5. If during the course of construction of the irrigation project it is determined that there is a difference in the number and/or location of acres from the approved map, an amended project map may be filed for an equal or lesser number of acres prior to the beneficial use investigation deadline. The Department, at its sole discretion, must determine that the change from the original map remains within the original project concept and does not violate any rules and/or statutes and will not harm another appropriator. The amended map may then be approved by Order of the Department for an equal or lesser number of acres of land or amount of water than originally granted.
6. Appropriation A-20045 provides additional water to irrigate land under storage use appropriation A-19737 held by JLCC, LLC.
7. A measuring device approved by the Department is required. Contact the Lincoln Field Office before acquiring a measuring device to ensure the device will be acceptable.
8. Within two weeks after the first diversion of water under this application the appropriator must file written notice with the Lincoln Field Office informing the Department that the first irrigation diversions have occurred. The written communication must be signed by the appropriator and may be delivered by U.S. Postal Mail, hand delivered or sent via e-mail attachment to the Lincoln Field Office Supervisor.
9. The appropriator must comply with all relevant statutes. The statutes include, but are not limited to, the following:
  - A. Notify the Department of any change in ownership or address.
  - B. Notify the Department of the name and address of the person responsible for the use of the water appropriation (this may include farm managers, tenants, or relatives that actually apply the water to the approved use).
  - C. Obtain approval from the Department prior to taking any action that changes the location of the point of diversion, the location of the place of use, the type of use, or the type of appropriation.
10. After September 1, 2027, a field investigation will be conducted to determine the lands where water has been beneficially applied.
  - A. If the entire appropriation is found to have water beneficially applied, a Certificate of Perfected Appropriation will be issued by the Department for A-20045.
  - B. If a portion of the appropriation is found to have had water beneficially applied within the original project concept the Department may, at its discretion, modify the project map and land listing to represent the conditions found during the field investigation. The number of acres and diversion rate determined by the Department will not exceed what is granted by this Order. A Certificate of Perfected Appropriation specifying the final number of acres, location of acres and diversion rate will be issued by the Department for A-20045.

- C. If no portion of the appropriation is found to have water beneficially applied, the Department will issue an Order of Cancellation in Full for A-20045.
