

STATE OF NEBRASKA
DEPARTMENT OF NATURAL RESOURCES
APPROVAL OF APPLICATION A-19553

WATER DIVISION 1-A

BACKGROUND

1. On July 14, 2004, the Department of Natural Resources (Department) issued a formal moratorium on all new surface water appropriations in the Platte River Basin upstream of the confluence with the Loup River near Columbus, Nebraska. The moratorium included all tributary streams above the Loup River confluence including the North and South Platte Rivers and tributaries.
2. On September 11, 2009, a Basin-Wide Integrated Management Plan (BWIMP) for the overappropriated area of the Platte River Basin was adopted by order of the Department. The BWIMP was also adopted by the following Natural Resources Districts (NRD): the North Platte NRD, the South Platte NRD, the Twin Platte NRD, the Central Platte NRD, and the Tri-Basin NRD. These NRDs are collectively referred to in the BWIMP as the "Platte River Basin NRDs." The individual integrated management plans referenced in the next paragraph are required to be in conformance with the goals and objectives of the BWIMP.
3. On August 13, 2009, the initial integrated management plans (IMPs) were adopted by order of the Department, pursuant to *Neb. Rev. Stat.* § 46-718(2) for the following natural resources districts (NRDs): the North Platte NRD, the South Platte NRD, the Twin Platte NRD, the Central Platte NRD, and the Tri-Basin NRD. There have been subsequent revisions to the IMPs. As part of the surface water controls adopted by the Department pursuant to *Neb. Rev. Stat.* § 46-716(1)(b), the moratorium on issuing new surface water appropriations was continued.
4. On January 1, 2007, work officially commenced on the Platte River Recovery and Implementation Program (PRRIP or Program). PRRIP's goals include reducing shortages to U.S. Fish and Wildlife Service target flows and providing additional land habitat for endangered species in the Lexington to Chapman reach of the Platte River. In order to meet these goals, each signatory to PRRIP has adopted depletions plans to address the mitigation of the adverse impacts of water-related activities on streamflows in the Platte River. The State of Nebraska, through the Department will utilize the integrated management process to achieve the goals of PRRIP (BWIMP and IMPs).
5. On June 26, 2017, Brian L. Barels, Water Resource Manager, Nebraska Public Power District (NPPD) filed in the Department petition VAR-6258 for Leave to File or Consider an Application for a Permit to Appropriate Water within a Moratorium Area or Stay Area. The petition requests leave to file an application for a temporary permit to appropriate water for the purpose of groundwater recharge via the Dawson County Canal.

6. On July 11, 2017, the Department granted leave to file an application for a permit to appropriate water by approving petition VAR-6258.
7. On July 17, 2017, Brian L. Barels filed in the Department application A-19553 for a temporary permit to appropriate water for the purpose of groundwater recharge through the Dawson County Canal. The application proposes to divert water from the Platte River at the headgate of the applicant's Dawson County Canal located in Section 18, Township 10 North, Range 23 West of the 6th P.M. in Dawson County.
8. Temporary permits may not be granted for a term of more than one year.
9. For the purposes of this order "Desired Minimum Discharge" (DMD) describes the water parameter that will be used to determine whether, and to what extent diversion may occur for projects such as that proposed under A-19553. Table A (see attached) lists the DMD values for the Platte River, measured in cubic feet per second at the Grand Island stream gage, for specific time periods. The magnitude of these flows differs according to the PRRIP's designation of dry, normal or wet hydrologic conditions, derived from the USFWS's recommendations for species flows and annual pulse flows and found in the PRRIP Water Plan Reference Materials Attachment 5, Section 11, Appendix A-5. These flow values also include instream flow appropriations which must also be met in order for unappropriated water to be considered available for possible diversion.

CONCLUSIONS

1. Construction of the Dawson County Canal has been completed.
2. Applicant has demonstrated there may be unappropriated water in the Platte River. It is anticipated there may be water available for diversion for some periods under this application in the future.
3. The purpose of this application is to recharge the groundwater aquifer in order to mitigate stream depletions from groundwater pumping and increase baseflow into local streams, which are goals of the Basin-Wide Plan (BWIMP) and Integrated Management Plans (IMPs). Accretions to streamflow that may occur as a result of recharge under this appropriation will be considered as beneficial if they are achieving the goals of the BWIMP and IMPs. Secondly, the BWIMP and IMPs provide support for Nebraska's participation in the PRRIP. Nebraska is a party to the PRRIP and in part, Nebraska will achieve its commitments under the PRRIP through implementation of Water Action Plan projects. Diversions under A-19553 may be used for PRRIP purposes, if available water is not needed for other BWIMP and IMP purposes. Any diversions under this application must not be to the detriment of achieving the goals of the BWIMP and IMPs in the most effective manner as determined by the Department.
4. Diversions would occur under the proposed project during the non-irrigation season or under conditions such that no adverse impacts to existing water users are expected.

5. This diversion project is expected to be operated in accordance with the goals and objectives of the BWIMP and IMPs. As stated above, Nebraska has committed to achieve its obligations to the PRRIP. Therefore, under Nebraska's current commitment to the PRRIP the project shall only divert water when U.S. Fish and Wildlife Service target flows are exceeded or such requirement is waived by the Department. As such, this project will not require an offset for the purpose of ensuring that these target flows are met.
6. The diversion of water for aquifer recharge is beneficial, there may be unappropriated water available, and the application is in the public interest. Therefore it should be approved.

ORDER

IT IS HEREBY ORDERED that application A-19553 is APPROVED subject to the following conditions:

1. The source of water is the Platte River.
2. The water diverted under this permit shall be used for the purpose of groundwater recharge in support of the BWIMP and IMPs via the existing Dawson County Canal.
3. If water is available according to the conditions of this Order and not required for use in achieving the goals of the BWIMP or IMPs, then the Department may allow diversion for groundwater recharge for PRRIP purposes.
4. The priority date is July 17, 2017.
5. When the specified conditions of this appropriation are met, water may be diverted, at a maximum rate of 100 cubic feet per second, at the headgate of the Dawson County Canal located in Section 18, Township 10 North, Range 23 West of the 6th P.M. in Dawson County, and the same water, less transit losses, allowed to flow into and through the Dawson County Canal system.
6. If a relinquishment is not submitted first, then A-19553 will EXPIRE one year from the date of this Order and appropriation A-19553 will be CANCELLED without further action by the Department as of that date.
7. The term "Desired Minimum Discharge" (DMD) is quantitatively defined in Table A and is attached to and hereby incorporated into the conditions of this Order. Only those flows in excess of the DMD shall be considered to be available to be diverted. These target flows are specified in **Table A** on page 6. The project will utilize only previously unappropriated available water.

8. In order to ensure compliance with the BWIMP and IMPs, the Department imposes the following hydrologic and administrative conditions, to determine whether, and in what quantity, water may be available for diversion:
 - A. No diversion under this appropriation may occur unless the previous day's twenty-four-hour average flow of the Platte River, as measured at the Grand Island stream gage or other Department-specified gage, is in excess of the DMD. This requirement may be waived if written permission is granted by the Department.
 - B. The current hydrologic condition of wet, normal or dry, as designated by PRRIP, shall determine the appropriate DMD value from Table A.
 - C. If the amount of streamflow in excess of the designated DMD is less than the maximum diversion permitted under this appropriation, as described in condition 7 above, then only that amount of streamflow in excess of the DMD may be diverted unless waived by written permission of the Department.
9. Prior to diversion under appropriation A-19553, appropriator must coordinate with the Department's field office in charge of water administration to confirm during regular business hours that conditions are met.
10. The appropriator shall contact the Bridgeport field office during regular business hours a minimum of 24 hours prior to the anticipated change in purpose of diversions from irrigation under other appropriations to groundwater recharge under this appropriation, or from groundwater recharge under A-19553 to irrigation. When such change in purpose of diversions should occur, accurate measurement of diversions and duration of diversion shall be documented by the appropriator.
11. The Department reserves the right to make adjustments to the amounts and measurement location(s) listed in Table A.
12. The water diverted under A-19553 through the Dawson County Canal may not be used for direct irrigation by NPPD's customers. Any water diverted for the purpose authorized under this permit that does not seep into the groundwater aquifer shall be returned to the river at established spills and drains.
13. Within six months after the final date of diversion under this temporary permit, the appropriator shall file a map that depicts where the water was routed, and will provide in-depth quantitative analysis to the Department of the recharge achieved by utilizing the Dawson County Canal, including all data provided for any contractual arrangements between NPPD, the Department or other persons.
14. The appropriator must comply with all relevant statutes.

ADDITIONAL INFORMATION

Failure to comply with all laws and regulations pertaining to surface water appropriations, any orders issued by the Director of the Department of Natural Resources, or the provisions of this Approval may result in the cancellation of the appropriation, temporary closing of the appropriation, administrative penalty, criminal prosecution, or any combination thereof.

This appropriation is not a guarantee that water will be available. Nebraska law gives priority to senior appropriations.

DEPARTMENT OF NATURAL RESOURCES

August 9, 2017

Gordon W. Fassett, P.E., Director

The applicant and any person with sufficient legal interest who has been or may be substantially affected by this order may request a contested case hearing in accordance with the *Neb. Admin. Procedures Act* §§ 84-901 et. seq. RRS and the Department's *Rules of Practice and Procedure Title 454 Neb. Admin. Code Chapter 7*. The request must be received by the Department at its Lincoln office (Nebraska State Office Building, 4th Floor, 301 Centennial Mall South, P.O. Box 94676, Lincoln, Nebraska 68509-4676) within 30 days of the date of the order and be accompanied by a filing fee of \$10.

A copy of this approval was posted on the Department's website and provided to the Department's field offices in Bridgeport and North Platte, Nebraska. A copy of this approval was mailed on August 9, 2017, to the following:

Brian L. Barels, Manager
Nebraska Public Power District
P.O. Box 499
Columbus, Nebraska 68602

Jeffrey T. Shafer
Nebraska Public Power District
P.O. Box 608
York, Nebraska 68467
