Thirty Seventh Biennial Report

of the

DEPARTMENT OF WATER RESOURCES

TO

HONORABLE NORBERT T. TIEMANN
Governor of The State of Nebraska

LINCOLN, NEBRASKA

1967-1968

DEPARTMENT OF WATER RESOURCES
Dan S. Jones, Jr.
Director

Irrigation, Water
Power and Drainage
Registration of Wells

State of Nebraska

NORBERT T. TIEMANN, Governor
P. O. Box 94607
LINCOLN 68509

IN REPLY REFER TO

November 30, 1968

The Honorable Norbert T. Tiemann
Governor of Nebraska
Lincoln, Nebraska

Dear Governor Tiemann:

I am pleased to transmit to you herewith the Thirty-Seventh Biennial Report of the Department of Water Resources.

This report covers the two-year period which ended on September 30, 1968. It contains statistical data concerning water appropriations and other matters with which this department is concerned.

Respectfully submitted,

Director of Water Resources

DSJ:crb

Thirty Seventh Biennial Report

of the

DEPARTMENT OF WATER RESOURCES

TO

HONORABLE NORBERT T. TIEMANN

Governor of The State of Nebraska

LINCOLN, NEBRASKA

1967-1968

EXECUTIVES AND EMPLOYEES

OF THE

DEPARTMENT OF WATER RESOURCES

Dan S. Jones, Jr., Director of Water Resources	Lincoln
Marion E. Ball, Assistant Director	Lincoln
Edwin S. Kimmel, Division Engineer	Bridgeport
Mollie Bauer, Special Assistant	Lincoln
Robert F. Bishop, Division Engineer	Ord
Leo F. Zabel, Assistant Division Engineer	Cambridge
Stanley M. Christensen, Chief Hydrographer	Bridgeport
David B. Ender, Assistant Division Engineer	North Platte
John H. Hintz, Associate Hydrographer	Hershey
David J. Neely, Associate Hydrographer	Bridgeport
John G. Lathrop, Hydrographer	Crawford
Norman N. McConnell, Hydrographer	Bridgeport
Lloyd E. Powell, Jr., Hydrographer	Bridgeport
James W. Vassos, Hydrographer	Bridgeport
Marvin E. Witherwax, Hydrographer	Ord
William H. Birkel, Engineer Aide IV	Lincoln
Janis Stakens, Draftsman	Lincoln
Carol Schuster, Stenographer Clerk III	Lincoln
Billie Louise Blakesley, Clerk Typist I	Bridgeport
Dorothy A. Brening, Stenographer Clerk III	Bridgeport
Carolyn Burkey, Stenographer Clerk II	Lincoln
June E. Nelson, Clerk Typist II	Lincoln
Dick Kauffman, Engineer Aide III	Lincoln
Marilyn Kucera, Stenographer Clerk I	Lincoln
Thelma Pangle, Section Supervisor	Lincoln
Marcia L. Stewart, Bookkeeper	Lincoln
Anna Griffin, Caretaker	Bridgeport

WATER COMMISSIONERS

Elmer E. Anderson, North Platte River Basin	Ogallala
Henry F. Brandt, Republican River Basin	Cambridge
Larry D. Christensen, Loup River Basin	Ord
Philip Flohr, Lodgepole Creek Basin	Kimball
Thomas Reid Lamberson, Loup River Basin	Palmer
Ronald G. Martin, Republican River Basin	Red Cloud
Homer W. Nickell, North Platte River Basin	Bridgeport
Herschel A. Norris, Platte River Basin	Brady
Henry Pollman, Jr., Republican River Basin	Stratton
Lawrence H. Skarboe, North Platte River Basin	Bridgeport
Victor Todd Stover, Loup River Basin	Poole

OTHERS EMPLOYED DURING BIENNIUM

F. H. Klietsch, Division Engineer	Bridgeport
Virginia Lee Cook, Stenographer Clerk I	Lincoln
Judy Mae Hoxworth, Clerk Typist I	Bridgeport
Sharon L. Lindahl, Stenographer Clerk III	Lincoln
Arlene Kay Meis, Stenographer Clerk I	Lincoln
Julie A. Miller, Stenographer Clerk I	Lincoln
Arland W. Rakowsky, Engineer Aide	Lincoln
Susan D. Richards, Stenographer Clerk III	Lincoln
Victoria J. Riddle, Clerk Typist I	Bridgeport
Roma Jean Storey, Clerk Typist I	Broadwater
Leila Turner, Stenographer Clerk III	Lincoln
Michael S. Uzendoski, Water Commissioner	Fullerton
Kay E. Williamsen, Stenographer Clerk I	Lincoln
John M. Jess, Engineer Aide IV	Lincoln

NEBRASKA POWER REVIEW BOARD

Members:

William H. Norton, Chairman	Osceola
Harold Oldfather	Kearney
Sheldon A. Bernstein	Omaha
Larry E. Donegan	Lincoln
Thomas K. Eason	North Bend

Employees:

Delbert E. Dirrim, Attorney	Lincoln
Jeanne M. Bair, Clerk Secretary IV	Lincoln

Others Employed During Biennium

Robert Bruce Abernathy, Engineer in Training	Lincoln
Theodore R. Hollman, Engineer Aide	Lincoln
Ed R. Crowley, Board Member	Kearney

FOREWORD

This Biennial Report is the 37th such report issued by the agency responsible for the administration of the water-rights laws of the State. It is actually the sixth biennial report of such agency under the name of the Department of Water Resources which name was assigned when the agency was separated from the Department of Roads and Irrigation by the 1957 Legislature.

It contains a brief report on the available water supply and on the activities of the Department during the two-year period ending on September 30, 1968. It also contains lists of water appropriations, public power and irrigation districts and reclamation districts as they were of record on September 30, 1968.

Despite the favorable moisture conditions that prevailed generally throughout the biennium there was expanded activity in the development of irrigation by individuals as reflected in the number of applications filed with the department for permits to appropriate water from streams, and in the number of wells registered during the biennium. There were 606 applications for water in the current biennium compared with 485 during the previous two-year period. There were 3,904 irrigation wells registered, 1,252 more than in the last biennium.

WATER SUPPLY

The water supplies of Nebraska streams were above average in 1967 and in most areas they were above average in 1968. Exceptions in 1968 were the extreme northeast counties where severe drought conditions prevailed throughout the greater part of the crop season, and in the eastern counties where less severe conditions were experienced. All of the major storage reservoirs in the state were filled to the tops of their irrigation pools in both years, with the exception of the Box Butte Reservoir which filled to about 75 percent of its capacity each year.

The Platte River and its tributaries upstream from Kearney, Nebraska, are the most highly developed and best controlled of the major streams of the State. The department is required to keep detailed, day to day, records of the available water supply and its use in order to properly satisfy the appropriators who use the water. For that reason, the following detailed report of water supply is made:

The water supply in the natural streams of the western part of the State was above average for both the 1967 and 1968 water years. The discharge of the North Platte River at Bridgeport and Lewellen was 117 percent of the 10-year mean (1959-1968) in 1967, and 112 percent in 1968. Ample storage to supplement natural flow resulted in good crop yields for both years. The U. S. Weather Bureau records indicate that precipitation in the panhandle was 116 percent of average in 1967 while statewide it was 104 percent. There was less precipitation the following year, with 104 percent in the panhandle and the entire state receiving 92 percent during the 1968 Water Year.

In the Platte River Basin, Water Division 1-A, there was a good supply of natural flow and storage water available for irrigation and hydro-power generation during 1967 and 1968. Both years followed the usual near average precipitation pattern until August, 1968. Due to abnormal precipitation occurring in the North and South Platte Watersheds, between longitude 102 degrees-20' and 102 degrees-50', from August 9 to 15, the irrigation farmer's problems were reversed. His need for obtaining water for irrigation was changed to a need for draining excess water from the soil to save the crop. On August 16 the South Platte River at Julesburg reached

a peak discharge of 12,300 second-feet from heavy rains which occurred in northern Colorado. The North Platte River at Lewellen crested at 2,750 second-feet on August 15, due to a cloudburst which occurred on August 14, with Oshkosh receiving 5 inches and Chappell 4.5 inches of precipitation. Sterling, Colorado received 9 inches on the same date with the resultant high, but not damaging, flow in the South Platte River.

Runoff in the North Platte Watershed above Pathfinder Dam was 1,007,900 acre-feet during 1967, and 1,166,700 acre-feet in 1968. Both years are under the 50 year average (1904-1953) of 1,273,000 acre-feet, being 70 percent and 92 percent of average, respectively. The runoff, however, was sufficient to fill the 1,016,000 acre-feet appropriation of Pathfinder Reservoir both years. The 1967 season was marked by a rare coincidence when two reservoirs on the North Platte River became filled on the same date, July 2, 1967, the Pathfinder with 1,016,000 acre-feet and Lake McConaughy with 1,916,500 acre-feet. On that date there were 50,000 acre-feet held in the Glendo Reservoir to the credit of the owed-to-river account. Agreeable to the states of Wyoming and Nebraska, the owed-to-river water held in Glendo Reservoir was transferred by bookkeeping to the Seminoe Reservoir and credited to the upstream Kendrick Project. Glendo, junior in priority to all of the North Platte reservoirs, had reached its capacity of 176,700 acre-feet for irrigation on May 10. This 50,000 acre-feet credit to Kendrick storage was timely as the carry-over had been decreasing steadily from 650,000 acre-feet in 1962 to 380,000 acre-feet in 1966. All storage appropriations ended the 1967 season with a substantial carry-over. The 1968 season started with heavy snowfall in the mountains followed by abnormal precipitation and early runoff from snowmelt. The Glendo irrigation appropriation filled the earliest on record, February 27. Pathfinder filled on June 4 which permitted Kendrick to store 342,000 acre-feet to a peak content of 636,710 acre-feet on June 29. Lake McConaughy Reservoir reached a peak content of 1,897,600 acre-feet on May 25, 1968. This abundant supply of storage water assures the irrigation farmers with storage rights from Casper, Wyoming to Kearney, Nebraska an ample supply of supplemental storage for almost two years.

Water was held in the Glendo Reservoir flood pool both years. Due to the heavy runoff from snowmelt in June, 1967, the Glendo Reservoir reached a peak content of 57,300 acre-feet in the flood pool on July 4. Water was temporarily held in the Glendo flood pool 33 days, June 16 to July 19 in 1967, and for a period of nine days, June 9 to June 18 in 1968. The water was withdrawn from the flood pool as rapidly as possible without causing basement flooding in Bridgeport, Nebraska, which is the most vulnerable flow-damage area, due to high river flow, in the North Platte Valley.

The Tri-State Diversion Dam, located one mile downstream from the Wyoming-Nebraska State Line, is the lower end of the North Platte River section involved in the decree which was handed down by the U. S. Supreme Court in October, 1945. During the May-September irrigation season, flow passing Tri-State Dam is limited to: (a) 14 second-feet of natural flow for the Ramshorn Canal, (b) Pathfinder storage water for Warren Act storage contractors, (c) Glendo storage water for Glendo contractors, and (d) owed-to-river water which was temporarily stored in Glendo or Guernsey to enhance power production or alleviate flooding. Additional water passing Tri-State Dam in the five-months, May-September period,

is from operational spills at Guernsey and Whalen Dams or precipitation occurring between the dams and Wyoming-Nebraska State Line. In 1967 the flow for the five months passing Tri-State Dam was 99,240 acre-feet, compared with 86,770 acre-feet in 1968.

The flow into Kingsley Reservoir (Lake C. W. McConaughy) was 33,000 acre-feet greater in 1968 than the preceding year. During 1967 the flow of the North Platte River at Lewellen plus tributaries (Kingsley inflow) was 1,014,000 acre-feet compared to 1,047,000 acre-feet inflow to Nebraska's largest reservoir in 1968. The reservoir inflow was 118 percent and 123 percent, respectively, of the 18-year average (1951-1968), which was 852,440 acre-feet.

The flow at the upstream end of the Platte River (confluence of the North and South Platte Rivers, including the Sutherland Power Return) located five miles downstream from the City of North Platte was 1,209,700 acre-feet in 1967 and 1,269,800 acre-feet in 1968. Most of the flow at the confluence is diverted into the Tri-County Canal at the diversion dam which extends across the Platte River near Maxwell. A contract between the Central District and Platte District states that, at the latter's request, the Central District shall deliver annually up to 102,000 acre-feet of storage measured at the confluence for canals with Platte District storage contracts. For diversion by the seven canals with Platte District storage contracts, there was made available by the Central District at the confluence 9,600 acre-feet of storage in 1967 and 21,960 acre-feet in 1968.

The Platte River at Odessa is the downstream gaging station in Water Division 1-A. All demands on Kingsley and Sutherland storage water are made west, or upstream from this station which is located 505 miles downstream from Pathfinder Reservoir, and 119 miles downstream from Kingsley Reservoir. The annual discharge at Odessa was 882,500 acre-feet in 1967 and 660,600 acre-feet in 1968. The flow in the Platte River passing Odessa could be used or stored for future irrigation projects. It now flows unused to the Gulf of Mexico.

Niobrara River water stored in the Box Butte Reservoir, which is located ten miles north of Hemingford, supplements natural flow for the irrigation of 11,700 acres on the Mirage Flats Project. Heavy precipitation occurring in August 1968 resulted in the need for less storage water on the project than for the preceding year. In 1967 the total diversion was 17,250 acre-feet of which 14,780 acre-feet was storage. In 1968 the project diverted 15,290 acre-feet of which 13,700 was storage and 1,590 was natural flow. The Box Butte Reservoir carry-over on September 30, 1967, was 8,080 acre feet, while in 1968 the carry-over was 10,150 acre-feet. This is the first time the carry-over has exceeded 10,000 acre-feet since 1958, a wet year, when it was 12,960 acre-feet.

COMPARISON OF STORAGE IN RESERVOIRS

Merritt j	64,300	75,660	115	75,080	114	55,770	116	20,350	42

1 Capacity to top of irrigation pool consists of 64,780 acre-feet of dead and power head water and 100,000 storage for irrigation.

2 When maximum storage exceeds capacity of irrigation pool, it indicates some water is being held in flood control pool.

ADMINISTRATION OF WATER RIGHTS

The water supply being generally near normal or above during the biennium, there were no major problems encountered in the administration of water rights. Inasmuch as there are junior appropriators on all of the streams whose waters are used for irrigation, it is the usual thing not to have sufficient water for everybody during the dry periods which are experienced nearly every year.

It is a routine procedure during such dry periods to limit all appropriators to the amounts of their permits and to deny water to the more junior appropriators. The major irrigation districts have storage reservoirs or contracts for storage water which is used when natural flow is not available.

The administration of water in the Platte River Basin followed the usual pattern for seasons with normal, or better, water supplies. Following are summaries of the closing orders issued during 1967 and 1968:

1967 SEASON

On July 14 posted all canals on the North Platte River between Wyoming-Nebraska State Line and Lewellen to not exceed their legal limit of natural flow.

On August 15 closed all appropriations upstream from Range 25 W. to protect rights antedating December 28, 1894.

On August 19 opened canals that had been closed with rights between December 28, 1894 and September 7, 1926.

On August 23 closed all canals west of Range 25 W. which were opened on August 19, to again protect rights antedating December 28, 1894.

On September 4 opened all canals on the North, South and Platte Rivers to natural flow.

1968 SEASON

On July 15 closed all canals upstream from Range 24 W. to protect rights antedating January 23, 1895.

On July 16 closed all canals and pumps upstream from Range 25 W. to protect rights antedating December 28, 1894.

On July 19 closed all canals upstream from Range 23 W. to protect rights antedating September 22, 1894.

On July 30 opened 7 appropriations to protect rights antedating December 28, 1894.

On August 3 opened 16 appropriations upstream from Range 26 W. to protect rights antedating September 7, 1926.

On August 8 closed appropriations upstream from Range 23 W. to protect rights antedating December 28, 1894.

On August 12 opened 13 appropriations upstream from Range 26 W. to protect rights antedating September 7, 1926.

On August 15 opened all appropriations from the Wyoming-Nebraska State Line to Kearney to their legal limits of natural flow.

Blue Creek and Pumpkinseed Creek, both tributary to the North Platte River, required regulation for senior appropriators both years. In 1967 junior appropriations were closed along Blue Creek on July 19 and opened two months later on September 19. It was more favorable for the junior appropriators in 1968 when restrictions were required for merely a 28-day period, July 4, to July 31. Supplemental storage from Crescent Lake was diverted from Blue Creek by the Paisley Canal from July 15 to July 27. On Pumpkinseed Creek timely rains in 1967 provided sufficient moisture for crops and there was no need to close junior canals. In 1968, however, the Courthouse Rock Canal (D-840), with a priority of October 6, 1890 for 21 second feet made water demands which required closing twenty canals and pumps with junior appropriations for the forty seven-day period, July 13 to August 29.

In the Niobrara River Basin, the only administration required was from the Wyoming-Nebraska State Line downstream to the Mirage Flats Project near Dunlap, Nebraska. In 1967 all canals upstream from the Mirage Flats Canal with priority dates subsequent to January 25, 1937, were closed from July 11 to September 12. In 1968 they were closed from July 2 to September 16. During 1968 it was necessary on four occasions to close some of the older canals in the section above Dunlap for a short time for the benefit of an appropriator with an 1883 priority.

There were no unusual problems involved in the White River Basin during either year. We were not called upon to administer water in the Hat Creek Basin during the biennium. As noted in the last Biennial Report, a suit brought in the District Court of Sioux County, resulted in a decision by the State Supreme Court which held that downstream riparian owners in the Hat Creek Basin are entitled to water for livestock as against the rights of appropriators for irrigation.

Water shortages again occurred in the Big Blue and Little Blue River Basins in both 1967 and 1968. There has been a steady increase in the number of appropriators, as individuals in both basins are realizing the benefits of irrigation. In the Loup River Basin, the water supply continued to be adequate for all irrigation appropriators. Our administration consisted of limiting appropriators to the amounts of water allowed in their permits. The Department was not called upon to administer water in the lower portion of the Niobrara River Basin, the Elkhorn River Basin or the basins of the Missouri River Tributaries.

HYDROGRAPHY

The gauging of streams and recording of their flows was carried on during the biennium under the continuing cooperative agreement between the U. S. Geological Survey and the Department of Water Resources. Under the matching agreement

each of the parties expended \$90,500 and \$102,500 in 1967 and 1968, respectively. This is essentially a matching of services program. However, some direct cash payments of state funds are made to the Survey to compensate for machine processing of basic data, for publishing the discharge records annually and for certain equipment and other services which can be furnished advantageously by the Geological Survey.

In addition to the cooperative stream gaging program, this department operates numerous gaging stations on minor streams and on diversions from the streams and makes miscellaneous measurements to obtain data for use in administering the public waters of the State. The records obtained outside of the cooperative program are published biennially by the department as Hydrographic Reports. A brief summary of the work done in this program is included in the statistical summary herein.

During the past two years, the staff of the Department of Water Resources has devoted considerable time to the preparation of data on the available water supply and its use in connection with the separate reports on the Big Blue River Basin, the Elkhorn River Basin and the State Water Plan which have been undertaken by the Nebraska Soil and Water Conservation Commission. Members of the Department's staff have also participated in the comprehensive framework studies of the water and land resources of the Missouri River Basin which are being developed through the Missouri Basin Inter-Agency Committee.

LEGISLATION

The 1967 Legislature enacted several bills dealing with water resources, some of which had a direct impact on this department.

The laws providing for the registration of irrigation wells was amended to require that all wells, including municipal and industrial wells, but excluding wells used solely for domestic purposes, shall be registered in the office of the Department of Water Resources within thirty days after their completion. The amendment also required that all existing wells not already registered should be registered by January 1, 1968. Provision was made in the budget for the cost of additional staff and supplies to carry out the extra assignment. During the two-year period ending October 1, 1968 there were 549 municipal and industrial wells registered. Copies of the registration records are furnished to the Conservation and Survey Division and to the Soil and Water Conservation District where the wells are located the same as the records for irrigation wells.

The City, Village and Municipal Corporation Groundwater Permit Act was amended to correct a deficiency by providing standards to guide the Director of Water Resources in acting on an application for such a permit, to the effect that he must find that the request is reasonable, is not contrary to the conservation and beneficial use of groundwater, and is not otherwise detrimental to the public welfare.

The Groundwater Conservation District Act was amended to include with the Conservation and Survey Division and the Department of Water Resources, the Soil and Water Conservation Commission as the State agencies required to make

recommendations as to boundaries of proposed groundwater districts. The amendments also provide for creation of a district without a hearing if at least 60 per cent of the eligible land owners sign the formative petition. They also provide for the merging of two or more districts, the addition of territory and for the dissolving of districts.

The formation and the operation of rural water districts was provided for under Legislative Bill 896. A rural water district may be initiated by the filing of a petition with the county board. Among the requirements of the act is one that the county board may not act favorably upon the petition unless the Director of Water Resources has approved the proposal. Further, such a district must submit plans and specifications of its proposed works to the State Department of Health and to the Department of Water Resources for approval before start of construction. This legislation will enable residents of rural areas where suitable water for domestic use is not generally available to organize and finance the installation of a well or wells and small diameter distribution pipelines. Nemaha County Rural Water District No. 1, the first one formed, was approved in March, 1968. Groups in Boyd County and in Pawnee County were considering forming districts at the close of the biennium.

A Clean Waters Commission Act, which provides for the establishing of such a commission composed of five voting members appointed by the Governor and five ex-officio, non-voting members, including the Director of Water Resources, was also passed in 1967. As defined in the bill, the purposes of the commission shall be to assist municipalities in the planning and financing of waste water treatment works and solid waste disposal; and to provide financing arrangements furnishing municipalities the ways and means by which they can participate in State or Federal programs for the prevention, abatement and control of water pollution. At the organizational meeting of the commission in October 1967, the Commission approved a resolution requesting the Attorney General to bring an original action in the State Supreme Court to test the constitutionality of the act. The Court held unconstitutional the portion of the law which would permit the State to provide financing arrangements for municipalities. The Commission has not been active since the decision was handed down.

INTERSTATE STREAMS COMPACTS

Negotiations with the state of Kansas with respect to an interstate compact on the Big Blue and Little Blue Rivers continued. At the end of the biennium, a tentative draft of compact was in the hands of advisors to the Federal member of the commission and advisors at the State level to the state compact commissioners. Good progress was made during the past year in the negotiations. The commissioners feel that the draft provides an equitable apportionment of the waters between the states, and that a final draft can be approved by the commission early in 1969.

No progress was made in the ratification by Congress of the Upper Niobrara River Compact with the State of Wyoming and the Lower Niobrara River Compact with the State of South Dakota. Both of these documents were ratified by the respective state legislatures several years ago. The water officials of the three states intend to seek action on them when the new Congress convenes in January 1969.

No serious problems were experienced in the administration of the Republican River Compact. There were no problems in the administration of the South Platte River Compact, although some questions relative to interpretation of its language was raised when the Report of the Secretary of Interior on the Narrows Unit, Colorado was undergoing review.

NEW PROJECT DEVELOPMENT

The recently completed Farwell Project, on the Middle Loup River, and the Ainsworth Unit, on the Snake River, continued progress toward full development. About 42,000 acres in the Farwell Irrigation District, and 28,000 acres in the Ainsworth Irrigation District, were irrigated in 1968.

The Nebraska Mid-State Project was finally authorized as a unit of the Missouri Basin Project in November 1967. However, no Federal funds to accelerate planning were made available for the project during the biennium. The feasibility report for the O'Neill Unit, on the Niobrara River, was approved by the Bureau of the Budget. The Little Blue Project feasibility report was being revised to defer the irrigation portion. It is anticipated that the revised report, which will recommend construction of the Angus Reservoir for flood control, recreation and other purposes, will be released by the Secretary of the Interior for statutory reviews early in 1969. Progress toward an agreement between the Lower Loup-Platte Water Association and the Twin Loups Reclamation District which would result in the withdrawal by the Association of objections to the North Loup Unit appeared to be good. If agreement is reached, the chances are that Congressional hearings on the authorization of the unit will be held in 1969.

PUBLIC POWER DISTRICTS

Some additional responsibilities with respect to the organizational set-up of public power and public power and irrigation districts were assigned to the Director of Water Resources under Legislative Bill 106 of the 1967 Session. The legislation provides that the territory of a public power district, for voting purposes, must include the area in this State within which the district supplies electric service at wholesale or retail. Under the bill, all districts which are not in compliance with its provisions shall file petitions with the Department to amend their petitions for creation to comply. The bill further provides that after July 21, 1968, any power district or person may file a complaint against a district alleging non-compliance, whereupon the Department must hold a hearing on such complaint.

Complaints were filed on July 22, 1968, against the Loup River Public Power District, whose territory is Platte County, and Platte Valley Public Power and Irrigation District, whose territory for election of directors is five counties in the Platte River Valley, alleging that both districts serve in more than seventy counties. Just prior to July 21, 1968, the Loup District applied to amend its petition for creation to extend its territory into three other counties adjacent to Platte County. Hearings on the Platte complaint and on the Loup petition were set for dates in October 1968.

The Nebraska Power Review Board held 77 regular meetings, 23 hearings, and approved 140 applications for transmission lines and three voluntary service area agreements. Annual reports to the Governor covering the board's activities in detail have been issued for fiscal years 1967 and 1968.

STATISTICAL SUMMARY

The following is a summary of the statistical record for the biennium ending September 30, 1968.

Applications for water appropriations	606
Municipal well applications	2
Appropriations canceled	84
Applications Dismissed	6
Wells registered October 1, 1966 to	
September 30, 1968	4,453
Total wells registered	32,789
Hearings held Re: Water Appropriations	1
Hearings held Re: Public Power District Organization	1
Hearings held Re: Municipal wells	2
Hearings held Re: Reclamation District formation	0
Relocation petitions	4
Deeds recorded (involving 307 appropriations)	224
Reports of field investigations	45
Maps and Plans	475
Stream measurements	8,197
Canal measurements	7,095
Stream gaging stations with recording gages	160
Stream gaging stations without recording gages	130
Canal gaging stations with recording gages	114
Fees collected covering:	
Applications for surface water, power leases,	
deeds, petitions and copying records	52,222.43
Fees collected covering:	
Registration of wells, spacing permits,	
and copying records	32,290.80
Total	85,513.23
Fees collected covering:	
Proceeds of assessments on electrical utilities for	
support of Power Review Board—July 1, 1966	
to June 30, 1968	119,005.27

NEBRASKA

WATER DIVISIONS AND WATER DISTRICTS

WATER DIVISIONS: DENOMINATION

The State of Nebraska is hereby divided into two water divisions, denominated Water Division No. 1 and Water Division No. 2, respectively. Reissue Revised Statutes, 1943, 46-215.

WATER DIVISION NO. 1. BOUNDARIES

Water Division No. 1 shall consist of all the lands of the state drained by the Platte rivers and their tributaries lying west of the mouth of the Loup river; and also all other lands lying south of the Platte and South Platte rivers that may be watered from other superficial or subterranean streams not tributary to the Platte river. Reissue Revised Statutes, 1943, 46-216.

WATER DIVISION NO. 2. BOUNDARIES

Water Division No. 2 shall consist of all lands that may be watered from the Loup, White, Niobrara and Elkhorn rivers and their tributaries, and other lands of the state not included in any other water division. Reissue Revised Statutes, 1943, 46-217.

For convenience in the adjudication of claims and in the distribution of water, these divisions have been subdivided into twelve water divisions, denominated 1-A, 1-B, 1-C, 1-D, 1-E, 1-F, 2-A, 2-B, 2-C, 2-D, 2-E and 2-F, as shown on the opposite page.

CLAIMS AND APPLICATIONS

The following tables give a complete list of all claims and applications of record in the Department of Water Resources which have not been canceled. This list also includes pending applications which have not yet been approved.

The claims and applications have been arranged in each water division by streams in alphabetical order, and the appropriations on each stream are arranged in order of priority.

Appropriations having docket numbers refer to claims covering rights which were acquired under the law prior to April 4, 1895, and those having application numbers were filed to appropriate water under the law of 1895.

Following these tables is a list of water appropriations which have been canceled in full or in part, or which have been dismissed during the past two years.
