

THIRTY-SIXTH BIENNIAL REPORT  
DEPARTMENT OF WATER RESOURCES  
TO THE  
GOVERNOR OF NEBRASKA

---

1965-1966

DEPARTMENT OF WATER RESOURCES  
Dan S. Jones, Jr.  
Director

Irrigation, Water  
Power and Drainage  
Registration of Wells

## State of Nebraska

FRANK B. MORRISON, Governor  
P. O. Box 94607  
LINCOLN 68509

IN REPLY REFER TO

September 30, 1966

The Honorable Frank B. Morrison  
Governor of Nebraska  
Lincoln, Nebraska

Dear Governor Morrison:

I am pleased to transmit to you herewith the Thirty-Sixth Biennial Report of the Department of Water Resources.

This report covers the two-year period which ended on September 30, 1966. It contains statistical data concerning water appropriations and other matters with which this department is concerned.

Respectfully submitted,

Director of Water Resources

**Thirty-Sixth Biennial Report**

**of the**

**DEPARTMENT OF WATER RESOURCES**

**TO**

**HONORABLE FRANK B. MORRISON**  
**Governor of The State of Nebraska**

**LINCOLN, NEBRASKA**

**1965-1966**

**EXECUTIVES AND EMPLOYEES  
OF THE  
DEPARTMENT OF WATER RESOURCES**

Dan S. Jones, Jr., Director of Water Resources .....	Lincoln
Marion E. Ball, Assistant Director .....	Lincoln
F. H. Klietsch, Division Engineer, Division No. 1 .....	Bridgeport
Edwin S. Kimmel, Hydraulic Engineer .....	Bridgeport
Mollie Bauer, Special Assistant .....	Lincoln
Robert F. Bishop, Division Engineer, Division No. 2 .....	Ord
Leo F. Zabel, Assistant Division Engineer, Division No 1 .....	Cambridge
Stanley M. Christensen, Senior Hydrographer, Office .....	Bridgeport
David B. Ender, Senior Hydrographer .....	North Platte
John H. Hintz, Associate Hydrographer .....	Hershey
David J. Neely, Associate Hydrographer .....	Bridgeport
John G. Lathrop, Hydrographer .....	Crawford
Norman N. McConnell, Hydrographer .....	Bridgeport
Lloyd E. Powell, Jr., Hydrographer .....	Bridgeport
James W. Vassos, Hydrographer .....	Bridgeport
Marvin E. Witherwax, Hydrographer .....	Ord
Arland W. Rakowsky, Technician .....	Lincoln
Janis Stakens, Draftsman .....	Lincoln
Carol Kaster, Bookkeeper .....	Lincoln
Leila Turner, Stenographer Clerk III .....	Lincoln
Phyllis Wragge, Stenographer Clerk III .....	Lincoln
Dorothy A. Brening, Stenographer Clerk II .....	Bridgeport
Carol Hascall, Stenographer Clerk I .....	Lincoln
June Nelson, Clerk Typist II .....	Lincoln
Roma Jean Storey, Clerk Typist I .....	Broadwater
Julie A. Miller, Stenographer Clerk I .....	Lincoln
Anna Griffin, Caretaker .....	Bridgeport

**WATER COMMISSIONERS**

John M. Jess, Big Blue River Basin .....	Lincoln
Henry F. Brandt, Republican River Basin .....	Cambridge
Philip Flohr, Lodgepole Creek Basin .....	Kimball
Robert W. Hoover, North Platte River Basin .....	Ogallala
Homer W. Nickell, North Platte River Basin .....	Bridgeport
David A. Johnson, North Platte River Basin .....	Ogallala
Ron Martin, Republican River Basin .....	Red Cloud
Dean Neff, Loup River Basin .....	Lincoln
Herschel A. Norris, North Platte River Basin .....	Brady
Larry Christensen, Loup River Basin .....	Ord
Henry Pollman, Jr. Republican River Basin .....	Culbertson
Lawrence H. Scarboe, North Platte River Basin .....	Bridgeport
Michael Stanley Uzendoski, Loup River Basin .....	Fullerton

## OTHERS EMPLOYED DURING BIENNIUM

Diane M. Bjorkman, Stenographer Clerk I .....	Lincoln
Peter W. Black, Draftsman .....	Lincoln
William L. Booker, Engineer Aide 2 .....	Lincoln
Sharon L. Egbers, Stenographer Clerk II .....	Lincoln
Mary L. Kobza, Special Assistant .....	Lincoln
Jeanne E. Lewis, Stenographer Clerk II .....	Lincoln
Mary C. Kildaw, Stenographer Clerk III .....	Lincoln
Jack Gilmore, Engineer Aide 2 .....	Lincoln
LaVern J. Baron, Water Commissioner .....	Elyria
Gordon Leslie Downing, Water Commissioner .....	Bayard
Terrence M. Michalski, Water Commissioner .....	Elyria
Dorrance Schmidt, Water Commissioner .....	Bridgeport

## NEBRASKA POWER REVIEW BOARD

### Members

William H. Norton, Chairman .....	Osceola
Ed R. Crowley, Vice Chairman .....	Kearney
Sheldon A. Bernstein .....	Omaha
Larry E. Donegan .....	Lincoln
Thomas K Eason .....	North Bend

### Employees

Delbert E. Dirrim, Attorney .....	Lincoln
Robert Bruce Abernethy, Engineer in Training .....	Lincoln
Jeanne M. Bair, Clerk Secretary III .....	Lincoln
Theodore R. Hollman, Engineering Aide .....	Lincoln

### Others Employed During Biennium

Cynthia C. Moore, Stenographer Clerk III .....	Lincoln
Robert C. McIntyre, Draftsman .....	Lincoln
Kenneth Sieckmeyer, Draftsman .....	Lincoln

## FOREWORD

This publication is submitted pursuant to the provisions of Section 46-214, Reissue Revised Statutes 1943. It contains a report of the activities of the Department of Water Resources for the 1965 and 1966 water years. It also contains lists, as of September 30, 1966, of the water appropriations from streams and reservoirs, lists of public power districts, public power and irrigation districts, and reclamation districts, and other data with which the department is concerned. Included also are copies of decisions relating to rights to use water, or decisions otherwise affecting the department, which were handed down by the Nebraska Supreme Court during the biennium.

## WATER SUPPLY

The water supplies in the natural streams of the State were much above normal in 1965 and below normal in 1966. However, the above-average carry over in reservoirs and the timely occurrence of rains in 1966 resulted in crop yields exceeding those of 1965. According to records of the U. S. Weather Bureau, precipitation over the State and the watershed of the North Platte River averaged about 130 percent of normal in 1965 and 63 percent of normal in 1966. At Lincoln, 44 inches of precipitation was recorded in the first nine months of 1965. The maximum annual precipitation previously recorded there was 41 inches.

During both 1965 and 1966 there was a good supply of natural flow and storage water in the Platte River Basin, Water Division 1-A. The natural flow supply was especially good during the months of July and August for those who did not have storage available. Nineteen sixty-five, in particular, could be classified as a year with an abundant water supply, while 1966 would be classified as having a good supply. Precipitation during July and August 1966 was above normal at most all of the weather stations west of Kearney. In this area conditions were not good during the first six months of calendar year 1966 when precipitation at the following weather stations was below normal in the following amounts: at Bridgeport 1.29 inches; at Scottsbluff 4.99 inches; at Harrison 5.76 inches; at Sidney 2.96 inches; at Gothenburg 7.58 inches and at North Platte 1.61 inches. However, during the usually critical months of July and August there was above normal precipitation and the rains were well spaced and of moderate intensity. As an example of above normal precipitation during July and August 1966 the Weather Bureau reports showed above normal as follows: at Bridgeport 0.99 inches; at Scottsbluff 2.72 inches; at Harrison 2.35 inches; at Sidney 4.41 inches; at Gothenburg 2.26 inches and at North Platte 1.44 inches. At scattered places in the vicinity of these locations rather heavy rains occurred which materially enhanced the natural flow in the streams and rivers.

The run-off of the North Platte River above Pathfinder Dam was 1,297,840 acre-feet during 1965 water year, and it was 723,740 acre-feet during 1966, or 102 percent and 58 percent, respectively, of the 50-year average of 1,273,000 acre-feet, 1904 to 1953. While the run-off above Pathfinder was relatively low during 1966 the abundance of run-off the previous year left all the reservoirs on the North Platte River with a good carryover of storage for use during the 1966 irrigation season. With above normal precipitation during July and August a good supply of both storage and natural flow was available during the 1966 season.

During the months of May and June 1965 major floods occurred in the North Platte River Basin above Glendo Reservoir which more than filled Pathfinder, Glendo and Cuernsey storage appropriations and a large amount of water was retained in the Glendo Reservoir flood pool, for gradual release after the floods subsided, which prevented major damage to property along the North Platte River below Glendo in Wyoming and Nebraska. This was the first time since the completion of the Glendo Reservoir in 1957 that the flood pool space had been used to prevent downstream property damage. Peak flows at Orin, Wyoming, (Glendo inflow), were on May 14—22,500 c.f.s. and on June 14—98,000 c.f.s.

During the middle of June 1965 the largest flood of record developed on the South Platte River in Colorado, causing great damage in Colorado, with considerable lesser damage in Nebraska. Nebraska was forewarned of the impending flood so the property owners concerned had ample time to build earth dikes along the south side of the Union Pacific Railroad and around other property at critical locations south of the tracks which prevented major damage in Nebraska. Peak flows in the river were: at Julesburg, Colorado on June 20—37,000 c.f.s.; at Paxton, Nebraska on June 21—34,600 c.f.s.; at North Platte June 22—22,200 c.f.s.; at Brady on June 23—17,500 c.f.s. Much higher discharges occurred on tributaries of the South Platte in Colorado. The U. S. Geological Survey recorded peak flows of 274,000 c.f.s. in East Bijou Creek at Deer Trail, Colorado, on June 17, and 466,000 c.f.s. in Bijou Creek near Wiggins, Colorado, on June 18, 1965.

The discharge of the North Platte River below the Tri-State Dam was 198,650 acre-feet during the April-October period in 1965 and 53,500 acre-feet during the same period in 1966. This indicates the amount of usable water for irrigation or for storage in Lake C. W. McConaughy, (Kingsley Reservoir), which came out of Wyoming into Nebraska during the periods noted and it also indicates that in 1965 a considerable amount of the flood water detained in Glendo Reservoir, when released, reached Nebraska and Lake McConaughy. The flow in the North Platte River at Lewellen, just above Lake McConaughy, was 1,028,000 acre-feet in 1965, and 906,100 acre-feet in 1966. The mean annual flow at Lewellen for the period 1951-1964 is 827,000 acre-feet.

The discharge of the South Platte River at North Platte was 342,100 acre-feet in 1965, and 158,170 acre-feet in 1966. The mean annual flow for the period 1951-1960 was 159,000 acre-feet. The flow at this gauging station is materially affected by diversions at Paxton for power generation by the Platte Valley Public Power and Irrigation District. The diverted water, after passing through the North Platte power plant, is discharged back into the river just below the South Platte River gauging station at North Platte. The diversion at Paxton was 165,900 acre-feet in 1965, and 362,170 acre-feet in 1966. Since these amounts are returned to the river they are added to the discharges at the North Platte gauging station on the South Platte River which results in the amount of natural flow produced from the South Platte River at North Platte; for 1965 it was 508,000 acre-feet and for 1966 it was 420,340 acre-feet, and the mean flow for the 1951-1960 period was 347,120 acre-feet.

The discharge of the Platte River at Overton reflects the amount of water unconsumed by upstream projects and which is available for use by new downstream projects. The 1965 and 1966 discharges at Overton were

899,600 acre-feet and 1,070,000 acre-feet, respectively. The mean annual discharge for the 1951-1960 period was 700,300 acre-feet.

The Niobrara River above the Mirage Flats District diversion, located at the old town of Dunlap, usually does not produce an adequate supply of water for the District and this biennium was no exception. Below the diversion dam the river produces an excess over the requirements. The inflow to the Box Butte Reservoir determines the amount of water that is available for use on the District's land. The inflow during 1965 was 17,900 acre-feet and in 1966 it was 20,640 acre-feet. The mean annual inflow, based on the 1951-1960 period, is 22,700 acre-feet and this amount is insufficient to take care of the District's annual needs. The District is considering additional developments to improve their water supply.

In the Republican River Basin the irrigation capacities of the five major reservoirs were filled in both years of the biennium, with the exception of Hugh Butler Lake on Red Willow Creek which has yet to fill above 95 percent of the capacity at the top of the irrigation pool. Their combined capacities at irrigation pool levels is 582,000 acre-feet, including dead and inactive capacities. Total capacity at top of flood control pools is 1,345,000 acre-feet.

Precipitation during the winter of 1964-65 was deficient. The outlook in April 1965 was very discouraging, but rains started in May and moisture conditions remained unusually good from then until the end of September. From October, 1965 to May, 1966, was another period of very deficient precipitation. April precipitation in the basin averaged about 55 percent and for May it varied from three to nine percent of normal. Late June rains totaling as much as three inches at Enders and five inches at Harlan County Dam brought general relief throughout the basin.

A somewhat unusual condition prevailed in that inflows to Harlan County Reservoir were such that releases from the flood pool were necessary most of the summer after the heavy flood-producing rains on the Beaver and Sappa Creeks late in June, 1966. As a result, all of the downstream appropriators, most of whom are juniors to the Bostwick Irrigation District, enjoyed a full supply of water throughout the summer.

In the Loup River Basin the available water was more than adequate to supply the needs of all irrigators, except on Mud Creek in Custer County where it was necessary to close some junior appropriators during July and August, 1966, because of the heavy local demand. The Sherman Reservoir filled to about 95 percent of capacity during both years.

Local floods of record magnitude occurred in the basin in August, 1966. Rains of up to 10.3 inches in less than a day in an area centering around Ord, Spalding and Fullerton caused severe flooding along the Cedar River and along the Loup River from Fullerton to Columbus.

Preliminary determinations indicate peak discharges of 61,000 second-feet in the Cedar River at Fullerton and 131,000 second-feet in the Loup River at Genoa. Previous highs occurred in 1947 when 10,100 second-feet and 90,000 second-feet respectively, were recorded at the two locations. The river stage at Genoa was four feet higher than any previously recorded. Extensive property damage occurred. The river broke into the canal of the Loup River Public Power District causing severe damage to the canal and land along the canal.

## COMPARISON OF STORAGE IN RESERVOIRS

Name of Reservoir	Capacity top of Irrig. Pool Acre-feet	Maximum Storage				Carry Over Storage			
		1965		1966		Sept. 30, 1965		Sept. 30, 1966

1 Capacity to top of irrigation pool consists of 64,780 a.f. of dead and power head water and 100,000 storage for irrigation.

2 When maximum storage exceeds capacity of irrigation pool, it indicates some water is being held in flood control pool.

**ADMINISTRATION OF WATER RIGHTS**

During this biennium, as is nearly always necessary, some canals with junior appropriations which do not have storage water available were closed. For the most part the closed appropriations are relatively small and when a natural flow shortage occurs many of the owners have ground water wells available to supplement the shortage. Also, during the biennium a good supply of water for irrigation was available, therefore, we had no unusual administrative problems in the central and western parts of the State.

A dry period in May 1965 required the closing from May 10th to the 24th of a few diversions located on tributaries to the North Platte River. Also from August 15th to the 23rd it was necessary to close all appropriations with priorities junior to December 28, 1894, in the Platte River basin west of Cozad.

On the Niobrara River from above the Mirage Flats District diversion dam to the State Line, because of the District's large natural flow appropriation and insufficient surface run-off, it was necessary to close diversions in that section down to January 25, 1937 from July 16 to September 22 in 1965 and from June 3 to September 14, in 1966. This is typical of the situation which has existed each year on this section of the Niobrara River since the completion of the Mirage Flats Project, whether precipitation in that area is above or below normal. During this same period no closures have been necessary on the Niobrara River below the Mirage Flats diversion dam because this section of the river has an excess supply of river flow beyond that required for irrigation needs.

On Lodgepole Creek during 1965 it was necessary to close diversions east of Sidney down to May 2, 1894 during a dry period April 15 to June 15. There was no storage available to the closed appropriations, however, most of them have ground water wells available to supplement their natural flow deficiencies and the closures came early in the irrigation season so no material damage to crops resulted. During 1966 for a few days only, now and then during the irrigation season, it was necessary for our water commissioners to close a few diversions or regulate them downward on a cooperative basis with the irrigators without issuing official notices.

In the White River basin the usual problems with regard to closing a few diversions for senior appropriators and need for stock water were present during this biennium. The same policy regarding the stock water problem was carried out as during previous years. When our Water Commissioner received a request for stock water he would contact the upstream appropriators in an attempt to have them voluntarily close their diversions or reduce the amount being diverted enough to recreate a live stream through the pastures of those requesting stock water. This method of handling the problem has generally proved satisfactory because of the good cooperation of the upstream appropriators.

The same stock water problem existed in the Hat Creek basin during this biennium. However, about two years ago a suit was brought in the District Court of Sioux County by certain riparian owners against upstream appropriators to require the maintenance of flows for livestock water which created a conflict between the two parties. The District Court decision was appealed to the State Supreme Court and to date no final decision has

been rendered. Because of this conflict the stock water problem and the demand for water by seniors on Hat Creek, as far as we were concerned, has remained dormant during this biennium and we have not been called upon for any assistance in providing stock water nor have any demands been made for water by senior appropriators.

The pattern of closing appropriations in the Platte River basin during the season of 1966 was as follows:

On May 30, all diversions in the North Platte River Basin west of Lewellen were closed down to April 13, 1894.

On June 3, all closed diversions were opened down to October 12, 1894.

On June 5, some Blue Creek canals began using Crescent Lake storage.

On June 8, all closed canals were opened, except Paisley on Blue Creek was limited to 8 s.f.

On July 3, all restrictions were lifted and no canals remained closed or restricted.

On July 11, all diversions west of Cozad to Range 32 in the Platte and North Platte River basins and in the South Platte basin west to the Colorado-Nebraska State Line were closed down to January 23, 1895. From Lewellen west to the Wyoming-Nebraska State Line in the North Platte River Basin all diversions were closed down to May 15, 1894.

On July 23, all closed canals west of Lewellen were opened down to January 13, 1934 except those on Pumpkinseed and Blue Creeks which remained closed as previously posted.

On July 26, all closed canals on Blue Creek were opened and all closed canals east of Lewellen and on South Platte River were opened down to January 13, 1934.

On August 12, all closed diversions in the Platte River Basin were opened for the remainder of the season.

In the Loup River Basin there has always been sufficient water to supply those who have appropriations for irrigation purposes. However, there is not enough water to supply all appropriations for irrigation and power purposes, so the appropriators for irrigation whose rights are subsequent to September 15, 1932, must compensate the Loup River Public Power District when their diversions interfere with the district's power diversions. Payments by individual junior irrigators to the power districts are based on records of diversions kept by this department. Compensation to the power district for interference by the Sargent and Farwell Irrigation Districts, U. S. Bureau of Reclamation projects, is made through the replacement of power with power generated at the Federal hydro-electric plants on the Missouri River. Currently the North Loup River and the Middle Loup Public Power and Irrigation Districts are compensating by lump sum annual payments tendered prior to each irrigation season.

In the Big Blue River Basin in 1966, for the first time in several years, we were required to administer water rights because of water shortages. From about July 8 to July 25, 1966, it was necessary to close many of the

junior appropriations on the Big Blue from Seward to Crete, on Turkey Creek from Geneva to De Witt, and on the Big and Little Sandy Creeks.

The number of private pumps on the Sandys and Turkey Creek has greatly increased in recent years because of increased flows in these streams resulting from run-off from fields irrigated from wells. This type of water supply adds to the complexity of administration.

### HYDROGRAPHY

The stream gauging program in the state was carried on at essentially the same level as in the preceding biennium. The fifty-fifty matching agreement between the U. S. Geological Survey and the Department of Water Resources was continued with each party supplying \$82,500 annually in services or money. This is an increase of \$7,500 over the 1964-'65 amount which was necessary to cover salary and other cost increases.

A change in the organization of the Lincoln District of the U. S. Geological Survey occurred during 1965 when the Surface Water, Ground Water and Quality of Water Districts were combined and the entire operation was placed under a District Chief. Our cooperative agreements are now with the District Chief in place of the District Engineer of the Surface Water Division.

### LEGISLATION

The 1965 Legislature passed three bills relating to water administration. The one of greatest significance was LB-329 which repealed a bill passed in 1963 that made the water flowing in drains subject to appropriation the same as waters of the natural streams. The repeal resulted from pressure brought by people irrigating from drains, the ones whom the legislation was designed to control to provide for orderly water administration.

Legislative Bill 577 clarified existing law with respect to the exchanging of storage water and natural flow. It specifically permits the diversion of natural flow water from a stream flowing into a reservoir in exchange for a like amount of water to be released from the reservoir, thus providing for the use of storage water upstream from the structure in which it is stored. The department has long permitted such exchanges without specific statutory authority for them.

Legislative Bill 646 contained additional legislation with respect to well spacing. It provides that no irrigation or industrial well or well of any other city or village may be drilled within 1,000 feet of any municipal well; also, that no municipal well may be drilled within 1,000 feet of any irrigation or industrial well, except under a special permit granted by this department. A well must be registered to have protection under this legislation.

### LITIGATION

An application filed by the Metropolitan Utilities District of Omaha for a permit to withdraw ground water from a well field in the Platte Valley

south of the city and transport it to Omaha and vicinity was objected to by adjacent land owners and others at a hearing before the department in May 1965. The permit was granted and the decision was appealed to the State Supreme Court on the grounds that the 1963 act providing for the granting of such permits was unconstitutional, that it illegally permits the diversion of water from one watershed to another, and for other reasons. Two of the findings made by the Court in upholding the order of the department seem to be particularly significant; (1) The statute probably does not properly limit the powers of the Director of Water Resources, but no finding as to constitutionality was made because the objectors apparently were not damaged, and (2) where the taking of water beyond a watershed causes no injury to appropriators or riparian owners, no reason exists for not permitting the use of waters for a public and beneficial purpose which would be otherwise lost.

A decision in the suit *Wasserburger v. Coffee* which was appealed from the District Court of Sioux County was generally upheld by the State Supreme Court. The lower court held that downstream riparian owners are entitled to water for stock in streams in the Hat Creek Basin as against rights to use waters of the streams for irrigation purposes. It held, among other things, that the State constitution did not abrogate riparian rights which were vested prior to March 17, 1889, the date of our first appropriation law, and that the owners of such lands are entitled to injunctive relief. The high court affirmed the decision except that riparian rights vesting prior to April 4, 1895, were also held to be entitled to relief, and remanded the case to the trial court. The defendants were granted a reargument by the Supreme Court and on July 15, 1966, it handed down its final decision. The department was not a party to the suit. Until the trial court revises its decision in accordance with the Supreme Court mandate no change in administrative procedures in the Hat Creek Basin will be made by the department.

The decisions in both of the cases cited above are printed in full elsewhere in this report.

### INTERSTATE STREAMS COMPACTS

The Republican River Compact Administration, composed of the water officials of Colorado, Kansas and Nebraska, have met regularly during the biennium. Reports of the actions of the body have been published each year. The reports contain analyses of the water supply, a determination of the annual virgin water supplies and the consumptive use of basin waters in each of the signatory states.

A bill for the approval of the Upper Niobrara River Compact between Wyoming and Nebraska was passed by the U. S. Senate in August 1966. The legislation failed to get attention in the House of Representatives and it died with the adjournment of Congress. New bills for approval of the compact will be introduced in the new Congress.

The U. S. Department of Justice, after having agreed to the language in the Lower Niobrara River Compact with South Dakota at completion of negotiations, now objects to the approval of the instrument unless one section is deleted. No further action is contemplated at this time on this compact.

Negotiations continued with Kansas with respect to an interstate compact on the Big Blue and the Little Blue Rivers, but it was not possible to reach agreements so that a finished compact could be presented to the 1965 Legislatures of the two states in accordance with a previous schedule. The compact commissioners have set July 1, 1968, as the target date for completing and signing the final draft of the compact.

### NEW DEVELOPMENT

There were no new starts of project type irrigation developments during the biennium. The construction of the distribution system for lands in the Farwell Irrigation District was completed in 1965. The 1966 acreage signed up for irrigation in the Farwell district was 28,800 acres.

The distribution works of the Ainsworth Irrigation District in the Niobrara River Basin were completed late in 1965. A total of 11,000 acres were signed up for service in 1966, out of the potential 34,000 acres in the project.

Legislation to authorize the Nebraska Mid-State Project as a unit of the Missouri Basin Project again failed to pass during the 1965 or 1966 Sessions of Congress. Neither was any action taken by the Congress on the reauthorization of the North Loup Division.

The feasibility report on the O'Neill Project, a U. S. Bureau of Reclamation proposal to irrigate some 75,000 acres of land in the Niobrara River Basin, was released by the Bureau of the Budget in 1966, after the adjournment of Congress.

The petition for the formation of the Cedar Valley Reclamation District, the fifth such district, was approved by this Department in 1966. This district was formed in connection with a proposed U. S. Bureau of Reclamation project which would irrigate about 32,000 acres from the Cedar River in Boone, Greeley and Nance Counties.

### PUBLIC POWER DISTRICTS

The Nebraska Power Review Board which was established within the Department of Water Resources in 1963 moved its permanent quarters to the Farmers Mutual Insurance Company Building at 1220 J. Street in Lincoln.

During the biennium the board held 75 regular meetings and 44 hearings. It also held 56 informal conferences to secure background information, to compose differences among power suppliers and for other reasons. A total of 221 transmission line extensions and 338 service area agreements were approved. A total of 391 service area agreements have been approved by the board since its creation. All retail electric power suppliers operating in the state are now functioning under approved service area agreements. Annual reports have been issued for fiscal years 1964, 1965 and 1966 which cover the board's activities in detail.

**REPORT OF THE  
STATISTICAL SUMMARY**

The following is a summary of the statistical record for the biennium ending September 30, 1966.

Applications for water appropriations -----	485
Municipal well applications -----	27
Appropriations Canceled -----	72
Applications dismissed -----	16
Wells registered October 1, 1964 to September 30, 1966 -----	2,652
Total wells registered -----	28,336
Hearings held Re: Water appropriations -----	4
Hearings held Re: Public Power District Organization -----	6
Hearings held Re: Municipal wells -----	3
Hearings held Re: Reclamation District formation -----	1
Relocation petitions -----	7
Deeds recorded (involving 291 appropriations) -----	216
Reports of field investigations -----	78
Maps and plans -----	358
Stream measurements -----	8,483
Canal measurements -----	8,064
Stream gaging stations with recording gages -----	160
Stream gaging stations without recording gages -----	41
Canal gaging stations with recording gages -----	119
<b>Fees collected covering:</b>	
Applications for surface water, power leases, deeds, petitions and copying records -----	\$ 51,430.77
<b>Fees collected covering:</b>	
Registration of wells, spacing permits, and copying records -----	21,628.00
Total -----	73,058.77
<b>Fees collected covering:</b>	
Proceeds of assessments on electrical utilities for support of Power Review Board—July 1, 1964 to June 30, 1966. -----	132,438.00

## TOTAL NUMBER OF REGISTERED IRRIGATION WELLS

## IN THE SUPREME COURT OF NEBRASKA

## METROPOLITAN UTILITIES DISTRICT OF OMAHA, NEBRASKA

V.

MERRITT BEACH COMPANY ET AL.

N. W. 2d

36128

Filed February 25, 1966

1. *Constitutional Law: Courts.* The power to declare an act of the Legislature unconstitutional is a judicial power reserved solely to the courts.

2. *Constitutional Law.* The constitutionality of a legislative act must be raised at the earliest opportunity consistent with good pleading and orderly procedure, or it will be considered as waived.

3. *Administrative Law: Appeal and Error.* On a direct appeal from an order of an administrative agency to the Supreme Court the constitutionality of an act under which the administrative agency is proceeding may be raised for the first time in the Supreme Court, it being the first opportunity to raise such issue before a judicial tribunal.

4. *Constitutional Law.* It is a well-established rule that no one can complain that a statute is unconstitutional unless he is injuriously affected thereby, and that the courts will not set aside a law as violative of the Constitution for the reason that there is a possibility that one's interest may be injuriously affected in the future.

5. . A question of constitutionality will not be passed on if the situation is such that the rights of the complaining party would be the same whether or not the statute is held unconstitutional.

6. *Waters.* The common law rights of a riparian landowner have been modified in this state by limiting such rights to a reasonable and beneficial use upon the land he owns, especially if the exercise of such use in excess of the reasonable and beneficial use is injurious to others who have substantial rights to the water.

7. . Whether or not ground waters may be transported from one watershed to another is ordinarily a question of legislative policy.

8. *Waters: Public policy.* All public waters of the state, whether they be surface or underground waters, are a natural want by constitutional declaration. The waste of such waters as a natural resource is against public policy.

9. Whether or not a diversion of ground water beyond the watershed of its source is lawful, in the absence of a legislative declaration of public policy, is determined from a consideration of the rights of appropriators and riparian owners having substantial rights in the use of such waters.

10. *Waters.* A riparian owner's contention that he requires the whole of the flow of a stream to moisten his land by subirrigation is not sufficient to establish a reasonable use of the entire amount of the water of a stream.

11. The rule in this state as to the rights of riparian owners is that, while the owner of land is entitled to appropriate subterranean or other waters accumulating on his land, which thereby become a part of the realty, he cannot extract and appropriate them in excess of a reasonable and beneficial use upon the land he owns, unconnected with the beneficial use of the land, especially if the exercise of such use in excess of the reasonable and beneficial use is injurious to others who have substantial rights to the water.

12. *Waters: Municipal Corporations.* The use of ground water by a municipality for human needs as it relates to health, fire control, and sanitation, as provided by section 46-613, R. S. Supp., 1963, is a public use.

13. *Waters.* Where the evidence shows that the rights of appropriators and riparian owners are not damaged and the water diverted would be otherwise lost; the transportation of ground water beyond the watershed, in the absence of legislation to the contrary, does not offend the public interest or the doctrine of reasonable and beneficial use of the water resources of the state.

APPEAL FROM THE DEPARTMENT OF WATER RESOURCES.  
AFFIRMED.

Heard before WHITE, C. J., CARTER, SPENCER, BOSLAUGH, BROWER, SMITH, and McCOWN, JJ.

CARTER, J.

This is an appeal from an order of the Director of Water Resources of Nebraska authorizing the Metropolitan Utilities District of the City of Omaha to supplement its water supply in the maximum amount of 60,000,000 gallons of ground water per day from a well field located in Sections 29, 30, 31 and 32, Township 13 North, Range 13 East of the 6th P.M., and tax lots and government lots associated therewith, all located in Sarpy County on the north bank of the Platte River and an island therein. Numerous objections were filed to the grant of the application. Five objectors have appealed from the grant of the application, to wit: Bellevue Rod and Gun Club, Mr. and Mrs. Gerald Merritt, Merritt Brothers Sand and Gravel Company, Merritt Beach Company, and the County of Sarpy, who will hereafter be referred to as Gun Club, the Merritts, Merritt Sand Company, Merritt Beach, and Sarpy County, respectively. The Metropolitan Utilities District will be referred to as M. U. D.

The M. U. D. produced evidence showing that it was in the business of furnishing water to the city of Omaha and its environs. It showed that it was in need of water in the maximum amount of 60,000,000 gallons per day to provide adequate service to its customers with an estimated average use per day of 40,000,000 gallons. The proposed water wells were to be located on the north bank of the Platte River and an island adjacent thereto in Sarpy County approximately 5 miles west of the confluence of the Platte River

and the Missouri River. The water was to be pumped from a number of wells on property purchased by M. U. D., treated, and conveyed by pipeline to the service area of M. U. D. in and around the city of Omaha.

The objectors, or some of them, raise each of the following issues: (1) Section 46-639, R. S. Supp., 1963, is in violation of Article III, Section 14, and of Article I, sections 3, 16, and 21, of the Constitution of Nebraska. (2) The grant of the application amounts to an unlawful diversion of water from one watershed to another. (3) The statute fails to properly limit the legislative powers granted to the Director of Water Resources or to fix adequate standards by which the authority granted is to be administered. (4) The grant of the application to take water for industrial and commercial purposes violates the preferred rights of the objectors to use it for domestic purposes (5) The grant of the application would constitute a violation of the vested rights of riparian property owners, in that great damage will accrue by the lowering of the underground water table below the surface of their lands. After a hearing on the application and the objections filed thereto, the Director of Water Resources granted the application.

The evidence shows that the present facilities of M. U. D. for the furnishing of water to its customers are 140,000,000 gallons per day. The water is taken from the Missouri River and treated at its Florence Station. Its future need, based on projected population and customer increases, has been determined to be a maximum of 60,000,000 additional gallons per day. The studies made by engineers and hydrologists indicated that the most feasible plan was to construct a well field of approximately 35 wells on the north bank of the Platte River and the island adjacent thereto, about 5 miles west of the mouth of the river on the riparian lands heretofore described. The island is designated in the record as Cedar Island and we hereafter designate it as such. The proposal includes a treating plant on or near the well field and a pipe line to transport the treated water into the present facilities of M. U. D. The estimated cost of the project is \$15,030,000.

M. U. D. has purchased 600 acres of land in or adjacent to the Platte River upon which the well field and treating plant are to be constructed. The main current of the Platte River is south of Cedar Island. The island is separated from the north bank of the river by a chute which carries water only a part of the time. The plans show that 18 wells will be constructed on Cedar Island and the remaining wells on the north side of the river. All of the water will be pumped from the ground, a direct diversion of water from the river not being contemplated.

By expert evidence it is shown that the aquifer from which the water is to be pumped underlies some 1,200 acres of land more than a mile wide and 50 to 100 feet in depth. The Platte River flows over the south edge of the aquifer. The wells are to be located 175 feet or more from the river and will be from 50 to 65 feet in depth.

The aquifer, which includes the 600 acres of land purchased by M. U. D., has the capacity of producing 60,000,000 gallons of water per day. The evidence of the experts is that the source of the recharge of the aquifer, to replace the water pumped, will be 4,000,000 gallons per day from underground waters and 56,000,000 gallons per day from surface waters, primarily the Platte River. It is estimated that the aquifer would produce 60,000,000

gallons of water per day for 15 days after the Platte River contained no natural flow, if such an event would ever occur.

The expert testimony is to the effect that the operation of the pumps will lower the water table to its greatest depth at the location of the wells. This draw-down of the water table tapers up and away from the bottom of the wells to the point where it has no effect on the static water table. The area thus affected between the point of productivity and the upward and outward slope to nonexistence is referred to as the cone of influence. The slope of the water table thus described produces the gradient which induces the movement of water that recharges the aquifer whatever be its source, including the surface water flowing in the Platte River. It is apparent from this evidence that there will be no lowering of the static water table beyond the cone of influence created by the pumping of 60,000,000 gallons of water per day. An expert hydrologist gave it as his opinion that the cone of influence would not extend beyond 5,000 feet to the north, 2,000 feet to the south, and 2,000 feet downstream to the east. The witness failed to express an opinion as to the extent of the cone of influence upstream to the west. All of the objectors own property or property interests to the east and below the proposed facility. The west or upstream extent of the aquifer is not therefore of any concern in this case.

The natural flow of the Platte River in years past was shown by the records of the United States Geological Survey. The natural flow and the corresponding rise and fall of the surface of the river was measured regularly for a period of years at the Louisville gauging station a few miles upstream from the site of the proposed well field. The average discharge of the river from May 1953 to September 1964, an 11-year period, was 5,220 cubic feet per second of time. The lowest discharge of the river on a single day occurred on September 3, 1955, the amount being 240 cubic feet per second of time. The average of the lowest flow of water on the lowest day in each year of this period is approximately 700 cubic feet per second of time. The average of the lowest consecutive 15-day periods of flow in each of the 10 years, 1954 to 1964, is 1,438 cubic feet per second of time. The lowest average 15-consecutive-day period was 334 cubic feet per second of time, which occurred in the year 1954-1955. It is not disputed that the taking of 56,000,000 gallons of water is less than 93 cubic feet per second of time. This and other evidence indicates that the withdrawal of 60,000,000 gallons of water per day, the equivalent of 93 cubic feet per second of time, even if it all were diverted from the river, would not reduce the volume of the natural flow or the level of the river to the damage of the objectors.

Supported by this state of facts, M. U. D. made application to the Director of Water Resources for a permit as required by section 46-639, R. S. Supp., 1963, which provides: "An applicant which desires to avail itself of the provisions of sections 46-638 to 46-650 shall make application in writing to the Director of Water Resources for a permit. The application shall include (1) a statement of the amount of water for which a permit is desired together with an exhibit of maps showing the location of all wells, and (2) such other information as the director may deem necessary or desirable, and shall be accompanied by a fee in the amount of fifty dollars for the first five million gallons per day and an additional twenty dollars for each additional increment of five million gallons per day requested. The fee shall be based on the amounts of water requested on a daily average basis."

By section 46-638, R. S. Supp., 1963, the Director of Water Resources is authorized to grant and administer permits to cities, villages, or municipal corporations supplying water to cities and villages to develop ground water supplies in the area to be served by them. Other sections of the statute provide for the filing of an application for a permit, notice, the filing of objections, hearing, and review in the Supreme Court. Section 46-647, R. S. Supp., 1963, provides: "Nothing in sections 46-638 to 46-650 shall be construed as limiting any right of an owner of an estate or interest in or concerning land to recover damage for an injury done to his land or to any water rights appurtenant thereto; nor shall sections 46-638 to 46-650 limit rights of condemnation which cities, villages and municipal corporations have under the laws of the State of Nebraska." Section 46-648, R. S. Supp., 1963, provides that the use of ground water pursuant to a permit granted by the Director of Water Resources shall be governed by the provisions of section 46-613, R. S. Supp., 1963. This section provides: "Preference in the use of underground water shall be given to those using the water for domestic purposes. They shall have preference over those claiming it for any other purpose. Those using the water for agricultural purposes shall have the preference over those using the same for manufacturing or industrial purposes. As used in this section, domestic use of ground water shall mean all uses of ground water required for human needs as it relates to health, fire control, and sanitation and shall include the use of ground water for domestic livestock as related to normal farm and ranch operations."

As we have heretofore stated, the objectors asserted in their objections filed with the Director of Water Resources, in opposing the issuance of a permit to M. U. D., that the grant of the permit would violate Article III, section 14, and Article I, sections 3, 16, and 21, Constitution of Nebraska. These same contentions are advanced in this court. In addition thereto, objectors contend in this court, for the first time, that the act is unconstitutional in that it delegates legislative authority to the Director of Water Resources without properly limiting the power delegated or providing the standards by which the granted powers are to be administered under our holding in *Lincoln Dairy Co. v. Finigan*, 170 Neb. 777, 104 N. W. 2d 227. It is the contention of M. U. D. that since this was not an issue raised by objectors in the hearing before the Director of Water Resources it cannot be raised in the first instance in this court in accordance with the long-established rule of this court as stated in *Lucas v. Board of Equalization*, 165 Neb. 315, 85 N. W. 2d 638.

In this connection we point out that the power to declare an act of the Legislature unconstitutional is a judicial power reserved solely to the courts under the division of powers between the legislative, executive, and judicial branches of government set forth in the Nebraska Constitution. The Department of Water Resources is an administrative agency and, as such, has no authority to declare an act of the Legislature void because of unconstitutionality. Its function, in the performance of its delegated authority, is to give force to the presumption of constitutionality and comply with the provisions of the statute under which it is called upon to act. It would be a vain thing to require the raising of constitutional objections before a tribunal that has no authority to determine them.

It has been the practice in this court to consider constitutional questions in reviewing the order of administrative agencies when raised in this court on direct review. *City of Auburn v. Eastern Nebraska Public Power*

Dist., *ante* p. 439, 138 N. W. 2d 629. It is a general rule that the constitutionality of a legislative act must be raised at the earliest opportunity consistent with good pleading and orderly procedure, or it will be considered as waived.

This question appears to be one of first impression in this state. We think the proper rule is correctly stated in *Wendlandt v. Industrial Commission*, 256 Wis. 62, 39 N. W. 2d 854, wherein it is said: "However, the record does disclose that the unconstitutionality of the act was directly and positively asserted early and, certainly, as soon in the proceedings as it could be submitted to a judicial tribunal. The division between the power to make laws, to interpret and apply laws, and to execute laws, may not be clear. In providing for enforcement of its enactments, the legislature may clothe administrative officers with power to ascertain whether certain specified facts exist, and thereupon to act in a prescribed manner without delegating to such officers legislative or judicial power within the meaning of the constitution. (Citing authorities.) But the legislature cannot confer upon tribunals, other than courts, powers which are strictly and consistently judicial. The power to determine the constitutionality of a legislative enactment is strictly a judicial duty."

As to the time in which questions of constitutionality may be raised, it was said in *Owen v. Mutual Benefit Health & Accident Assn.*, 171 Kan. 457, 233 P. 2d 706: "A similar statement of the rule is found in 12 C. J. 785 and 11 Am. Jur. 772. Each of these general authorities cites a number of federal and state decisions. And in *Yakus v. United States*, 321 U. S. 414, 64 S. Ct. 660, 88 Law Ed. 834, the court had occasion to say (page 444): 'No procedural principle is more familiar to this Court than that a constitutional right may be forfeited in criminal as well as civil cases by the failure to make timely assertion of the right before a tribunal having jurisdiction to determine it.'" In *Cotton v. Iowa Mut. Liability Ins. Co.*, 363 Mo. 400, 251 S. W. 2d 246, the court said: "A constitutional question should be raised at the earliest practical opportunity. (Citing authorities.) See, also, *Wendlandt v. Industrial Commission*, *supra*. We conclude therefore that in an appeal from an order of an administrative agency direct to the Supreme Court, the question of constitutionality of the act, under which the administrative agency assumes its authority, can be first raised in the Supreme Court since it is the first time afforded to raise such an issue before a judicial tribunal.

It is the contention of M. U. D. that the objectors have failed to show a sufficient interest to raise the question of constitutionality. In *Peterson v. Anderson*, 100 Neb. 149, 158 N. W. 1055, this court said: "It is a well-established rule that no one can complain that a statute is unconstitutional unless he is injuriously affected thereby, and that the courts will not set aside a law as violative of the Constitution for the reason that there is a possibility that one's interest may be injuriously affected in the future." In *State ex rel. Nelson v. Butler*, 145 Neb. 638, 17 N. W. 2d 683, this court said: "It is firmly established as the universal rule that a person 'may attack the constitutionality of a statute only when and so far as it is being or is about to be applied to his disadvantage; and to raise the question he must show that the alleged unconstitutional feature of the statute injures him and so operates as to deprive him of a constitutional right, and, of course, it prerequisite that he establish in himself the claimed right which is alleged to be infringed.' 16 C. J. S., sec. 76, p. 162. We have held that, 'A party to a suit

will not ordinarily be permitted to attack the constitutionality of a statute in a case where his rights and interests are not invaded or affected by its provisions.' *State v. Brandt*, 83 Neb. 656, 120 N. W. 196."

It is the contention of objectors, or some of them, that the withdrawal of 60,000,000 gallons of water from the ground at the site of the M. U. D. well field will reduce the water table under their lands to their damage. The M. U. D. called two expert witnesses, Vincent H. Dreeszen and Paul Bolton. Dreeszen is the assistant director, conservation and survey division, University of Nebraska. He has devoted most of his time since 1947 to the problems of ground water in Nebraska. Bolton is an engineer with Henningson, Durham & Richardson, an engineering firm in Omaha. He holds a bachelor of science degree in civil engineering with a major in rivers and streams and has worked considerably in hydrologics. No contention is made that these two witnesses were not qualified as experts in the field of hydrology.

The differences in their testimony were minor. They testify to their knowledge of the area here involved and to underground water generally. They state that the operation of the pumps in the well field in withdrawing 60,000,000 gallons of water per day will lower the water table approximately 50 feet at the point of withdrawal and that the water table will rise upward and outward until it meets the static underground water level. The cone-shaped depression in the water table thus created is designated as the cone of influence. It is the testimony of the experts that there will be no lowering of the water table beyond the perimeter of the cone of influence. Both experts testify that the cone of influence will not extend more than 5,000 feet to the north and not more than 2,000 feet to a half mile to the east. The land interests of the objectors are to the east or downstream from the well field and far beyond the cone of influence, relatively speaking. It is the opinion of the experts that the underground water level under objectors' lands will in no way be directly affected by the withdrawal of 60,000,000 gallons of water per day from the ground at the site of the well field. See *Olson v. City of Wahoo*, 124 Neb. 802, 248 N. W. 304, where this precise question was determined. The objectors produced no expert evidence and consequently the testimony of Dreeszen and Bolton is not disputed in the record.

It is the evidence, however, that the Platte River passes over the south edge of the aquifer and that the source of its recharge will be about 4,000,000 gallons per day from ground waters and 56,000,000 gallons per day from surface waters largely induced from the Platte River. It is asserted by the objectors that the operation of the well field will reduce the natural flow of the Platte River by 56,000,000 gallons per day and will result in the lowering of the water level of the Platte River by that amount. This is a fact beyond any dispute. From this it is argued that as the water table under their lands is influenced by the water level of the Platte River, it will lower the water table under their lands and damage their subirrigated lands and nearby lakes which have been put to industrial and recreational uses.

There is evidence in the record which shows the tabulation of the gauging of the river at the Louisville gauging station as to the height of the surface of the river at stated times and the discharge of the river at corresponding times. From the gauging of the river and corresponding measurements of the volume of discharge over a period of time, it was established by relating one to the other that the drop in the surface of the river

by the withdrawal of 56,000,000 gallons of water would be 1.06 inches. The withdrawal of 60,000,000 gallons of water would cause a surface drop in the river of 1.08 inches. This determination is not made from any recognized formula but from information gained from the regular gauging of the height of the river and the measurement of the volume of flow at corresponding times. From these statistics, kept over a long period of time, it has been determined that the lowering of the water level in the river carrying its average flow is approximately 1.1 inches per 100 cubic feet per second of time reduction in volume. Since the 60,000,000 gallons of water per day amounts to 93 cubic feet per second, and but 56,000,000 gallons per day is the draw-down from the river, it is evident from the record that the lowering of the water level at the point adjacent to the land of these objectors by the withdrawal of 56,000,000 gallons will not exceed 1.1 inches. Under this evidence the lowering of the river level will have only a negligible effect upon objectors' underground water which they assert is controlled by the rise and fall of the Platte River. In situations whereby the right of the riparian landowner to take percolating waters which interfere with the prior appropriation rights of persons on a nearby stream, the law of this state is silent. The question has been before the courts of California and Utah. Both courts prevented the taking by ground water users to the extent that such uses interfered with the prior appropriation rights. *Tulare Irr. Dist. v. Lindsay-Strathmore Irr. Dist.*, 3 Cal. 2d 489, 45 P. 2d 972; *Silver King Consol. Mining Co. v. Sutton*, 85 Utah 297, 39 P. 2d 682. In the *Tulare* case it is said: "The further finding that each riparian requires the 'whole of the underground flow of said stream \* \* \* to moisten said land from beneath,' etc., is not sufficient under the new doctrine. The use of the entire flow of a stream, surface or underground, for subirrigation cannot be held to be a reasonable use of water in an area of such need as the Kaweah delta." If such is not the rule, every appropriation of water from a stream would be defeated by lower riparian owners having subirrigated lands because of the lowering of the water table which every diversion does to some extent. We determine therefore that the objectors have failed to show that their rights have been invaded and have such an interest as to entitle them to raise the question of constitutionality.

On the question as to whether or not the statute properly limits the powers granted to the director of water resources, and fixes adequate standards by which the authority granted is to be administered, the contentions of the objectors appearing to have great merit, a declaration of unconstitutionality at this time would leave M. U. D. in the position as before the act was passed, without any statutory limitation on its right to proceed with the construction of the facility. On this phase of the case the rights of the objectors to recover for damages to their property is not impaired. We fail to see where the declaration of unconstitutionality would benefit the objectors, the limitations proposed by the questioned act being solely a limitation upon the take of water.

In this connection, however, it is asserted in effect that the objectors are owners of land or land interests in the watershed of the Platte River and, as such, are entitled to question the right of M. U. D. to take water from the Platte River watershed outside of that watershed for its municipal purposes. We think, because of the magnitude and importance of the question, and the interest of the objectors as resident riparian landowners within the Platte River watershed, that this question must be determined. The

right of a riparian owner to raise the issue was so sustained in *Osterman v. Central Nebraska Public Power & Irr. Dist.*, 131 Neb. 356, 268 N. W. 334.

The objectors rely upon the *Osterman* case as supporting their contention that ground water cannot be transported and used outside the Platte River watershed. In considering this question we point out that in 1866 the Legislature enacted the following: "So much of the common law of England as is applicable, and not inconsistent with the constitution of the United States, with the organic law of this territory, or with any law passed or to be passed by the legislature of this territory, is adopted, and declared to be law within said territory" 2 Complete Session Laws of Nebraska, 1866-1877, p. 12. Except for the change of the word "territory" to "state", the same provision exists as in section 49-101, R. R. S. 1943. Consistent with this enactment, this court has held: "The common-law rules as to the rights and duties of riparian owners are in force in every part of the state, except as altered or modified by statutes." *Meng v. Coffee*, 67 Neb. 500, 93 N. W. 713, 108 Am. S. R. 697, 60 L. R. A. 910. At common law a riparian landowner is entitled to have the stream flow through or by his land, essentially undiminished in quantity and unimpaired in quality, and he may make whatever domestic use of the water he desires and he does not forfeit those rights by nonuser. As to ground water, a riparian landowner at common law could withdraw whatever quantity of water for any purpose he chose without regard to the possible effects on his neighbor. But in humid England, the birthplace of the common law, the problem of arid and semiarid areas did not exist, and accounts for the fact that the use of water in a stream was limited strictly to riparian lands. Since riparian lands were in the watershed of the stream they touched, transportation outside the watershed for irrigation purposes was a problem not necessary to be considered. But under the common law doctrine, a riparian landowner could withdraw all the water he wanted from below the surface of his land, for any purpose, without regard to the effect on his neighbor, and he could transport it to where he chose. In the *Osterman* case this court said: "This necessitates the further conclusion that at common law there was in general no right to transport waters beyond or over the divide or watershed that inclosed the source from which obtained."

The first irrigation laws in this state were adopted in 1877 and 1889. These acts placed no limitations upon the quantity of water that could be appropriated, save and except that it must be for a useful purpose and within the capacity of the diversion works. Laws 1877, p. 168; Laws 1889, c. 68, p. 503. In 1895 the Legislature limited for the first time the quantity of water that could be appropriated to a specific amount and protected the rights to water acquired and appropriated prior to the passage of the act. Laws 1895, c. 69 § 20, 49, pp. 249, 262. Subsequent amendments to the irrigation law have been made, the entire result being that the adjudication of water rights and the priority of appropriation of water by diversion from rivers and streams for irrigation purposes have become the settled legislative policy of this state. *Farmers Canal Co. v. Frank*, 72 Neb. 136, 100 N. W. 286. In *Enterprise Irr. Dist. v. Willis*, 135 Neb. 827, 284 N. W. 326, we said: "That the state may supervise and control the appropriation, diversion and distribution of the public waters of the state and impose that duty upon administrative officers is settled by our former decisions."

It was not, however, until 1957 that the Legislature undertook any form of regulation of ground waters. In that year the Legislature enacted three

statutes providing for the registration of irrigation wells, the spacing of such wells, and preferences in the use of ground water. Laws 1957, cc. 199, 200, 201, pp. 701, 704. In 1959 the Legislature provided for the creation of ground water conservation districts. Laws 1959, c 221, p 773. In 1961 the Legislature clarified existing statutes relating to ground water; changed the conditions for the registration of irrigation wells, for the plugging of abandoned wells, and for replacement wells; and provided for well drillers' certificates. Laws 1961, cc. 227, 230, pp. 671, 683. In 1963 the Legislature defined ground water and required that a permit be obtained to pump underground water within 50 feet of the bank of a natural stream. Laws 1963, cc. 274, 275. p. 827. In 1963 the statute presently before this court was enacted into law. It will be observed that acts of the Legislature were mere beginnings in the exercise of possible control and regulation of ground water. While the rights of appropriators to the use of water from rivers and streams have been protected over the years, rights in the use of ground water have not been determined nor protected, nor the public policy with reference to the use of such underground waters legislatively declared. The difficulties in administering dual conflicting principles, and fixing the rights of users thereunder, are readily apparent.

The Constitution of Nebraska provides that the necessity of water for domestic use and for irrigation purposes in the State of Nebraska is a natural want. Art. XV, § 4, Constitution. While this section of the Constitution has been related primarily to the diversion of water from rivers and streams, its relation to underground water is no different. Historically the state adopted the riparian right theory of the common law of England and subsequently impressed upon it the doctrine of appropriation. The rights of appropriators under the latter doctrine have been spelled out by statute and judicial interpretation while the rights of riparian landowners remain unsettled and undefined.

Underground waters, whether they be percolating waters or underground streams, are a part of the waters referred to in the Constitution as a natural want. Such waters are as much a part of the hydrologic cycle as the flow of water in a stream or river. It is true that such waters are not concentrated as in a river nor do they move with the velocity of a river, but they do percolate through underground formations and have the same source and termination as surface water flowing in a river. Underground waters are a part of the source of water supply to a growing population and an expanding economy the same as the surface waters flowing in a live stream on the surface of the ground. Because of the ever-increasing demands for water control of underground waters as well as the flow of rivers and streams, it is becoming more important and extremely necessary that regulation and control of all sources of water supply be attained. Without any declaration of public policy as to the use of underground waters other than the constitutional declaration that they are a natural want, we adhere to the rule that such waters must be reasonably used for a beneficial purpose without waste. It is axiomatic that waters which flow beyond the points of use to the sea are lost and constitute a form of waste, which is against public policy.

While it is true that riparian rights still exist in this state and they remain unsettled and ill-defined, such rights have been limited by the rules of reasonable use and public interest. Where the reasonable use of the riparian landowner is not impaired, the public interest demands that such waters be applied to a needed public purpose rather than be lost by proceeding

unmolested to the sea. The use of ground water by the inhabitants of a city for the purpose of health, convenience, and comfort is a public use of such water. *Olson v. City of Wahoo, supra.*

The common law rights of riparian owners have been modified in this state by what is known as the American doctrine. This doctrine has been defined as follows: "The American, as distinguished from the English rule, is that, while the owner of the land is entitled to appropriate subterranean or other waters accumulating on his land, which thereby becomes a part of the realty, he cannot extract and appropriate them in excess of a reasonable and beneficial use upon the land he owns, unconnected with the beneficial use of the land, especially if the exercise of such use in excess of the reasonable and beneficial use is injurious to others, who have substantial right to the water." *Silver King Consol. Mining Co. v. Sutton, supra.* Under the foregoing theory we conclude that where the taking of water beyond a watershed causes no injury to appropriators or riparian owners, no reason exists for not permitting the use of waters for a public and beneficial purpose which would be otherwise lost. It is argued that the Osterman case, by analogy, sustains a contrary holding. We do not think that this is so. That case involved a diversion of the natural flow of the Platte River into the watersheds of the Republican and Blue Rivers. The taking of the water there involved would damage the rights of lower appropriators on a river already over-appropriated. In the instant case, M. U. D. is a riparian landowner. No water is taken directly from the river. There are no appropriators or riparian owners who are injured by the taking between the well field and the mouth of the Platte River some 5 miles east. In any event, the Osterman case was decided on a statute first enacted in 1889 which prohibited transportation of water beyond the watershed. There is authority that one not damaged cannot raise the question of a diversion of ground water beyond the watershed. But we choose to decide the question on the ground of reasonable use and all the factors that enter into such a consideration, including the reasonableness of a watershed diversion, thus preserving the right of the Legislature, unimpaired, to determine the policy of the state as to underground waters and the rights of persons in their use. Under the record in this case and the applications of the declared law in this case, we can find no basis for holding the diversion from the well field to be unlawful. Under the evidence in this case the transwatershed diversion was reasonable, for a public purpose, beneficial, not against public policy, and in the public interest.

The presumption of constitutionality prevails under the record in this case. Under the evidence a finding that appropriators and riparian landowners will sustain no damage by the withdrawal of 60,000,000 gallons of underground waters at the site of the well field is sustained by the record. The evidence also supports the finding of the Director of Water Resources that, under the circumstances shown, the withdrawal of such water is in the public interest. The objectors failed to show any damage resulting from the pumping of the water from the well field in the quantity applied for, their evidence resting solely upon surmise and speculation. Under these circumstances and the law as we have found it to be, the order of the Director of Water Resources granting the application must be sustained.

AFFIRMED.

SPENCER, J., dissenting.

There are several reasons why I cannot agree with the majority opinion. In my judgment, the act in question is clearly unconstitutional. Legislative power is vested in the director. Section 46-642, R. S. Supp., 1963, authorizes the director to grant permits without limitation. Nowhere in the act is there any criteria given to control the rulings or actions of the director.

I do not agree that the appellants have not shown a sufficient present interest to raise the issue of constitutionality. The assistant director of the conservation and survey division of the University of Nebraska, who testified for appellee, stated that in his judgment the appellants would not be affected by the appropriation. He did admit, however, that there would be an effect on the surface water that flowed down the stream, and the testimony of appellants is to the effect that the level of their lakes is dependent upon the level of the river. The majority opinion fixes this lowering of the level of the river at not to exceed 1.1 inches. If this were true, the effect would be minimal.

There is evidence in the record that the operation of the well on Cedar Island, which was one of the four test wells put down by the appellee, lowered the level of a lake located midway between the M. U. D. site and the Merritt property 4 feet while it was in operation. Appellee's evidence would also indicate that in periods of low flow, the appropriation might be more than one-third of the flow of the river. The testimony of its expert was that 60 million gallons a day represented 38.7 percent of the lowest recorded flow. On the present record, I feel that appellants have a sufficient interest to raise the question of the constitutionality of the statute.

I also observe that the expert referred to above testified that although his opinion was that the appellants would not be affected, he could only be sure that this would be true by a period of observation after the M. U. D. wells became operative. It is apparent from the record that in determining the adequacy of the aquifer, M. U. D. was interested solely in the adequacy of the water for its own purpose and was not concerned with the effect on lower riparians.

Section 46-635, R. S. Supp., 1963, defines ground water as follows: "Ground water is that water which occurs or moves, seeps, filters, or percolates through the ground under the surface of the lands."

By its expressed mandate, the act is applicable only to ground water. It would appear to me that we ignore the obvious when we describe the water involved herein as ground water and say no water is taken directly from the river. The testimony is undisputed that the waters of the Platte River are to be induced to move toward the appellee's well field under artificial gradient. Surface water does not become ground water by an act of an appropriator. As is well said in *Ill Farnham, Waters and Water Rights*, § 940, p. 2722: "The fact that the source of a running stream is percolating water does not take the stream itself out of the rules applicable to other running water. And, therefore, the water cannot be diverted from its course. And what cannot be done directly cannot be done indirectly; so that, after the water has reached the stream, it cannot be diverted by sinking wells so close to the stream that the water is drawn from it by percolations." The aquifer as such does not have the storage capacity to furnish 60 million gallons of water a day. Fifty-six million gallons of water a day will come from the

Platte River, and the balance of 4 million from the aquifer. Further, the testimony is undisputed that the surface flow of the river lies directly on the underground aquifer. Eighteen of appellee's 35 wells are to be placed on an island in the river. The most that can be said is that we are dealing here with the subflow of the Platte River which, from all the law I have found, should be treated as the river itself rather than as percolating or ground water.

I find some difficulty in understanding why the principles enunciated in *Osterman v. Central Nebraska Public Power & Irr. Dist.*, 131 Neb. 356, 268 N. W. 334, are not applicable in this case. We are dealing substantially with surface water and riparians. In my judgment, the distinction drawn by the majority opinion is a distinction without a difference.

There is an inference in the opinion that even if the act were unconstitutional, appellee could still divert the water. There is no merit to the inference. As I view the law, in the absence of statute such act would amount to an unlawful diversion of waters from one watershed to another. I disagree with the statement in the opinion, without the citation of authority, that at common law a riparian in a like situation could transport the water wherever he chose. He could not do so if his well was so close to a stream or lake that he lowered the level of that body by doing so. See *Grand Junction Canal Co. v. Shugar*, 6 Chancery Appeals 483, in which Lord Hatherley stated the rule as follows: "Although a landowner will not in general be restrained from drawing off the subterranean waters in the adjoining land, yet he will be restrained if, in so doing, he draws off the water flowing in a defined surface channel through the adjoining land."

To the same effect, see *Aetna Mills v. Brookline*, 127 Mass. 69, one of the early American cases on percolating waters, which follows the English rule. This was the law applicable at the time the Legislature in 1866 adopted the act referred to in the majority opinion.

I am in full accord with the doctrine of reasonable use. So vital a resource as water should not be permitted to go to waste. In our present society, reasonable use for a beneficial purpose without waste is a necessity. I only insist that the law be observed and the rights of all parties involved be protected. In my view, neither the Legislature nor the courts have the power to abolish rights of riparian proprietors which have become vested, except as such rights be taken or impaired for a public use in an exercise of the powers of eminent domain for which compensation must be made for the injuries sustained. See *Crawford Co. v. Hathaway*, 60 Neb. 754, 84 N. W. 271.

SUPREME COURT OF NEBRASKA  
GEORGE WASSERBURGER ET AL.,

V.

BILL B. COFFEE ET AL.

141 N. W. 2d 738

36049

Filed April 15, 1966

1. *Waters.* The common law fixes the reciprocal rights and duties of riparian proprietors, except as it has been modified by Constitution or statute.

2. . A right to the use of waters under the doctrine of prior appropriation is superior to a competitive riparian right in land which was part of the public domain prior to April 4, 1895, the effective date of the irrigation act of 1895.

3. *Constitutional Law: Waters.* Riparian water rights were not abolished by Article XV, sections 4 to 6, Constitution of Nebraska.

4. *Waters.* At common law riparian land consists of a continuous parcel on a watercourse or lake and in one possession.

5. . In respect to competing water claims by an appropriator and by a riparian proprietor, land is considered riparian if by common law standards it was such immediately prior to April 4, 1895, and if it has not since lost its riparian status by severance.

6. . An appropriator of water in a watercourse who, in using water pursuant to a statutory permit, intentionally causes substantial harm to a riparian proprietor, through invasion of the proprietors riparian interest in the use of the waters, is liable to the proprietor in an action for damages if, but only if, the harmful use is unreasonable in respect to the riparian proprietor.

7. . An appropriator's use of water is unreasonable with respect to a competing riparian right unless the utility of the use outweighs the gravity of the harm.

8. . In evaluation of the utility of the appropriation causing intentional harm to the riparian proprietor, the following factors are to be considered: (1) The social value which the law attaches to the use for which the appropriation is made; (2) the priority date of the appropriation; and (3) the impracticability of preventing or avoiding the harm.

9. . In evaluation of the gravity of intentional harm to the riparian proprietor through the appropriator's use of the water, the following factors are important: (1) The extent of the harm involved; (2) the social value which the law attaches to the riparian use; (3) the time of

initiation of the riparian use; (4) the suitability of the riparian use to the watercourse; and (5) the burden on the riparian proprietor of avoiding the harm.

10. *Injunction.* The appropriateness of injunction against tort depends upon a comparative appraisal of all factors in the case, some of the primary factors being the following: (1) The character of the interest to be protected; (2) the public interest; (3) the relative adequacy to the plaintiff of the injunction and of other remedies; and (b) the relative hardship likely to result to defendant if injunction is granted and to plaintiff if it is denied.

Appeal from the district court for Sioux County: ALBERT W. CRITES, Judge. Affirmed in part, and in part reversed and remanded.

Heard before WHITE, C. J., CARTER, SPENCER, BOSLAUGH, BROWER, SMITH, and McCOWN, JJ.

SMITH, J.

Riparian owners complained that they no longer could water cattle in creeks running through their lands, because upper irrigators were exhausting the streams by diversions pursuant to appropriation permits from the State of Nebraska. The district court found that the owners were entitled to use the streams for watering the number of cattle normally pastured on those parcels which were riparian but not on larger contiguous parcels in the same ownership, and the court accordingly enjoined the appropriators.

The hydra of perplexity in this case emerged from the dual administration of water resources under the doctrines of riparian rights and of prior appropriation. Although each method of administration contains internal controls, the law governing a dispute between riparian proprietor and appropriator is vague at best. The two methods are incompatible, and the disorder multiplies problems.

The issues are broad. Defendant appropriators deny that plaintiff landowners, including plaintiffs in intervention, possess a riparian water right. Going further and hypothesizing not only the right but also a wrongful interference with it, defendants take the position that plaintiffs should be left to an action for damages. Injunction is said to be an inappropriate remedy for the wrong to a riparian proprietor, and especially so where equities weigh against him.

On cross-appeal plaintiffs contend that the injunction stopped short of complete relief. According to them, all parcels contiguous to riparian land in the same ownership are also riparian; and livestock water is a use which defendants must respect under the terms of their permits.

The lands are located in Hat Creek watershed in Sioux County, Nebr. Hat Creek flows generally north some degrees east across the county and into the State of South Dakota. A tributary, Sowbelly Creek, crosses a continuous tract of 3,320 acres owned by plaintiffs, Gertrude and Merrill Quintard. North of the confluence of the two creeks and within 8 miles of the Nebraska-South Dakota boundary, Hat Creek flows through the following four tracts, each of which is shown on exhibit 1-A to be continuous:

Plaintiff Owners	Number of Acres
George and Beatrice Wasserburger	3,440
Ray and Patricia Semroska	2,920
John and Lois Geiser	1,680
John and Helen Engebretsen	1,760

Defendants own more than 41,000 acres of land within the watershed, and they possess statutory permits to appropriate water from Hat Creek and its tributaries for purposes of irrigation and irrigation storage. The points of diversion are located upstream from plaintiff's lands.

The major subjects of discussion are:

- A. Statutory Abrogation of the Riparian Water Right.
- B. The riparian water right in view of constitutional amendments.
- C. Restrictions on quantity of riparian land.
- D. Comparative reasonableness of uses by riparian proprietor and by appropriator.
- E. Appropriateness of injunction.

#### A. Statutory Abrogation of th Riparian Water Right.

The common law fixes the rights and duties of riparian proprietors, except as it has been modified by Constitution or statute. See, § 49-101, R. S. 1943; *Meng v. Coffee*, 67 Neb. 500, 93 N. W. 713, 108 Am. S. R. 697, 60 L. R. A. 910. All agree that the common law has been modified by legislative adoption of the prior appropriation doctrine, but the parties differ on the time of the change. Defendants cite the irrigation act of 1889, which was effective March 27, 1889. Plaintiffs rely on the irrigation act of 1895, which was effective April 4, 1895. See, Laws 1889, c. 68 p. 503; Laws 1895, c. 69, p. 244.

The time of modification delimits the land which can validate the common law use by plaintiffs against the statutory use by defendants. If a severance of land from the public domain occurred earlier than enactment of the statute, a riparian water right in the private land may be superior to an appropriative right; but if legislation preceded severance, the appropriative right outranks the riparian right under the facts of the present case.

Some parcels in the five tracts of plaintiffs were patented between 1890 and March 27, 1895, and receiver's receipts show that a few of these patents had been initiated by entries filed prior to March 27, 1889. All other patents were initiated after April 4, 1895. The district court selected the 1889 cutoff.

Nothing in the act of 1889 specifically dedicated to the people the use of waters in watercourses, but the law authorized appropriation for application to beneficial use. It announced that: "As between the appropriators the one first in time is first in right." It established no permit system, but public notice was made a prerequisite to future appropriative rights. See Laws 1889, c. 68, p. 503. Two sections provided as follows:

"The right of the use of \* \* \* water, flowing in a \* \* \* stream \* \* \* may be acquired by appropriation by any person \* \* \* ; Provided,

That in all streams not more than fifty feet in width, the rights of the riparian proprietors are not affected by \* \* \* this act." Art. 1, s 1, p. 503. (This proviso was amended in 1893 to apply to streams not more than 20 ft. wide. Laws 1893, c. 40, § 1, p. 377.)

"All persons \* \* \* owning or claiming any lands situated on the banks or in the vicinity of any stream are entitled to the use of the waters of such stream for the purpose of irrigating the land so held or claimed." Art. 2, § 1, p. 506.

The irrigation act of 1895 inaugurated the present system of appropriation. The Legislature then dedicated the use of unappropriated waters of every stream to the people subject to appropriation for beneficial use, and it declared water for purposes of irrigation to be a natural want. It specified that priority in time gave the better right as between those using the water for the same purpose, and it preferred domestic use over other uses in cases of insufficient water. See Laws 1895, c. 69 § 42, 43, 65, pp. 260, 268.

Our decisions have fostered both sides of the argument. There is authority that the 1889 act substituted the doctrine of prior appropriation for the common law. See, *Crawford Co. v. Hathaway*, on rehearing, 67 Neb. 325, 93 N. W. 781, 108 Am. S. R. 647, 60 L. R. A. 889; *Osterman v. Central Nebr. Public Power & Irr. Dist.*, 131 Neb. 356, 268 N. W. 334 (by implication). Other cases have approved the 1895 cutoff on the theory that the Legislature then for the first time dedicated the use of Natural streams to the people. See, *Nine Mile Irr. Dist. v. State*, 118 Neb. 522, 225 N. W. 679; *Southern Nebraska Power Co. v. Taylor*, 109 Neb. 683, 192 N. W. 317.

The history of irrigation legislation in the western states is checkered, but it suggests that prior to 1895 our Legislature intended only to chip away at the common law right. The 1889 law was taken substantially from a California act which provided that "the rights of riparian proprietors are not affected by the provisions of this title." However, our Legislature left out this section. *Clark v. Cambridge & Arapahoe Irr. & Imp. Co.*, 45 Neb. 798, 64 N. W. 239. In California, riparian rights which had been acquired subsequent to the passage of the act were preserved against appropriations made after the acquisition. See *Lux v. Haggin*, 69 Cal. 255, 10 P. 674. The following explanation appears in 1 *Wiel, Water Rights in Western States* (3d ed.):

"In so far as Nebraska upholds the abrogation of the common law by State statute for future patents, it is contrary to *Lux v. Haggin*. The California court placed its decision to a great extent on the ground that abrogating the rule of riparian rights would interfere with the primary disposal of the Federal lands, an interference not depending upon the date of a statute, and equally an interference if only abrogating for future patented land. \* \* \* As the decision in *Lux v. Haggin* was rested largely on constitutional grounds, a strict adherence to the California doctrine does not recognize any power in the legislature to abrogate riparian rights present or future." § 126, pp 155-156.

"\* \* \* the very earliest statutes of several of these states contained a provision that all landowners on the banks of a stream have a right to the use of the water. This was probably intended as declaratory of riparian rights, to the same end as the California provision, 'The rights of riparian proprietors are not affected by the provisions of this title.' Such a statute

existed in other States, where it is construed as only declaratory of riparian rights, and is held to force the court to follow the California doctrine." § 185, pp. 224-225.

The 1889 act, with its provisions at cross-purposes, is so unclear that any interpretation may be unsatisfactory, but we reach two conclusions. The references to riparian rights were declaratory of the common law, and the other provisions failed to substitute the prior appropriation doctrine. In respect to parcels which were severed from the public domain prior to April 4, 1895, plaintiffs may possess a superior right. Decisions in conflict are overruled on this point.

#### B. The Riparian Water Right in View of Constitutional Amendments.

In 1920 the doctrine of prior appropriation received constitutional protection with the adoption of Article XV, sections 4 to 6, Constitution of Nebraska. These sections, which incorporate part of the irrigation act of 1895, provide as follows:

"The necessity of water for domestic use and for irrigation purposes \* \* \* is hereby declared to be a natural want.

"The use of the water of every natural stream \* \* \* is hereby dedicated to the people \* \* \* for beneficial purposes, subject to the provisions of the following section.

"The right to divert unappropriated waters of every natural stream for beneficial use shall never be denied except when such denial is demanded by the public interest. Priority of appropriation shall give the better right as between those using the water for the same purpose, but when the waters of any natural stream are not sufficient for the use of all those desiring to use the same, those using the waters for domestic purposes shall have preference over those claiming it for any other purpose \* \* \*. Provided, no inferior right to the use of the waters of this state shall be acquired by a superior right without just compensation therefor to the inferior user."

No amendment abolished riparian water rights. The prohibition against acquisition of a superior right without just compensation indicates that existing riparian rights were to be preserved. Another sign dispels any doubt. In the Constitutional Convention a member of the committee which proposed the amendment explained, " \* \* \* the question of riparian rights \* \* \* is not particularly affected \* \* \*, except as custom is fast doing away with that right, \* \* \* ." Proceedings of the Constitutional Convention (1919-1920) p. 1916.

#### C. Restrictions on Quantity of Riparian Land.

To say that the 1889 act permitted future acquisition of riparian rights is not to say that all lands patented prior to the 1895 act are riparian for present purposes. Guidelines are needed.

Area restrictions vary from jurisdiction to jurisdiction, but it is generally understood that riparian land has at least two characteristics—a stream or lake bed and a present unitary possession. The parcel must include a part of the bed of a watercourse or lake, and the possession must be unitary in

the sense that no part of the parcel is separated from the rest by intervening land in another possession. See, *Krimlofski v. Matters*, 174, Neb. 774, 119 N. W. 2d 501; Restatement, Torts, § 843, p. 326.

Plaintiffs argue that since the common law knows no limitation on the distance which a tract may extend away from a stream without loss of riparian status, all parts of their five tracts are riparian. Defendants take a different view. The size cannot exceed the area acquired by a single entry or purchase from the federal government; and it may be further reduced to a government subdivision of 40 acres or, in case of irregular tracts, a numbered lot designated in the government survey, even though additional land is included in the certificate of purchase or instrument of conveyance. The district court apparently restricted quantity to a government subdivision of 160 acres.

Some recognized tests appear in 1 *Kinney, Irrigation and Water Rights* (2d ed.), § 464, p. 789, as follows:

"First, the smallest separate piece or parcel of land bordering upon the stream in the history of the title of all of the land of the riparian owner at the time that the claim is made or at the time of use; second, the riparian land stops at the outermost edge of the land away from the stream as described by a single original entry of the land in the acquisition of title from the Government; and, third, \* \* \* the riparian lands held in common ownership include the entire tract, no matter how acquired or from what sources of title, at the time the claim is made."

*Crawford Co. v. Hathaway*, on rehearing, 67 Neb. 325, 93 N. W. 781, 108 Am. S. R. 647, 60 L. R. A. 889, approved the restriction to a single original entry or purchase of land in the acquisition of title from the United States, but the court reached no conclusion concerning further restriction to a government subdivision. The two tests have not been accepted in a majority of jurisdictions applying exclusively the common law of riparian rights. "The area or size of the parcel is immaterial insofar as its character as riparian land is concerned." Restatement, Torts, s 843, Comment c, p. 327. Between riparian proprietors restrictions to original entries or to government subdivisions are clearly arbitrary, and we disapprove them.

These tests, arbitrary in contests between riparian proprietors, are likewise unsuitable here, because they ignore the historical development of the two doctrines in Nebraska. By the same token, if the common law is not modified in order to resolve the competing claims in suit, legislative abrogation of future riparian rights to water use will lose vitality.

In such cases land has a riparian status only if two requirements are met. First, by common law standards the land was riparian immediately prior to the effective date of the irrigation act of 1895. Second, the land subsequently has not lost its riparian status by severance; consequently it ordinarily is a part of the smallest tract held in one chain of title leading from the owner on April 4, 1895, to the present owner. If a tract was riparian on April 3, 1895, its status was unaffected by the statutes. However, if the tract, or part of it, later lost its riparian status as a result of severance, the nonriparian land cannot regain the riparian status.

All parcels patented prior to April 4, 1895, and located in the five tracts, satisfy the test of present unitary possession, but the history of the titles is

incomplete. Little has been established beyond patent and present ownership. In view of the unsettled law the cause should be remanded in order that the parties may adduce additional evidence.

#### D. Comparative Reasonableness of Uses by Riparian Proprietor and by Appropriator.

An incompatibility of riparian rights and appropriative rights is undoubtable. The common law test of reasonable use places little emphasis upon the time when the use was initiated. See, *Restatement, Torts*, c. 41, topic 3, scope note, pp. 344-346; 1 *Wiel, Water Rights in Western States* (3d ed.) § 801, p. 857. Under the appropriation doctrine, priority in time gives the better right between users for the same purpose. The flexibility of the one test opposes the rigidity of the other.

We cannot synthesize the two doctrines in one decision. Facts are so important that in the absence of legislation a viable system ought to be evolved by the process of inclusion and exclusion, case by case. Here the conflicting claims are claims of private right to uses for purposes of livestock water and of irrigation. We limit our broad outline of a system to the specific facts before us.

An appropriator who, in using water pursuant to a statutory permit, intentionally causes substantial harm to a riparian proprietor, through invasion of the proprietor's interest in the use of the waters, is liable to the proprietor in an action for damages if, but only if, the harmful appropriation is unreasonable in respect to the proprietor. The appropriation is unreasonable unless its utility outweighs the gravity of the harm. Compare *Restatement, Torts*, § 851, 852, pp. 353, 358.

In evaluation of the utility of the appropriation causing intentional harm to a riparian proprietor, the following factors are to be considered: (1) the social value which the law attaches to the use for which the appropriation is made; (2) the priority date of the appropriation; and (3) the impracticability of preventing or avoiding the harm. Compare *Restatement, Torts*, § 853, p. 361.

In evaluation of the gravity of intentional harm to a riparian proprietor through the appropriator's use of the waters, the following factors are important: (1) The extent of harm involved; (2) the social value which the law attaches to the riparian use; (3) the time of initiation of the riparian use; (4) the suitability of the riparian use to the watercourse; and (5) the burden on the riparian proprietor of avoiding the harm. Compare *Restatement, Torts*, § 854, p. 369.

Since settlement the five tracts have been used for grazing, and for a long time plaintiffs have been using them mostly for winter pasture from October 15 to May 15. There is evidence that for an animal unit—cow and calf—plaintiffs require 15 acres of winter pasture and 35 acres of pasture all year. The cattle consume only a small portion of the stream flow.

With few exceptions Hat Creek and Sowbelly Creek supplied sufficient livestock water during the winter grazing seasons prior to 1959. Some shortages were met by one or more appropriators turning down water upon re-

quest. For many years the creeks have been dry in the summertime, but the principal complaint is the winter deficiency, although two plaintiffs have been holding cattle on summer pasture

Since 1958 defendants have been interfering with plaintiffs' use. During the 1959-1960 winter the creeks flowed intermittently. The diminution was caused in substantial part by defendants. The permits, bearing adjudicated priority dates as early as 1880 and as late as 1961, indicated that after 1951 defendants increased their appropriations out of Hat Creek and its tributaries approximately 11 cubic feet per second for irrigation of more than 800 additional acres. In the winters following 1959-1960 the flow of Hat Creek through the southernmost tract of plaintiffs stated at the end of the calendar year.

No other source has been reasonably available to plaintiffs. They tried to use well water, but it was alkaline. It is impracticable for them to impound water. There is no site suitable for a storage dam, and the cost of a dam strong enough to withstand floodwaters would be excessive.

Defendants point to needs of their own. They and their predecessors developed extensive facilities consisting of diversion and storage dams, pipelines, and irrigation canals and laterals. Their capital expenditures in the last 20 years exceeded \$250,000. They possess not less than 3,500 acres of irrigated hay land producing annual cuttings of 4,350 to 6,200 ton. They graze more than 5,000 head of cattle in the wintertime on their lands within the watershed. If they are unable to irrigate their hay meadows, they will be compelled to reduce the size of their herds at least one-half. The quantity of water available to defendants for appropriation under the judgment of the district court was not estimated.

Causes of action for damages have been established. With few exceptions the amount of water was adequate until 1959, and deterioration resulted substantially from increased abstractions of water by defendants. In contrast water for the number of cattle on riparian pasture in accordance with good husbandry represents neither a new use nor an enlarged use.

Defendants contend that a riparian right is subject to an appropriative right prior in time. Some of their permits bear adjudicated dates prior to severance of any parcel in the five tracts from the public domain. Under the 1895 statute the board of irrigation fixed the priority dates of appropriators who had acquired rights earlier than the effective date of the statute. The board determined appropriative priorities but not riparian rights. Compare *Plunkett v. Parsons*, 143 Neb. 535, 10 N. W. 2d 469. The adjudication established the time when the appropriations had been initiated, but time is only one of the elements to be considered in the adjustment of the competing rights.

On the facts of this case the riparian right is superior. Plaintiffs' need for livestock water is greater than defendants' need for irrigation, and the difference is not neutralized by time priorities. For the most part the land within the watershed is pasture. Irrigation has increased the grazing capacity of defendants' pastures; loss of irrigation would not destroy them. Between plaintiffs and defendants approximate equality of grazing capacity is more desirable than glaring inequality.

### E. Appropriateness of Injunction.

The argument that equity refuses to enjoin the appropriator from wrongful interference with the riparian use comes from prior decisions in injunction suits involving competing uses by the riparian proprietor and by the appropriator. The appropriator prevailed, whichever party sought judicial protection. See, *Cline v. Stock*, on rehearing, 71 Neb. 79, 102 N. W. 285; *McCook Irri. & W. P. Co. v. Crews*, on rehearing, 70 Neb. 115, 102 N. W. 249; *Clark v. Cambridge & Arapahoe Irr. & Imp. Co.*, 45 Neb. 798 64 N. W. 239.

We think the cases have been misread. The appropriative rights seem to have been asserted by irrigation companies offering a public service. The court attached significance to the public benefit, to the appropriation project completed in good faith and at great cost, and to the tardy initiation of the riparian use. If the court went too far, the limitations themselves have remained. We reject the startling proposition that equity sends every riparian proprietor packing. Defendants are private appropriators—not champions of the public interest. Compare, *Vetter v. Broadhurst*, 100 Neb. 356, 160 N. W. 109, 9 A. L. R. 578; *Onstott v. Airdale Ranch & Cattle Co.*, 129 Neb. 54, 260 N. W. 556. The remedy rests on other considerations.

The appropriateness of injunction against tort depends upon a comparative appraisal of all factors in a case, some of the primary factors being the following: (1) The character of the interest to be protected; (2) The public interest; (3) The relative adequacy to the plaintiff of injunction and of other remedies; and (4) The relative hardship likely to result to defendant if injunction is granted and to plaintiff if it is denied. See, *McCubbin v. Village of Gretna*, 174 Neb. 139, 116 N. W. 2d 287; *Restatement, Torts*, § 936, p. 693.

The public interest in the maximum conservation and utilization of water resources exerts a powerful influence upon the propriety of the remedy. The injunction before us speaks of a constant flow for watering cattle. From conflicting evidence we conclude that loss of water in transit is not substantial; but another loss, the flow of unused water, may not be so justified

If we had a judgment which went no further than to protect waste at the expense of beneficial use, the result would be clear. But the supposition is not the present case. If defendants may exhaust the flow, the riparian tracts will be of little use for pasture. The parties stand at two extremes, and there is no middle ground.

We regret our inability to find a middle ground, a "physical solution," under the broad powers of equity to ration water and to condition an order of injunction. See *Rancho Santa Margarita v. Vail*, 11 Cal. 2d 501, 81 P. 2d 533. The evidence negates a satisfactory alternative method of supply. The cattle found well water barely drinkable, and stream water cannot be impounded at reasonable cost. Under all the circumstances plaintiffs are entitled to injunctive relief in connection with those lands which the evidence on remand establishes to be riparian.

The district court measured relief in terms of constant flow in sufficient quantity for the watering of livestock in the numbers normally pastured on the riparian land. The court safeguarded normal operations consistent with

good husbandry, but it impliedly disapproved any surcharge on riparian pasture. Plaintiffs say that this yardstick is inaccurate, that water for all of their cattle is a domestic use protected by certain limitations on defendant's permits.

Some of the permits require the permittee to respect riparian rights to so much of the natural flow as is necessary for domestic use, including livestock water. Similar language has limited all other approvals of applications for natural flow since the first appropriation was adjudicated in 1895, but the limitations are unexplained in the records of the Department of Water Resources.

The district court correlated these administrative restrictions with the injunction. We agree that defendants should be enjoined from interfering with the use of livestock water for the number of cattle held on riparian pasture in accordance with good husbandry, but we do so without approving any interpretation of the permits or defining domestic use under the Constitution and the common law.

As to the rest of the cattle plaintiffs' contention has two dimensions. First, the permits protect the water use on nonriparian pasture. Second, a surcharge on riparian pasture is immaterial. The argument lacks strength under the test of reasonableness in the dual administration of water resources. It gains none from the limitations on the permits.

We have not referred to a separate 160-acre tract owned by plaintiffs Geiser or to any lands owned by plaintiff S. C. Turnbull, all being shown on exhibit 1-A. The district court correctly denied injunctive relief in respect to these parcels.

The judgment is affirmed in part and reversed in part, and the cause is remanded for proceedings consistent with this opinion. Costs on appeal are taxed to appellants.

**AFFIRMED IN PART, AND IN PART  
REVERSED AND REMANDED.**

Wasserburger

v.

Coffee

## APPEAL FROM A DISTRICT ON REHEARING

Appeal from the district court for Sioux County: Albert W. Crites, Judge. On Rehearing. See *ante* p. 149, 141 N. W. 2d 738, for original opinion. Original opinion adhered to as modified.

Heard before WHITE, C. J., CARTER, SPENCER, BOSLAUGH, BROWER, SMITH, AND McCOWN, JJ.

McCown, J.

On rehearing, we adhere to our original opinion except for its application to the lands of S. C. Turnbull.

The judgment of the district court contained a specific finding and description of all lands as to which receiver's entry receipts were dated prior to March 27, 1889. It did not include any land of S. C. Turnbull. The memorandum opinion found that as to the remainder of the lands of plaintiffs not described, dates of entry are either missing or subsequent to March 27, 1889. The findings in the memorandum opinion, however, were specifically based on exhibit 13 and that exhibit shows a receiver's receipt for the east half of the northwest quarter and the east half of the southwest quarter of Section 22, Township 35 North, Range 54 West, dated 2-7-89. This was one of the tracts owned by Turnbull, and obviously was prior to March 27, 1889.

The judgment does not state any reason for excluding this Turnbull land other than that it was not severed from the public domain prior to March 27, 1889. However, Turnbull did not testify. There was no specific evidence as to the number of his livestock, nor the extent of his particular right to an injunction, although there is nothing to indicate that his lands were different than the others. Our original opinion also determines the critical effective date for the severance from the public domain to be April 4, 1895, rather than March 27, 1889, and Turnbull, as well as other plaintiffs, is affected by this change in date. It is impossible to determine from the record whether or not the omission of this Turnbull land from the judgment was an oversight.

In view of the circumstances, the nature of the action, and the interrelationship of the rights of the several plaintiffs, that part of our original opinion holding that the district court correctly denied injunctive relief as to all lands owned by S. C. Turnbull is withdrawn. As to his lands, the cause is remanded with authority to amplify the findings of the original judgment if the omission of the description of the one Turnbull tract was correct and deliberate; or otherwise, for further proceedings consistent with our original opinion if the omission was an oversight.

ORIGINAL OPINION ADHERED TO AS MODIFIED.

**DIVISION OF STATISTICS**

## **WATER DIVISIONS AND WATER DISTRICTS**

### **WATER DIVISIONS: DENOMINATION**

The State of Nebraska is hereby divided into two water divisions, denominated Water Division No. 1 and Water Division No. 2, respectively. Reissue Revised Statutes, 1943, 46-215.

#### **WATER DIVISION NO. 1. BOUNDARIES**

Water Division No. 1 shall consist of all the lands of the state drained by the Platte rivers and their tributaries lying west of the mouth of the Loup river; and also all other lands lying south of the Platte and South Platte rivers that may be watered from other superficial or subterranean streams not tributary to the Platte river. Reissue Revised Statutes, 1943, 46-216.

#### **WATER DIVISION NO. 2. BOUNDARIES**

Water Division No. 2 shall consist of all lands that may be watered from the Loup, White, Niobrara and Elkhorn rivers and their tributaries, and other lands of the state not included in any other water division. Reissue Revised Statutes, 1943, 46-217.

For convenience in the adjudication of claims and in the distribution of water, these divisions have been subdivided into twelve water divisions, denominated 1-A, 1-B, 1-C, 1-D, 1-E, 1-F, 2-A, 2-B, 2-C, 2-D, 2-E and 2-F, as shown on the opposite page.

**THIS PAGE INTENTIONALLY LEFT BLANK**

## CLAIMS AND APPLICATIONS

The following tables give a complete list of all claims and applications of record in the Department of Water Resources which have not been canceled. This list also includes pending applications which have not yet been approved.

The claims and applications have been arranged in each water division by streams in alphabetical order, and the appropriations on each stream are arranged in order of priority.

Appropriations having docket numbers refer to claims covering rights which were acquired under the law prior to April 4, 1895, and those having application numbers were filed to appropriate water under the law of 1895.

Following these tables is a list of water appropriations which have been canceled in full or in part, or which have been dismissed during the past two years.
