## Summary of Water Use

The following is a compilation of records, statistics and historic conditions of water use which have been tracked by the Central Platte Natural Resources District (CPNRD) for calendar year 2020. All information supplied for this summary is organized within a GIS database complete with the locations, attributes, and metadata necessary to recreate this report in tabular form. This report has been compiled for the 2021 Platte Basin meeting.

## Certified Irrigated Acres

In 2006, the district began certifying historic ground water and surface water irrigated acres. To be certified as irrigated, the land must have been irrigated at least 2 out of the 10 years for the period of 1995 – July 26, 2004. Land within the District but outside the original State stay on newly irrigated acres (January 6, 2006) could be developed (newly irrigated) in 2005 and was certified later in 2008-2009. The initial certification process ended on March 31, 2008; however, land is constantly coming into compliance using FSA compliant records depicting certified irrigated boundaries and associated 578 forms of certified irrigated crops with farm and tract numbers. Since that time, additions and de-certifications to the certified irrigated acres database have occurred through December 31, 2020, with a net result of 1,028,886 certified acres.

Detailed data regarding amount and water source of certified irrigated acres can be found in **Table 1. Certified Acres** below.

*Table 1. Certified Acres*

Year	Acres Certified	Acres of GW	Acres of SW	Co-Mingled Acres
2020	1,028,886	937,339	14,388	77,159

## Approved Transfers

Between January 1 and December 31, 2020, the CPNRD approved 54 transactions of water use transfers. Each transaction may have consisted of one or more parcels of land from different sections. For the years 2006-2008 all transactions were considered variances to the CPNRD’s rules and regulations. Variances (transfers of irrigated acres) were only allowed if it was determined that there were no new depletions to the Platte River and that any offsets were located “upstream” of the new use of water.

The certified acre total for 2020 involved in these transfers to new irrigated lands was 566 acres. The total number of certified acres used to offset the new uses was 530. For further analysis and statistics, see **Table 2. Transfers** below. Each transfer resulted in no net increase in stream depletions.

Detailed 2020 data that displays the necessary information regarding the location, timing, amount, and conditions associated with each transfer is shown in the Appendix, **Attachment 1** and **Attachment 2**.

Table 2. Transfers

Year	Cumulative Total of Acres Certified	Number of Transfers	Acres Transferred to New Irrigation	Irrigation Transferred from Certified Acres	Retired Surface Water Acres	Retired Ground Water Acres	Total Affected Acres
2020	1,028,886	54	566	530	0	228	1414

## Well Construction Permits

The CPNRD issued 55 well permits in 2020. Well permits by type are shown in **Table 3. Well Permits Issued by Type** below. Detailed 2020 data regarding location and permit number is shown in the Appendix, **Attachment 3**.

Table 3. Well Permits Issued by Type

Well Permit Type	2020	Associated Transfers
CPSG	14	3
CPSS	0	0
CPRP	35	2
CPCG	0	0
CPNP	2	1
CPDW	2	0
CPMU	1	0
CPIN	1	0
CPDO	0	0
TOTAL	55	6

## Water Banking Activities

In 2020, the CPNRD retired 228 certified acres in Dawson, and the estimated accretion to the Platte River from ground water retirements is 154 acre-feet (ac-ft).

Retirements are shown in **Table 4. Retirements**.

By the close of 2020, the CPNRD Water Bank had a balance of 2,122 acre-feet of groundwater rights available for offset in the across the district and 2,500 ac-feet of surface water rights available for offset in the over-appropriated area. Detailed data that displays the necessary information regarding the location, timing, amount, and conditions associated with the 2020 transfers is shown in the Appendix, **Attachment 4**.

Table 4. Retirements

Transaction ID	County	Township	Range	Section	Acres	Acre Feet
2119	Dawson	10	24	1 & 12	139	60.7
2124	Dawson	10	23	7 & 18	89	93.3

## Other Stream Flow Accretion Activities

### Surface Water Exchange Pilot Program

The CPNRD and its three partner canals, Cozad Canal, Thirty-Mile Canal, and Orchard-Alfalfa Canal, through agreements with Central Nebraska Public Power and Irrigation District and the Platte River Recovery Implementation Program agreed to transfer unused canal storage water to the Environmental Account. In 2020, the unused storage water transferred to the Environmental Account totaled 14,073 AF.

### Surface Water Excess Flow Diversions

The three partner canals diverted a total of 2,950 AF (net diversion) of water for recharge through the canals.
