ADDITIONAL SURVEY COMMENTS

- "Best facilitator I have ever been around."
- "I would empathize that the people were great but targeting the dry end of the state to supply a growing list of downstream uses can only work if we manage water as a reusable resource."
- "The planning process was late on presenting data and at the final meeting a lot of data was missing from the draft. Making decisions without the data being provided was frustrating."
- "Very interesting to watch government at work. Wasteful time management and believe some direction was determined prior to meetings."
