DSS Id: 52

Appropriator: North Platte Natural Resources District

Address: 100547 Airport Rd Scottsbluff, NE 69363

Water Rights Id: 14554

Point of Diversion: Castle Rock Diversion Dam

Phone Number: 308-632-2749

Permit Type: Temporary

Annual Operating Plan Year: 2024

E-mail: sschaneman@npnrd.org

## Permit Application (*Alternate Form APA-001*)

What Is the Recharge Application Type? *Natural Flow*

Source Name (From Point of Diversion) *Castle Rock Canal from North Platte River*

Diversion Type (From Point of Diversion) *Headgate*

Diversion Structure Name (From Point of Diversion) *Castle Rock Diversion Dam*

Maximum Capacity of Canal or Delivery Works (CFS) (From Point of Diversion) *88*

Quantity Desired for Recharge Appropriation (CFS) *88*

What is the Minimum Operational Rate of the Canal (CFS) *5*

What is the Earliest Diversion Date? *04/01/2024*

Will This Project Be Constructed under a Federal Program, Receive Federal Funding, or Have Federal Planning Assistance? *No*

Do You Intend to Divert Water into Recharge Facilities Other than Your Canal? *No*

## Annual Operating Plan

### General System Operations (*AOP*)

Yes

No

Do You Use This System to Irrigate?

Diversion Begin Date *04/01/2024*

Diversion End Date *11/20/2024*

Delivery to Irrigators Begin Date *05/10/2024*

Delivery to Irrigators End Date *09/20/2024*

Irrigation Narrative (optional)

Irrigation Use Uploads (Optional)

No files uploaded.

Yes

No

Do You Use This System to Generate Hydropower?

Yes

No

Do You Use This System for Storage?

Narrative for All Non-excess Flow Activities That Would Affect the Ability to Divert Excess Flows (Optional)

## Recharge Facilities (AOP)

### Castle Rock Canal

### Location & Capacity

**Name of Facility (If Only One Facility, This Is the Canal Name)** *Castle Rock Canal*

**Type of Facility** *Canal*

**Delivery Point Coordinates**

**Latitude** *41.817281* **Longitude** *-103.576602*

**Operational Constraints: Enter Dates or Describe in the Narrative below When Can This Facility Can Be Operated?**

**Begin Date of Constraints (Optional):** **End Date of Constraints (Optional):**

**Narrative of Constraints: Describe Details (Example: Weather Is Too Cold, so Cannot Operate the Facility)** *Icy conditions may limit the opportunity or amount of excess flow diversions that can be diverted into the recharge facility.*

**Diversion Rate from Stream (CFS)**

*Amount needed to be diverted in order to deliver the amount specified in the next question below. The total of the diversion values entered for all project facilities should add up to the amount to be appropriated in the application section.* *88*

**Delivery Rate (CFS)**

*Amount to Be delivered into the project facility from the stream diversion. If your project consists of one canal, then the value for this question should be the same as the value for the previous question. For projects where a canal delivers water to a recharge site: (the stream diversion rate) minus (the project facility delivery rate) = canal loss.* *88*

**Anticipated Maximum Annual Diversion (AF)**

*The upper limit of water diverted from the stream for this project facility.* *5280*

**Maximum Operational Head (FT)**

*For reservoirs and wetlands, how deep will the water get? For canal sections, what is the maximum height of water (head) in the canal while diversions under this application are occurring?* *5*

**Maximum Water Surface Area (Acres)**  
*For reservoirs and wetlands, what will be the maximum water surface area corresponding to the maximum head. For canals this would be the average canal width multiplied by the canal section length where recharge will occur.* 22

**Are Engineering Drawings Available?** No

Instrumentation

Instrument 1 - Inflow

**Name of Inflow Measurement Site** Castle Rock Canal

**Geographic Coordinates of Measurement Device**

**Latitude** 41.7923 **Longitude** -103.5433

**Recorder Type** Staff Gage

**Recording Increments** Daily

**Live Data Feed available to NeDNR?** Yes
