle Power Plant. The flow from the Power Plant through the tail race back to the river is not included in the discharge at the river weir for this biennium. The weir is constructed of concrete three hundred feet in length, and twelve and one-half feet in height above the river bed.

OBSERVER—Observations made and discharge records furnished by the United States Bureau of Reclamation.

NORTH PLATTE RIVER AT TORRINGTON, WYOMING

LOCATION—Concrete highway bridge consisting of six fifty foot spans, about one-half mile south of Torrington. In Section 15, Township 24 North, Range 61 West; twenty-five miles below the mouth of the Laramie River.

DISTANCE FROM PATHFINDER—230 miles.

DRAINAGE AREA—21,700 square miles.

ELEVATION—Approximately 4180.00 feet above mean sea level.

BENCH MARKS—No. 1, is a cross-chiseled in concrete, twelve feet from south end on down-stream handrail, elevation 18.12. Established February 27, 1931. No. 2, heads of two spikes driven horizontally in blaze half a foot above base of 12 inch cottonwood tree, 30 feet south and 80 feet down-stream from south end of bridge. Elevation 7.70 feet. Established October 16, 1931.

RECORDS AVAILABLE—April 1, 1926, to September 30, 1932.

GAGE—On October 6, 1931, a new gage graduated from 0 to 3.3 feet, and two one foot sections attached to a 2" x 6" plank bolted to down-stream end of the second pier from south end of bridge, was set to read same as old gage on piling number nine. It was later found by levels to be 0.10 lower than the old gage.

RECORDER—Stevens Type A continuous recorder, installed on south bank by the United States Geological Survey cooperating with the State of Nebraska. Records are removed by a United States Geological Survey hydrographer.

NORTH PLATTE RIVER AT HENRY, NEBRASKA

(Cable Station)

LOCATION—In NE $\frac{1}{4}$ of Section 10, Township 23 North, Range 60 West, between the Mitchell Canal and the Gering Canal headgates, about one-fourth mile west of the Wyoming-Nebraska State Line.

HYDROGRAPHIC REPORT, 1929-32

9

DISTANCE FROM PATHFINDER—240 miles.

DRAINAGE AREA—22,100 square miles.

ELEVATION—Approximately 4035.00 feet above mean sea level.

BENCH MARKS—No. 1 is top of bolt in concrete on top of the tower anchorage, on the south bank of the river. Elevation 5.04 feet.

RECORDS AVAILABLE—From May 1, 1929, to September 30, 1932.

GAGE—Boxed cantilever chain gage on south bank. Scale graduated from zero to six and seven-tenths feet. Length of chain 16.44 feet. Stevens continuous gage height recorder installed in housing over a stilling well near the gage rod, November 6, 1929. On April 16, 1932, the recorder was moved to the north bank near the north cable tower.

RECORDER—Stevens Type A continuous recorder, installed in a housing on the north bank of the river, by the United States Geological Survey cooperating with the State of Nebraska. Records removed by United States Geological Survey hydrographer.

NORTH PLATTE RIVER AT MITCHELL, NEBRASKA

LOCATION—At highway bridge near southwest corner of Section 27, Township 23, North, Range 56 West. Three-quarters of a mile south of Mitchell, and 14 miles down-stream from the Wyoming-Nebraska State Line.

DISTANCE FROM PATHFINDER—253 miles.

DRAINAGE AREA—24,400 square miles.

ELEVATION—Approximately 3945.00 feet above mean sea level.

BENCH MARKS—No. 1 is cross chiseled in concrete near corner of ledge at approximately floor level on down-stream side and at end of south down-stream wingwall. Elevation 11.39 feet. No. 2 is the heads of 2 spikes driven horizontally in 18" cottonwood, near base, 200 feet down-stream from bridge, and 10 feet from south bank. Elevation 6.15 feet.

RECORDS AVAILABLE—From June 2, 1901, to July 10, 1913, and from 1916 to September 30, 1932.

GAGE—Vertical staff gage consisting of six one foot enamel sections attached to scantling fastened on down-stream side of first pier from south end of bridge, by two one-half inch lag screws, 24 inches long in expansion shields.

RECORDER—Stevens Type A continuous recorder, installed in a housing constructed over the stilling well located on the south bank of the river, about 50 feet east of the south end of the concrete bridge. Records removed by United States Geological Survey hydrographer.

STATE OF NEBRASKA

NORTH PLATTE RIVER AT MINATARE, NEBRASKA

LOCATION—West line of Section 18, Township 21 North, Range 52 West, one mile west and one and one-half miles south of Minatare. Concrete bridge consisting of twelve fifty-foot arches.

DISTANCE FROM PATHFINDER—270 miles.

DRAINAGE AREA—24,700 square miles.

ELEVATION—Approximately 3820.00 feet above mean sea level.

BENCH MARKS—Zero point of gage is 13.5 feet below top of hand rail above gage. Cross chiseled in concrete near corner of ledge about one foot above floor level, and on down-stream side at end of south wingwall. Elevation 11.68. No. 2 is head of spike driven horizontally in blaze near base of six inch cottonwood tree, 25 feet down-stream. Elevation 4.25 feet.

RECORDS AVAILABLE—From May, 1916, to September 30, 1932, with the exception of the year 1920.

GAGE—Vertical staff fastened to the second concrete pier from south end of bridge on down-stream side.

RECORDER—Stevens Type A continuous recorder in standard wooden shelter, on the south bank east of bridge. Installed by the United States Geological Survey cooperating with the State of Nebraska. Records removed by United States Geological Survey hydrographer.

NORTH PLATTE RIVER AT BRIDGEPORT, NEBRASKA

LOCATION—In Section 28, Township 20 North, Range 50 West, one-half mile north of Bridgeport, on concrete highway bridge, consisting of twenty-three spans of thirty foot clear water way.

DISTANCE FROM PATHFINDER—293 miles.

DRAINAGE AREA—24,800 square miles.

ELEVATION—Approximately 3675.00 feet above mean sea level.

BENCH MARKS—No. 1 is head of two spikes driven horizontally in cottonwood tree in blaze near base, 20 feet down-stream from gage. Established October 17, 1931. Elevation 9.02 feet. No. 2 is cross on the top of the southeast concrete abutment at the end of the hand rail. Elevation 15.62 above zero of gage.

RECORDS AVAILABLE—From May, 1902, to 1906, and 1915 to September 30, 1932.

GAGE—Consists of six one foot sections of enamel scale bolted to concrete on down-stream side of south abutment.

OBSERVER—Office Engineer during freezing weather.

RECORDER—Stevens Type A long distance automatic recorder

placed in housing over stilling well constructed on south bank of river, and attached to abutment wing of wood piling and planking.

NORTH PLATTE RIVER AT LISCO, NEBRASKA

LOCATION—Highway bridge in Section 33, Township 18 North, Range 46 West, half a mile south of Lisco.

DISTANCE FROM PATHFINDER—321 miles.

DRAINAGE AREA—

ELEVATION—Approximately 3540.00 feet above mean sea level.

BENCH MARKS—No. 1 is a cross chiseled in concrete near corner of bridge seat at down-stream side of south abutment. Elevation 8.68 feet. No. 2 is top of pier directly above staff gage. Elevation 8.84 feet above zero of gage.

RECORDS AVAILABLE—From April 10, 1916, to October 31, 1917, and September 9, 1931, to September 30, 1932.

GAGE—A vertical staff attached to south side of corrugated iron stilling well, which is located on the first pier from south end of bridge on down-stream side.

RECORDER—Stevens Type A-30 continuous recorder, installed May 4, 1932, in corrugated iron shelter attached to down-stream side of pier from south end of bridge. Installed by the United States Geological Survey cooperating with the State of Nebraska. Records are removed by a United States Geological Survey hydrographer.

NORTH PLATTE RIVER AT OSHKOSH, NEBRASKA

LOCATION—Steel truss bridge consisting of seven ninety-eight foot spans, on the west line of Section 2, Township 16 North, Range 44 West, about one mile south of Oshkosh.

DISTANCE FROM PATHFINDER—348 miles.

DRAINAGE AREA—27,500 square miles.

ELEVATION—Approximately 3370.00 feet above mean sea level.

BENCH MARKS—The zero point of gage is 9.05 feet below top of concrete pier directly above the gage.

RECORDS AVAILABLE—From April 7, 1916, to October 30, 1917, and from March 1, 1928, to September 30, 1932.

GAGE—Enamel vertical staff graduated from zero to 6.7 feet, attached to a 2" x 6" timber, fastened to down-stream side of first pier from the north end of bridge.

OBSERVER—Donald Meier, Oshkosh, Nebraska.

STATE OF NEBRASKA

NORTH PLATTE RIVER AT NORTH PLATTE, NEBRASKA

LOCATION—Concrete highway bridge consisting of 14 spans, one-half mile north of the City of North Platte, in Section 28, Township 14 North, Range 30 West, about four and one-half miles above junction with the South Platte River.

DISTANCE FROM PATHFINDER—422 miles.

DRAINAGE AREA—28,500 square miles.

ELEVATION—Approximately 2800.00 feet above mean sea level.

BENCH MARKS—Top of nose of pier on west side of bridge 360 feet from south end of bridge. Elevation 11.47 feet.

RECORDS AVAILABLE—February 25, 1895, to September 30, 1932, excepting the year 1910.

GAGE—Four and one-half foot vertical staff gage fastened to the first pier from the south end of the bridge on the down-stream side.

OBSERVER—A. W. Shilling, North Platte, Nebraska.

RECORDER—Stevens Type A continuous recorder, located on down-stream end of first pier from south end. Records removed by State hydrographer.

SOUTH PLATTE RIVER AT JULESBURG, COLORADO

LOCATION—South of Julesburg and approximately two miles from the Nebraska-Colorado Line. The river is divided into four channels, numbered one, two, three and four, beginning with the south channel. Channels one and two are the principal channels. Channels three and four carry no water of consequence except during the flood periods. During floods the four channels become one channel.

DRAINAGE AREA—20,600 square miles.

ELEVATION—Approximately 3450.00 feet above mean sea level.

BENCH MARKS—

RECORDS AVAILABLE—April, 1902, to November 14, 1906; May 12, 1908, to September 30, 1914; January 1, 1923, to September 30, 1932.

GAGES—All channels are provided with chain gages on the down-stream side of the bridge. Channels one and two are provided with staff gages. Channel number one has a vertical staff, and channel number two a sloping staff.

OBSERVER—Archie Joe Luxa, Julesburg, Colorado.

RECORDER—Nebraska maintains a Stevens Type A continuous automatic recorder in channel number one, and Colorado maintains a Briston automatic recorder in channel number two. Records removed by State hydrographer.

SOUTH PLATTE RIVER AT NORTH PLATTE, NEBRASKA

LOCATION—Concrete bridge consisting of 10 spans, 50 feet each, in Section 9, Township 13 North, Range 30 West, about four miles above its junction with the North Platte River.

DRAINAGE AREA—24,300 square miles.

ELEVATION—Approximately 2800.00 feet above mean sea level.

BENCH MARKS—Elevation of handrail northeast corner of bridge, 109.58, elevation of zero of rod 93.48. Elevation of spike in fifth telephone pole on north side of river 98.80.

RECORDS AVAILABLE—From June 1, 1914, to September 30, 1932.

GAGE—Enamel scale graduated from zero to 6.7 feet, fastened to down-stream end of first pier from south end of bridge.

PLATTE RIVER AT OVERTON, NEBRASKA

LOCATION—Concrete highway bridge, consisting of 25 spans, 35.5 feet center to center, four miles south of Overton, on north and south center line through Section 12, Township 8 North, Range 20 West.

DISTANCE FROM PATHFINDER—490 miles.

DRAINAGE AREA—58,400 square miles.

ELEVATION—Approximately 2320 feet above mean sea level.

BENCH MARKS—No. 1 is top of concrete wheel guard on up-stream side at north end of bridge, elevation 12.00 feet.

RECORDS AVAILABLE—June, 1918, to September 30, 1932, with the exception of the year 1924.

GAGE—Gage rod is fastened to a 4" x 6" x 4' staff, wired to first pier of bridge from north end on down-stream side. The elevation of zero is 88.00 feet. The top of the post to which gage is attached is 91.95; top of concrete wheel guard on west side of bridge at north end is 100.00 feet. Second enamel gage graduated from zero to 6.70 is attached to down-stream end of first pier from south end of highway bridge.

OBSERVER—E. D. Long, Overton, Nebraska.

RECORDER—Stevens Type A continuous recorder on south bank of stream, 40 feet down-stream from bridge. The record is referred to gage rod attached to first pier from north end of bridge. Records removed by State hydrographer.

STATE OF NEBRASKA

PLATTE RIVER AT DUNCAN, NEBRASKA

LOCATION—About one and a half miles due south of Duncan on highway, in Section 12, Township 16 North, Range 2 West, on concrete bridge consisting of 18 spans, fifty feet between piers.

DISTANCE FROM PATHFINDER—632 miles.

DRAINAGE AREA—61,600 square miles.

ELEVATION—Approximately 1480.00 feet above mean sea level.

BENCH MARKS—No. 1 is on top of old engine valve set flush with top of first pier from left end near up-stream point. Elevation 12.80 feet above zero of rod.

RECORDS AVAILABLE—From October, 1928, to September 30, 1932.

GAGE—One 10.10 foot porcelain gage rod, fastened to a 4" x 6" timber bolted to first concrete pier south of north abutment on down-stream side.

REMARKS—This station is maintained in cooperation with the United States Geological Survey.

PLATTE RIVER AT ASHLAND, NEBRASKA

LOCATION—In Section 29, Township 13 North, Range 10 East, at highway bridge three miles northeast of Ashland. Bridge consists of six steel spans.

DISTANCE FROM PATHFINDER—719 miles.

DRAINAGE AREA—83,800 square miles.

ELEVATION—Approximately 1100.00 feet above mean sea level.

BENCH MARKS—No. 1 is two spikes driven into a 24 inch cottonwood tree located just back of levee on right bank. The tree is the one nearest to bridge on down-stream side. Sea level elevation of bench mark No. 1 is 1028.37 feet. Zero of gage rod is 1020.10 feet.

RECORDS AVAILABLE—Station established by the United States Geological Survey August 20, 1928. Records available from August, 1928, to September 30, 1932.

GAGE—A box chain gage bolted to a 4" x 6" timber ten feet in length. Fastened to down-stream edge of bridge floor in the second span from the right bank of river. An enamel scale graduated from zero to 8.5 feet is fastened to the top of the 4" x 6" timber.

REMARKS—New highway bridge constructed in 1931 east of the C. B. & Q. Railroad bridge in Sections 29 and 32, Township 13 North, Range 10 East. The old bridge is in the process of removal, which will necessitate the selection of a new gaging station the coming year (1933).
