HYDROGRAPHIC REPORT

1984

STATE OF NEBRASKA
DEPARTMENT OF WATER RESOURCES

STORAGE IN RESERVOIRS

DAILY DISCHARGE RECORDS OF MISCELLANEOUS
STREAMS AND CANAL DIVERSIONS

1984

Prepared Under the Direction of Michael Jess
Department of Water Resources

PREFACE

The following individuals were employed by the Department during calendar year 1984. Those persons that made measurements on streams, canals or pumps listed in this report are noted by an asterisk preceding their name. Appreciation is expressed for the patient work performed by Judith A. Huwaldt and Dorothy A. Brening in typing and compiling the report. This Hydrographic Report was edited by Mark E. Nelson.

EXECUTIVES AND EMPLOYEES OF THE DEPARTMENT OF WATER RESOURCES

*Terrance J. Ault, Water Resources Specialist II.	North Platte
Deborah A. Bandiola, Accounting Clerk II	Lincoln
H. Lee Becker, Engineer IV/State Hydrologist	Lincoln
*William H. Birkel, Water Resources Specialist III.	Norfolk
Robert F. Bishop, Division Chief, Operations	Lincoln
Dorothy A. Brening, Secretary II	Bridgeport
Stanley M. Christensen, Water Resources Specialist IV.	Bridgeport
Susan E. Cotton, Staff Assistant I	Lincoln
*Bradley D. Edgerton, Water Resources Specialist I.	Cambridge
Susan A. France, Administrative Assistant II	Lincoln
Eustaquio Guzman, Business Manager II.	Lincoln
Carol A. Hans, Administrative Secretary.	Lincoln
*Thomas L. Hayden, Water Resources Specialist II.	Bridgeport
Judith A. Huwaldt, Secretary II.	Lincoln
*Dudley D. Jackson, Water Resources Specialist III.	Cambridge
J. Michael Jess, Director.	Lincoln
*Thomas L. Klanecky, Water Resources Specialist II.	Ord
Lumir C. Kubicek, Division Chief, Engineering.	Lincoln
Thomas R. Lamberson, Assistant Director.	Lincoln
*Guy H. Lindeman, Engineer III.	Lincoln
E. Jane Malone, Staff Assistant I.	Lincoln
James A. Marburger, Water Resources Specialist II.	Lincoln
Kathleen M. McDonald, Word Processing Specialist I	Lincoln
*Kenneth M. Meikle, Water Resources Specialist II	Norfolk
*Thomas A. Mitchell, Water Resources Specialist II.	Crawford
*Harvey M. Mortimore, Water Resources Specialist II	Bridgeport
*David J. Neely, Water Resources Specialist III	Bridgeport
*Mark E. Nelson, Engineer III	Lincoln
*Russell K. Oaklund, Water Resources Specialist II.	Lincoln
*Keith A. Paulsen, Water Resources Specialist III	Lincoln
*Lloyd E. Powell, Water Resources Specialist II	Bridgeport
*James C. Retchless, Water Resources Specialist II.	Bridgeport
Mickey C. Scheidt, Staff Assistant I	Lincoln
Rosa L. Schuler, Water Resources Specialist I.	Bridgeport
*Robert Sejkora, Water Resources Specialist II.	Lincoln
Janis Stakens, Drafter III	Lincoln
*Eric D. Stasch, Engineer I	Lincoln
Danny L. Studnicka, Water Resources Specialist II.	Ord
*Harold Turek, Water Resources Specialist II.	Ord
James W. Vassos, Water Resources Specialist III.	Bridgeport
*Karl A. Wadas, Water Resources Specialist III.	Ord

OTHERS EMPLOYED DURING 1984

Joan C. Brunt, Gage Reader	Lewellen
*Ralph L. Craig, Water Resources Specialist II.	North Platte
Susan Eichthaler, Typist II.	Bridgeport
*Kert J. McKeone, Water Resources Specialist II	North Platte
Sandra J. Miller, Secretary II	Lincoln

WATER COMMISSIONERS

Albert Amateis.	Bridgeport
Carol Biede	Brady
*Calvin Meyer.	Lincoln
Victor L. Shepardson.	Paxton
*Carl L. Streeter.	Ord
*Richard A. Webster.	Lincoln
*Fred B. Williams.	Ord

HYDROGRAPHIC REPORT 1984

INTRODUCTION

The Hydrographic Report provides a record of stream flow, diversions for irrigation, reservoir storage and related data pertaining to water use in Nebraska. All measurement sites are referenced to the legal coordinates of the United States Bureau of Land Management. The records are listed in downstream order according to river basin and subbasin.

The basic stream gaging program in Nebraska is carried out under a cooperative agreement between the Water Resources Division, United States Geological Survey, and the Nebraska Department of Water Resources. The cooperative discharge records are published annually by the U.S. Geological Survey in the report Water Resources Data for Nebraska. Additional stream flow records are collected in the State by the Department of Water Resources in cooperation with irrigation districts, power companies and local governing bodies. Storage data for reservoirs in the Papillion and Salt Creek Basins was provided by the U.S. Army Corps of Engineers, Missouri River Division. These additional records, which are not published by the U.S. Geological Survey, are published in the Hydrographic Report.

Copies of the Hydrographic Report may be obtained by addressing the Department of Water Resources, P.O. Box 94676, Lincoln, Nebraska 68509. Copies of the publication Water Resources Data for Nebraska may be obtained by addressing the District Chief, U.S. Geological Survey, Room 406, Federal Building & U.S. Courthouse, Lincoln, Nebraska 68508, or the Department of Water Resources.

EXPLANATION OF DATA

The Hydrologic data presented in this report was obtained during Calendar Year 1984. All instantaneous and daily discharge values are expressed in cubic feet per second. Monthly and annual discharge values and reservoir storage totals are listed in acre-feet. The data may be converted to other common units of measurement using the table of equivalents listed below:

1 cubic foot.7.48 gallons....	62.4 lbs. of water
1 cubic foot.0.02832 cubic meters	
1 acre-foot	43,560 cubic feet...	325,851 gallons
1 cubic foot per second (cfs)448.8 gallons per minute	
1 cfs for 24 hours.	1.983 acre-feet	
1,000 gallons per minute.2.23 cfs	
1,000 gallons per minute.4.42 acre-feet per day	

The data presented in the first section of the report includes mean daily discharges for streams and canals, and both daily and monthly reservoir storage values. The mean daily discharge values were obtained from water stage recorders, or readings taken by an observer. Instantaneous peak discharges are published for streams having recording gages which operate year-round.

The water diverted from streams into canals is measured at gages located as close as possible to the canal headgates. The legal description of the land on which the measuring device is situated is provided in the heading for each record. The length of time that the station has been operated is also listed in the heading.

The acres to be irrigated, by virtue of the listed appropriations, are noted at the foot of each diversion record. Section 46-261, R.R.S., Nebraska, 1943, mandates that canal owners or operators must submit a verified list of lands to be irrigated to the Department by April 1st of each year, if required by the Director. The actual amount of land irrigated is sometimes different than that reported because of unpredictable circumstances, such as the weather.

Many discharge measurements are made on streams, canals and pumps, in the course of administering water rights. In addition to measurements taken during times of water shortage, numerous sites on streams and canals are measured several times per year on a regular basis. Those measurements are listed in the second and third sections of the report. The measurements define the quantity of flow at the time the reading was obtained. A number of the miscellaneous stream flow measurements were taken under base flow conditions. Base flow conditions occur when stream flow consists entirely of ground water seepage, no water is being withdrawn for irrigation, and vegetative growth is at a minimum.

 Acreage reported A-768-16177

*The water from drains was originally diverted at Whalen from the North Platte River and carried through the Interstate Canal for lands within the Pathfinder Irrigation District. The residue of the Whalen diversion after it has been used on the Pathfinder District lands together with surface runoff is intercepted by the Tri-State Canal and conveyed for re-use on Northport Irrigation District's lands. United States v. Tilley, State Engineer of Nebraska, et al. No. 11587, United States Circuit Court of Appeals, Eighth Circuit, December 23, 1941.

ELWOOD RESERVOIR STORAGE IN ACRE-FEET

From Kingsley Reservoir Storage--NW1/4NW1/4 Sec. 32-8-22 W. near Elwood

STORAGE LEVEL	ELEVATION (Feet)	CONTENT (Acre-Feet)
Top of flood pool	2613.0	45037
Top of conservation pool	2607.0	37800
Top of dead storage pool	2568.8	8295
Minimum normal operating level	2578.0	13085

*Note that prior to 1984, storage values published in the Hydrographic Report were for storage above the minimum normal operating level. Add 13085 acre-feet to values listed in pre-1984 reports before comparing to values in this report.

Year Ending December 31, 1984
Period of Record: October 1978 - December 1984

COMPARISON OF STORAGE IN RESERVOIRS

1984 Calendar Year

Name of Reservoir	Capacity Top of Irrig. Pool Acre-feet	Maximum Storage 1984		Carryover Dec. 31, 1984	
		Acre-feet	%Average	Acre-feet	%Average
Pathfinder (ownership)	a 1,015,890	1,015,890	104%	900,430	147%
1 Glendo (ownership)	a 184,870	183,240	102%	128,520	97%
Lake C. W. McConaughy	a 1,948,000	1,807,800	104%	1,592,700	105%
Oliver	b 2,680	2,840	88%	2,730	106%
Whitney	a 1,000	10,070	98%	6,830	110%
Box Butte	a 31,060	21,400	118%	8,970	106%
2 Enders	a 44,480	35,520	99%	22,380	100%
2 Harry Strunk Lake	a 37,140	41,650	104%	28,190	102%
2 Swanson Lake	a 120,160	131,800	118%	82,490	119%
2 Harlan County	a 342,560	342,800	106%	242,800	98%
2 Hugh Butler Lake	a 37,780	37,470	103%	30,240	107%
Sherman	a 69,080	69,360	100%	53,210	107%
Merritt	a 74,490	74,780	99%	68,830	106%

1 Capacity to top of irrigation pool consists of 64,780 a.f. of dead and power head water; 100,000 storage for irrigation and 20,090 evaporation loss.

2 When maximum storage exceeds capacity of irrigation pool, it indicates some water is being held in flood control pool.

1 1970-1984 record for average

b 1981-1984 record for average- water stored for recreation - no irrigation

NOTE: There is no irrigation water stored in the Oliver Reservoir
