RULES AND REGULATIONS FOR THE ENFORCEMENT OF THE GROUNDWATER MANAGEMENT AND PROTECTION ACT

GENERAL PROVISIONS	20
CHAPTER 2 DEFINITIONS	20-21
CHAPTER 3 COMPLAINTS	21
CHAPTER 4 INSPECTIONS AND INVESTIGATIONS	22
CHAPTER 5 INSPECTION REPORT AND ALTERNATIVE ACTIONS	22
CHAPTER 6 CONSENT TO CEASE AND DESIST	23
CHAPTER 7 COMPLIANCE ORDER	23
CHAPTER 8 BOARD ACTION SUBSEQUENT TO REQUEST FOR HEARING	23
CHAPTER 9 BOARD ACTION IF ALLEGED VIOLATOR FAILS TO RESPOND OR APPEAR	24
CHAPTER 10 BOARD AUTHORIZATION TO INITIATE COURT ACTION	24
CHAPTER 11 AGREEMENTS BETWEEN GROUNDWATER USERS	24

RULE 4 RULES AND REGULATIONS FOR THE ENFORCEMENT OF THE GROUNDWATER MANAGEMENT AND PROTECTION ACT

CHAPTER 1 GENERAL PROVISIONS

- •01 The District will enforce the provisions of the Groundwater Management and Protection Act and all rules and regulations adopted pursuant thereto, by the issuance of cease and desist orders in accordance with the procedure hereinafter specified and by bringing appropriate actions in the district court of the county in which any violations occur for the enforcement of such orders.
- •02 Cease and desist orders may also be issued for the following reasons:
 - <u>**02.01**</u> Operation of an irrigation system in a manner which allows for improper irrigation runoff;
 - <u>02.02</u> Construction or operation of an illegal well as defined in these rules and regulations.

CHAPTER 2 DEFINITIONS

- •01 Board or board of directors means the board of directors of the Upper Big Blue Natural Resources District.
- •02 Compliance officer means an employee, agent or director of the District authorized to perform the functions assigned thereto by these rules and regulations.
- •03 District means the Upper Big Blue Natural Resources District.
- •04 District representative means an employee of the District or other persons specifically authorized by the District Board of Directors to act on behalf of the District with regard to District Rule 4.
- •05 Gravity Irrigation shall mean a method of irrigation utilizing water from a ditch, canal, pipe, or other conveyance directly to the surface of the ground, which is distributed across the field through a channel, furrow, or border by the force of gravity.
- •06 Groundwater means that water which occurs or moves, seeps, filters or percolates through the ground under the surface of the land.
- •07 Groundwater user means a person who at any time extracts, withdraws or confines groundwater for any use at a rate in excess of fifty (50) gallons per minute.
 - **<u>07.01</u>** Whenever the landowner and operator are different, the term "groundwater user" will mean both the landowner and the operator.
- •08 Illegal well means:
 - <u>**08.01**</u> any well not registered pursuant to Chapter 46, Article 6 of the Nebraska Revised Statutes;
 - <u>**08.02**</u> any well not in compliance with the Nebraska Groundwater Management and Protection Act or any rules and regulations adopted pursuant thereto;

CHAPTER 2 (Continued) DEFINITIONS

- <u>**08.03**</u> any well not in compliance with the Nebraska Chemigation Act or rules and regulations adopted pursuant thereto;
- •09 <u>08.04</u> any well not in compliance with any applicable laws of the State of Nebraska. Improper irrigation runoff means the occurrence of irrigation runoff water which contributes to the waste of groundwater.
- •10 Irrigation runoff water means groundwater used for irrigation purposes which escapes from land owned, leased or otherwise under the direct supervision and control of a groundwater user:
 - <u>10.01</u> Groundwater which becomes commingled with surface water runoff will be treated as irrigation runoff.
- •11 Operator means a person who operates irrigated or dryland properties for the production of agricultural, horticultural, silvicultural or nursery products.
- •12 Person means a natural person, partnership, association, corporation, municipality, irrigation district or any agency or political subdivision of the state.
- •13 Sprinkler Irrigation shall mean a method of irrigation in which the water is sprayed, or sprinkled, through the air to the ground surface or crop canopy.
- •14 Subsurface Drip Irrigation shall mean a method of irrigation providing water to plants through small-diameter tubes and emitters below the surface of the ground.
- •15 Well means any artificial opening or excavation in the ground through which groundwater flows under natural pressure or is artificially withdrawn:
 - **15.01** A series of wells developed and pumped as a single unit will be considered as one well.

CHAPTER 3 COMPLAINTS

- •01 Any person who owns, rents or leases land or resides within the District; or any non-resident person who can show the actions of any operator or groundwater user within the District directly affects him or her; a district representative; or the board may file a written complaint.
- •02 Said complaint must be filed against an operator or groundwater user alleging a violation of rules and regulations adopted pursuant to the Ground Water Management and Protection Act.
- •03 Complaints must be filed at the office of the District (Upper Big Blue Natural Resources District, 105 N. Lincoln Avenue, York, Nebraska 68467), or directly with a District representative, on complaint forms prepared by the District.

CHAPTER 4 INSPECTIONS AND INVESTIGATIONS

- •01 If the nature of the alleged violation requires an on site inspection, said inspection must occur within five (5) days after the complaint is filed (excluding Saturdays, Sundays and legal holidays).
- •02 The compliance officer or person designated by the compliance officer, upon proper identification and after delivering a copy of the complaint to the persons in control of the land, is authorized to enter upon the land for the purposes of making an inspection of the alleged violation.
- •03 Upon completion of the investigation, the compliance officer will file a report of his or her findings in the District office and will deliver a copy of said report to the alleged violator and to the complainant (if other than the board) in person or at their places of residence, or it will be sent to them by certified mail.

CHAPTER 5 INSPECTION REPORT AND ALTERNATIVE ACTIONS

- •01 If the compliance officer finds that there is reasonable cause to believe that the alleged violator was at the time of inspection or was at the time complained of, in violation of District rules and regulations, said compliance officer's report will be accompanied by a formal notice of the alternative actions available to the alleged violator which will be as follows:
 - <u>01.01</u> Consent to cease and desist from continuing or allowing the reoccurrence of such violation; or
 - <u>01.02</u> Request that a formal hearing be scheduled and conducted in accordance with the rules and regulations of the District.
- •02 If the compliance officer's report finds that a violation of these rules and regulations has not occurred the complainant will be notified of the alternatives available in the same manner as provided for the alleged violator. The complainants alternatives are as follows:
 - <u>**02.01**</u> Accept the compliance officer's findings that there has been no violation of these rules and regulations; or
 - <u>02.02</u> Request that a formal hearing be scheduled and conducted in accordance with the rules and regulations of the District.
- •03 The alleged violator or complainant will be granted not less than seven (7) days (excluding Saturdays, Sundays and legal holidays), from the date that said report and notice is received by him or her to respond in writing indicating any actions intended.

CHAPTER 6 CONSENT TO CEASE AND DESIST

- •01 If the alleged violator agrees under Chapter 5, paragraph 01.01 of these rules and regulations, he or she must submit a schedule of compliance which must provide for the discontinuance and/or no reoccurrence of the violation.
- •02 For violations relating to improper irrigation runoff, such schedule of compliance must include the identification and description of all proposed procedures or measures to prevent, control or abate improper irrigation runoff.
 - **<u>02.01</u>** Such procedures or measures must include one or more of the following:
 - <u>**02.01a**</u> irrigation scheduling using a District approved method;
 - <u>02.01b</u> construction and utilization of runoff collection and/or retention systems such as furrow dikes, reuse pits or dugouts;
 - <u>**02.01**c</u> conversion of furrow irrigation to sprinkler or subsurface drip irrigation;
 - <u>02.01d</u> discontinue or alter operation of center pivot end gun or dump valve;
 - <u>02.02e</u> conversion to dryland; or
 - <u>02.01f</u> execution and performance of an agreement in accordance with Chapter 11 of these rules and regulations.
- •03 For violations other than improper irrigation runoff, such schedule of compliance will include actions necessary to prevent the continuance or reoccurrence of said violations.
- •04 The alleged violator must agree to implement and abide by the terms of such schedule.

CHAPTER 7 COMPLIANCE ORDER

- •01 When an alleged violator has consented to cease and desist in accordance with Chapter 5, paragraph 01.01, the compliance officer shall issue a compliance order to the alleged violator. Said order shall include the schedule of compliance and shall instruct the alleged violator that he or she shall permanently cease and desist from any reoccurrence of the alleged violation.
- •02 If at any time subsequent to the issuance of the compliance order, following an investigation as provided in Chapter 4, the compliance officer believes that a violation has reoccurred he or she shall request a formal hearing.

CHAPTER 8 BOARD ACTION SUBSEQUENT TO REQUEST FOR HEARING

- •01 When requested, in accordance with Chapter 5 or Chapter 7, the board, upon ten (10) days notice to the persons affected, will hold a formal hearing.
- •02 If, following a hearing, the board determines that the alleged violator has violated these rules and regulations, it will adopt an order directing said alleged violator to immediately cease and desist from all activities determined by the board to be violations, and specifying any other actions deemed necessary and appropriate.
- •03 Said order will be transmitted to the alleged violator in person or by certified restricted mail.

CHAPTER 9 BOARD ACTION IF ALLEGED VIOLATOR FAILS TO RESPOND OR APPEAR

•01 When an alleged violator has been notified in accordance with Chapter 5 of these rules and regulations and such alleged violator has failed to respond thereunder or has failed to appear at any properly scheduled formal hearing, the board will review the complaint and the inspector's report as well as any other pertinent information and issue such order or orders in accordance with these rules and regulations as are deemed appropriate.

CHAPTER 10 BOARD AUTHORIZATION TO INITIATE COURT ACTION

•01 The board may initiate appropriate legal actions in the district court of the county in which the violation has occurred whenever necessary to enforce any action or orders of the District in accordance with these rules and regulations.

CHAPTER 11 AGREEMENTS BETWEEN GROUNDWATER USERS

- •01 A groundwater user whose irrigation runoff water is capable of being captured and utilized by another person in a manner which will prevent waste of such water, may have such water excluded from the definition of improper irrigation runoff water by submitting to the District an agreement providing for such capture and utilization signed by all affected parties, on forms provided by the District.
- •02 When such agreement is approved by the District, it will indicate the District's concurrence that the groundwater user's irrigation runoff water is under adequate control.
- •03 Such agreement may be terminated at any time by either party or by the District whenever it determines that such agreement no longer prevents or controls improper irrigation runoff water.
- •04 The party terminating the agreement must provide written notice to all other parties involved in the agreement.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 1 – AUTHORITY FOR ISSUING THESE RULES AND REGULATIONS

01 Control Area was declared -

On December 9, 1977, the State of Nebraska, Director of Water Resources issued an order, in accordance with the Nebraska Ground Water Management and Protection Act, declaring a certain geographic area within the boundaries of the Upper Big Blue Natural Resources District a "Control Area".

02 Special Protection Area was declared -

On September 23, 1993, the State of Nebraska, Director of Environmental Quality, issued an order declaring the Upper Big Blue Natural Resources District a "Special Groundwater Quality Protection Area".

03 Action Plan first adopted -

On May 19, 1994, after holding a public hearing on April 18, 1994, the District adopted the Special Protection Area Action Plan.

- O4 Action Plan Approved by Director of Environmental Quality On September 14, 1994, the Director of Environmental Quality issued an order approving the Special Protection Area Action Plan.
- O5 Legislative Name Change to Groundwater Management Areas –
 On July 19, 1996, LB 108 became effective. This legislation designated all existing control areas and special protection areas as "management areas."

06 Upper Platte Basin Fully Appropriated -

On December 30, 2005, the Nebraska Department of Natural Resources notified the District of the Department's preliminary determination that portions of the Upper Platte River Basin, part of which lies within the District, are fully appropriated and the geographic area in which the surface water and groundwater are hydrologically connected. Pursuant to Department rule, 457 NAC 24001.02, the hydrologically connected area is the area within which pumping of a water well for fifty (50) years will deplete the river or a baseflow tributary thereof by at least ten percent (10%) of the amount pumped in that time (the "10/50 Area").

On April 21, 2006, the Department issued the "Order of Final Determination of River Basins, Subbasins, or Reaches as fully Appropriated, and Describing Hydrologically Connected Geographic Areas", confirming the preliminary determination of December 30, 2005.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 1 – AUTHORITY FOR ISSUING THESE RULES AND REGULATIONS

- 07 Hastings Wellhead Protection Groundwater Management Area Action Plan –
 On February 16, 2012 the District adopted the Hastings Wellhead Protection
 Groundwater Management Area Action Plan, which is a joint plan with the Little
 Blue Natural Resources District and Hastings Utilities.
- 08 Date these rules and regulations were adopted –
 The Upper Big Blue Natural Resources District, in accordance with the requirements of the Nebraska Ground Water Management and Protection Act, and after holding a public hearing on, July 30, 2014, hereby adopts the following revised rules and regulations governing the use of groundwater in Groundwater Management Area #1, activities related to the management of nonpoint source groundwater contamination in Groundwater Management Area #2 and the Upper Platte River Basin Integrated Management Area.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 2 – APPLICATION OF THESE RULES AND REGULATIONS

- 01 Rules and Regulations for GWMA#1 and GWMA#2 Rule 5, Chapters 1 through 7 shall apply to Groundwater Management Area #1 (Quantity), Groundwater Management Area #2 (Quality) and the Upper Platte River Basin Integrated Management Area.
- 02 Rules and Regulations for GWMA#1 –
 Rule 5, Chapters 8 through 17 and Chapter 25 shall apply to Groundwater
 Management Area #1 only,
 - 02.01 Rule 5, Chapter 11 shall also apply to the Upper Platte River Basin Integrated Management Area.
- 03 Rules and Regulations for GWMA#2 Rule 5, Chapters 18 through 22 shall apply to Groundwater Management Area #2 only.
- 04 Rules and Regulations for Upper Platte River Basin Integrated Management Area Rule 5, Chapter 23 shall apply to the Upper Platte River Basin Integrated Management Area only.
- O5 Rules and Regulations for the Hastings Wellhead Protection Groundwater
 Management Area –
 Rule 5, Chapter 24 shall apply to that portion of the Hastings Wellhead Protection
 Groundwater Management Area that lies within the boundaries of the Upper Big
 Blue NRD only.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 3 – EFFECTIVE DATE OF THESE RULES AND REGULATIONS

- 01 Effective date -
 - These rules and regulations are effective commencing on, October 1, 2014 and shall remain in full force and effect until revised, repealed, amended or superseded.
- 02 Previous rules and regulations superseded All previous Groundwater Management Area Rules and Regulations are hereby superseded.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

01 Abandoned water well -

Abandoned water well means any water well, the use of which has been accomplished or permanently discontinued, which has been decommissioned as described in the rules and regulations of the Nebraska Department of Health and Human Services Regulation and Licensure, and the owner of which has filed a notice of abandonment with the Nebraska Department of Natural Resources.

02 Acre inch -

Acre inch means the amount of water that will cover one (1) surface acre to the depth of one (1) inch.

02.01 For the purposes of these rules and regulations one (1) acre inch is equal to twenty-seven thousand one hundred fifty-four (27,154) gallons.

03 Allocation -

Allocation means the apportioning of groundwater.

04 Board or Board of Directors -

Board or Board of Directors means the Board of Directors of the Upper Big Blue Natural Resources District acting in its official capacity.

05 Certified groundwater use acre -

Certified groundwater use acre means a groundwater use acre certified by the Board for the application of groundwater pursuant to these rules and regulations.

06 Decommission -

Decommission means the complete filling and sealing of a water well cavity in accordance with the rules and regulations adopted pursuant to the Water Well Standards and Contractors' Licensing Act.

07 District -

District means the Upper Big Blue Natural Resources District or other administrative agency or organization designated by the Board of Directors to carry out these rules and regulations.

08 District groundwater level -

District groundwater level means the average level of the surface of the groundwater table in GWMA#1 as determined in accordance with Rule 5, Chapter 9

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

of these rules and regulations.

09 Field -

Field means land controlled by one Operator in a tract, or in adjoining tracts, where the same cropping sequence and irrigation practice (i.e. irrigated or dryland) occurs in two (2) consecutive growing seasons.

10 Flow meter –

Flow meter or meter means a device of a type and design approved by the District and installed in connection with the use of a water well that, when properly installed, measures the quantity and rate of groundwater withdrawn.

11 Government survey section -

Government survey section means a section of land approximately one (1) square mile in size as defined by the United States Government Survey System of towns, ranges, sections, quarter sections, etc.

12 Groundwater -

Groundwater means water that occurs, moves, seeps, filters or percolates through the ground under the surface of the land.

13 Groundwater Management Area #1 –

Groundwater Management Area #1 or GWMA #1 means the area designated for the management of groundwater quantity.

13.01 A map showing the geographic area and the legal description of GWMA #1 are attached hereto as Appendix A and B respectively and incorporated herein by reference.

14 Groundwater Management Area #2 –

Groundwater Management Area #2 or GWMA #2 means the area designated for the management of groundwater quality.

14.01 GWMA #2 includes the entire Upper Big Blue Natural Resources District.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

15 Groundwater use acre -

Groundwater use acre means an acre of land that a Groundwater User wants to apply groundwater to, pursuant to these rules and regulations.

16 Groundwater transfer -

Groundwater transfer or transfer of groundwater means the conveyance of groundwater from a water well or water wells located in one government survey section to be used for a beneficial purpose in another government survey section.

17 Groundwater use period –

Groundwater use period means a period of years designated by the Board for which an allocation is set.

16.01 The first groundwater use period shall begin on the effective date of Rule 5, Chapters 15 through 17.

18 Groundwater User –

Groundwater User means a person that withdraws groundwater.

- 18.01 Agricultural User means a Groundwater User that uses groundwater for irrigation, recreation, wildlife or any uses that require the application of groundwater to the surface of the land.
- 18.02 Municipal User means a Groundwater User that is an incorporated city or village, rural water district or sanitary improvement district that withdraws groundwater from a water well to serve its customers.
- 18.03 Other User means a Groundwater User that uses groundwater for purposes other than those described in the definitions of agricultural and Municipal Users
 - 18.03a Other user shall include a customer of a Municipal User that uses groundwater for manufacturing at a maximum rate greater than 50 gallons per minute.
- 19 Hastings Wellhead Protection Groundwater Management Area Hastings Wellhead Protection Groundwater Management Area means that area within the District designated in the Hastings Wellhead Protection Groundwater Management Area Action Plan.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

20 High Risk Groundwater Area –

High Risk Groundwater Area means part of the District which the Board has designated due to limitations on the availability of groundwater. The legal description of the High Risk Groundwater Area is incorporated in District Rule 5 as Appendix D.

21 Illegal water well -

Illegal water well means:

- 21.01 A water well operated or constructed without, or in violation of, a permit or
- 21.02 A water well that is not properly registered in accordance with the provisions of Nebraska Revised Statutes. ¶ 46-602, including domestic water wells constructed on or after September 9, 1993, or
- 21.03 A water well constructed or operated in violation of the Water Well Standards and Contractor's Licensing Act or
- 21.04 A replacement water well constructed or operated in the place of a water well that has not been properly decommissioned in violation of the Water Well Standards and Contractor's Licensing Act or
- 21.05 A water well not in compliance with any other applicable laws of the State of Nebraska or with any provisions of these rules and regulations.

22 Integrated management area -

Integrated management area means that portion of the District designated by the Department of Natural Resources as hydrologically connected to the fully appropriated Upper Platte River Basin.

22.01 A map showing the Integrated Management Area is attached hereto as Appendix C.

23 Management zone –

Management zone means a geographic area designated by the Board of Directors.

24 Monitoring well –

Monitoring well means a water well from which the District or other public agency collects groundwater samples.

25 Nitrogen Fertilizer -

Nitrogen Fertilizer means a chemical compound in which the percentage of nitrogen

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

is greater than the percentage of any other nutrient in the compound and, when applied, results in an average application rate of more than twenty five (25) pounds of nitrogen per acre over the field to which it is being applied.

26 Nonpoint source –

Nonpoint source means any source of pollution resulting from the dissolution and disbursement of widespread, relatively uniform contaminants of a nonspecific origin.

27 Observation well -

Observation well means a water well measured by the District or other public agency to determine changes in the groundwater level.

28 Operator –

Operator means a person, partnership, association, corporation, municipality or other entity which operates irrigated or dryland properties for the production of agricultural, horticultural, silvicultural, nursery products or aquiculture.

29 Parcel of land -

Parcel of land or parcel means a description of property formally set forth in a conveyance, together with the boundaries thereof, so that it may be easily identified.

30 Permit -

Permit means a document obtained, in accordance with the Nebraska Groundwater Management and Protection Act and these rules and regulations, authorizing the construction or modification of a water well or its use.

- 30.01 An Initial Permit may be issued for construction of a new water well, or modification of an existing water well for which a permit was not previously issued.
- 30.02 A Supplemental Permit may be issued for modification of, or increased groundwater withdrawal from, an existing water well.
- 30.03 A Late Permit may be issued when a water well was illegally constructed or modified without first receiving an Initial or Supplemental Permit.

31 Permit holder –

Permit holder means a person that has been issued a permit in accordance with Rule 5, Chapter 5.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

32 Person -

Person means a natural person, personal representative, trustee, guardian, conservator, partnership, association, corporation, municipality, irrigation district, agency or political subdivision of the State of Nebraska.

33 Tract of land -

Tract of land or tract means the legally deeded property of a person that is contiguous and lies within one government survey section.

- 33.01 Destination tract means a tract of land that groundwater is being transferred to.
- 33.02 Source tract means a tract of land that groundwater is being transferred from.

34 Water well -

Water well means an artificial opening or excavation in the ground from which groundwater flows under natural pressure or is artificially withdrawn.

- 34.01 Except as provided in Rule 5, Chapter 25, ¶ 02.04a, water wells that are commingled, combined, clustered, or joined shall be considered one (1) water well.
 - 34.01a Water wells with a capacity of less than fifty (50) gallons per minute are considered to be commingled, combined, clustered, or joined with any other water well when the wells use a common pipeline or water storage facility or, are located on the same tract and are used for a similar or related purpose, and are within one thousand (1,000) feet of the other water well.
- 34.02 A water well with a capacity of fifty (50) gallons per minute or less is not subject to these rules and regulations unless otherwise indicated.
 - 34.02a A water well, that withdraws groundwater that is returned to the aquifer of origin by injection into an injection well is exempt as provided in Rule 5, Chapter 4 ¶ 34.02 if the following provisions are met.
 - 34.02a1 The injection well must be no more than one thousand (1.000) feet from the water well.
 - 34.02a2 The maximum water loss from withdrawal to injection must be fifty (50) gallons per minute or less.
- 34.03 Artesian water well means a water well constructed into a confined aquifer

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 4 – DEFINITIONS THAT APPLY TO THESE RULES AND REGULATIONS

- containing groundwater under natural pressure that is sufficient to cause water to reach the ground surface.
- 34.04 Domestic water well means a water well that provides ground water required for human needs as it relates to health, fire control, and sanitation.
- 34.05 Municipal water well means a public water supply well owned and operated by a city, village, municipal corporation, or sanitary improvement district that provides water to the public fit for human consumption through at least 15 service connections, or regularly serves at least 25 individuals.
- 34.06 Source water well means a water well located on a source tract that provides groundwater for the purpose of a groundwater transfer.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 5 – WATER WELLS

- O1 Construction, decommissioning and temporary capping of water wells –
 Any person that owns or controls land upon which the construction,
 decommissioning or temporary capping of a water well is to be accomplished, shall
 accomplish such tasks in accordance with the Water Well Standards and
 Contractor's Licensing Act and the regulations adopted pursuant thereto.
 - 01.01 Any person that owns or controls land upon which an abandoned water well is located shall notify the District within sixty (60) days after decommissioning has been completed.
 - 01.02 Artesian water wells constructed on or after July 1, 2013 must be operated in such a manner as to prevent groundwater from the well to flow out and run to waste in an amount that exceeds what will flow through a pipe one-half of one inch (1/2") in diameter.
 - 01.03 Artesian water wells constructed prior to July 1, 2013 may continue to operate as constructed until such time that the allocation provisions of Rule 5, Chapters 15, 16 and 17 are implemented. Upon implementation of Rule 5, Chapters 15, 16 and 17, artesian water wells must be operated in such a manner as to prevent groundwater from a well to flow out and run to waste in an amount that exceeds what will flow through a pipe one-half of one inch (1/2") in diameter.
 - 01.04 An artesian water well decommissioned after July 1, 2013 must be decommissioned in such a manner as to stop the flow of groundwater to waste.
- 02 Information required on a permit application -

In addition to the requirements of Nebraska Revised Statutes ¶ 46-735, each application for an Initial, Supplemental or Late Permit shall include all additional information deemed necessary by the District to determine compliance with these rules and regulations.

- 03 When a permit is required
 - Any person that undertakes any of the following activities shall, before commencing such activity, apply for and receive an Initial or Supplemental Permit from the District:
 - 03.01 Construction of a water well designed and constructed to pump more than fifty (50) gallons per minute.
 - 03.02 Construction of a water well designed to pump fifty (50) gallons per minute

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 5 – WATER WELLS

or less, if such water well is to be commingled, combined, clustered, or joined with any other water well or wells in a manner that will cause the total capacity of said water wells to be more than fifty(50) gallons per minute.

03.02a Water wells used solely to water range livestock are exempt from Rule 5, Chapter 5 ¶ 03.02.

- 03.03 Modification of a water well for which a permit was not required, into one for which a permit would be required.
- 03.04 Use of a water well to transfer groundwater as provided in Rule 5, Chapter 11.
- 03.05 Construction of a water well or wells on a parcel or parcels of land for the purpose of groundwater withdrawal in the amount of five hundred (500) acre feet or more each year.
- 03.06 Increasing the groundwater withdrawal from an existing water well or wells on a parcel or parcels of land to five hundred (500) acre feet or more each year, or in the case of an existing water well or wells on a parcel or parcels of land that currently withdraw five hundred (500) or more acre feet each year, increasing groundwater withdrawal by an additional two hundred and fifty (250) acre feet or more each year.
- 04 All sources of groundwater withdrawal must be included For the purposes of Rule 5, Chapter 5, ¶ 03 all sources of groundwater withdrawal wherever located, which are combined or proposed to be combined for the intended use must be included, without regard to ownership or control of the water wells.
- 05 Hydrologic evaluation required -

When the withdrawal of groundwater by any person requires an Initial or Supplemental Permit from the District under Rule 5, Chapter 5, ¶ 03.05 or ¶ 03.06, such person shall, in addition to the information required on the application, provide the District with a hydrologic evaluation, conducted at permittee's expense, showing the impact, if any, of the intended withdrawal on current Groundwater Users and a minimum twenty (20) year impact on the groundwater table for potential future uses.

05.01 In addition to the required non refundable permit fee, the applicant shall reimburse the District for its actual costs expended for peer review and assessment of the hydrologic evaluation subsequent to the first review. A five-thousand (5,000) dollar deposit shall be paid to the District prior to the second review. Any additional costs shall be paid prior to issuing a permit.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 5 – WATER WELLS

The applicant will be reimbursed any unused portion of the deposit.

06 Consideration of Permits -

All applications for a permit will be reviewed by the District. The District will approve, approve with conditions, deny, or request additional information before action on the application based on the following:

- 06.01 The use of accepted methods in conducting the hydrologic evaluation.
- 06.02 Satisfactory compliance with District rules and regulations.
- 06.03 The goals and objectives of these rules and regulations (Rule 5 Chapter 8).
- 06.04 Preference of use as follows: 1) domestic, 2) agriculture and 3) manufacturing and industry in accordance with Nebraska Revised Statutes ¶ 46-613.
- 06.05 Reasonable probability of adversely impacting other groundwater or surface water users.
- 06.06 Any adverse impacts on the State's ability to comply with an interstate compact or decree or to fulfill the provisions of any other formal state contract or agreement.
- 06.07 Protection of the public's interest and welfare.

07 Groundwater withdrawal shall mean -

For the purposes of Rule 5, Chapter 5, groundwater withdrawal shall mean the total groundwater pumped, less any water returned to the aquifer through an injection well within one thousand (1,000) feet of the source.

07.01 Injection wells that return water to the aquifer must comply with federal, state and local rules and regulations governing such activities.

08 Waivers of liability considered -

Waivers of liability obtained from potentially impacted Groundwater Users will be considered by the District when determining whether to grant or deny a permit.

09 Flow meter required -

All water wells must be equipped with a District approved flow meter in accordance with Rule 5, Chapter 14, prior to groundwater withdrawal if any of the following conditions are met:

- 09.01 Allocation per Rule 5, Chapters 15, 16 and 17 becomes effective.
- 09.02 By January 1, 2016, per Rule 5, Chapter 14.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 5 – WATER WELLS

09.03 A permit is issued for construction or modification of a water well after March 1, 2004.

10 Exempt water wells -

No permit shall be required for test holes or dewatering wells with an intended use of ninety (90) days or less, or for a single water well designed and constructed to pump fifty (50) gallons per minute or less.

11 Permit no exemption from liability –

The issuance of a permit by the District, as provided for in Rule 5, Chapter 5, should not be construed by the applicant to exempt him or her from any liability which may result from the withdrawal of groundwater.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 6 – MISCELLANEOUS PROVISIONS AND REQUIREMENTS

- 01 Enforcement of these rules and regulations -
 - These rules and regulations will be enforced by cease and desist orders entered by the Board, in accordance with District Rules 3 and 4, and by bringing an appropriate action in the district court in the county where the violation occurs.
- 02 Appeal -

A person aggrieved by a ruling of the Board concerning a matter contained in these rules and regulations shall have a right to request a formal adjudicatory hearing in accordance with District Rule 3.

- O3 Situations not covered by these rules and regulations –

 The Board may consider situations not covered by these rules and regulations on a case by case basis.
- 04 Necessary forms provided by the District –
 The District will provide the Groundwater User with the forms necessary to report information required by these rules and regulations.
- 05 Severability -
 - If a rule or part of a rule herein is declared invalid or unconstitutional by a court of competent jurisdiction, such declaration will not affect the validity or constitutionality of the remaining rules or portions thereof.
- 06 Rules and Regulations not an exemption from state laws Nothing contained in these rules and regulations shall exempt a person from the provisions of applicable state laws.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 GROUNDWATER MANAGEMENT AREA #2 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 7 - REQUEST FOR VARIANCE

UT Information required	ation required -	Information	01
-------------------------	------------------	-------------	----

A request for a variance shall include the following:

- 01.01 A citation of the provisions of Rule 5 for which the variance is requested.
- 01.02 A map or sketch showing the location of lands and/or water wells that would be affected by the variance.
 - 01.02a If the request for a variance is for well spacing, the sketch must include measured distances from the proposed water well to any affected water wells.
- 01.03 An explanation as to why the variance is needed including:
 - 01.03a How the person making applications for the variance would be affected if the variance is not granted, and
 - 01.03b Alternatives considered, including why each alternative was rejected in lieu of a variance.
- 01.04 The name and address of all landowners adjacent to the location of the requested variance.
- 01.05 A written waiver of objections signed by adjacent landowner(s) or water well owner(s) that would be directly affected by the granting of a variance.
- 01.06 Any other information the person making the request shall deem relevant.
- 01.07 Any other information deemed necessary by the District.
- 01.08 A \$100 non refundable application fee payable to the Upper Big Blue Natural Resources District.
- 02 Applicant shall appear before the Water and Regulations Committee –
 The person applying for a variance shall appear before the District's Water and
 Regulations Committee to present the reasons for the variance.
- 03 Requests considered on case by case basis Requests for variances shall be considered by the Board on a case by case basis.
- 04 Grantee must agree to conditions for granting a variance –

 If a variance is granted, the grantee shall sign an affidavit agreeing to all terms and conditions of the variance.
 - 04.01 The District may require the affidavit to be recorded with the Register of Deeds by the District.
 - 04.01a The recorded affidavit will be attached to all properties affected by the variance.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 8 – GOALS AND OBJECTIVES OF THESE REGULATIONS

01 The objective of promulgating these rules and regulations –

The objective of promulgating these rules and regulations is to encourage, promote and regulate the efficient management and conservation of groundwater and maintain an adequate groundwater supply for the foreseeable future.

02 Long term goal of the District -

The long term goal of the District is to hold the District groundwater level above the 1978 District groundwater level through various programs sponsored by the District and through the requirements of Rule 5, Chapters 1 through 11 of these rules and regulations.

03 Groundwater withdrawal reporting trigger -

When the District groundwater level, as defined in Rule 5, Chapter 9, falls below a level that is three (3) feet above the 1978 District groundwater level, Rule 5, Chapters 12, 13 and 14 shall be implemented.

- 03.01 Implementation of Rule 5, Chapters 12, 13 and 14 will continue until it is discontinued by the Board through amendments to Rule 5 in accordance with the requirements of state law.
- 04 Groundwater allocation trigger -

When the District groundwater level falls below the 1978 District groundwater level, Rule 5, Chapters 15, 16 and 17 of these rules and regulations will be implemented and shall become effective on January 1 of the following year.

05 Groundwater use period and allocation –

The Board will set the duration of the groundwater use period and allocation amount by September 1 prior to the start of the initial and each subsequent groundwater use period.

- 05.01 The groundwater use period and allocation will be set by amendments to Rule 5 in accordance with the requirements of state law.
- 05.02 Initial Groundwater Use Period -

The first groundwater use period shall begin upon the implementation of Rule 5, Chapters 15, 16 and 17 of these rules and regulations as described in Rule 5, Chapter 8, ¶ 04, for period of thirty-six (36) months.

05.02a The second groundwater use period shall be for a period of sixty (60) months.

05.03 Groundwater Allocation -

The groundwater allocation for the first groundwater use period shall be

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 8 – GOALS AND OBJECTIVES OF THESE REGULATIONS

thirty (30) inches per certified groundwater use acre.

05.03a The groundwater allocation for the second groundwater use period shall be forty-five (45) inches per certified groundwater use acre.

06 Discontinuance of allocation -

If the District groundwater level, determined for the final year of a groundwater use period, has risen to a level that is more than three (3) feet above the 1978 District groundwater level, implementation of Rule 5, Chapters 15, 16 and 17 will be suspended. The Board may consider suspending allocation for the final year of the current allocation period.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 9 – DETERMINATION OF DISTRICT GROUNDWATER LEVELS

- 01 How average annual groundwater level change is determined –
 The average annual groundwater level change is determined annually by comparing
 the spring groundwater level measurements taken from observation wells to
 measurements taken in the spring of the following year.
- O2 How District groundwater level is determined –
 The average annual groundwater level change is added to the average groundwater level changes of previous years to determine the District groundwater level.
 - 02.01 The spring 1962 groundwater level measurements are the base from which the District calculated the first District groundwater level. The base is assumed to be zero (0).
 - O2.02 The District groundwater level for each year is referred to as the groundwater level for the year preceding the year in which the spring groundwater level measurements are taken. For example, the 1978 District groundwater level is the District groundwater level as it was determined from the groundwater level measurements taken in the spring of 1979.

 O2.02a The 1978 District groundwater level was determined to be 6.33 feet below the base level.
- O3 Determination of area represented by each observation well –

 The area represented by each observation well is determined by its location in relationship to other observation wells using the Thiessen weighting method.
- 04 Observation wells measured determined by the District Observation wells used in the calculation of the District groundwater level are determined by the District.
 - 04.01 The District will attempt to use measurements from the same observation wells each year, however an observation well may be decommissioned and it may become necessary to find another water well in the area that is available for measurement.

GENERAL REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 10 – WATER WELL SPACING

- 01 All water wells constructed after the effective date of Rule 5 must comply with the well spacing requirements of Rule 5, Chapter 10. A water well constructed in the High Risk Groundwater Area must also meet the provisions of Rule 5, Chapter 10 and Chapter 25.
 - 01.01 When the provisions of Chapters 10 and Chapter 25 conflict, Chapter 25 shall prevail.
- 02 Well spacing required -

A water well constructed after the effective date of Rule 5, must be located at least one thousand (1,000) feet from any other water well under different ownership.

- 03 Replacement well spacing, special conditions When a water well located less than one thousand (1,000) feet from a water well under different ownership is replaced, the replacement water well may be constructed no more than fifty (50) feet closer to the water well under different ownership.
- 04 Illegal water wells not protected –

Illegal water wells are not protected by the provisions of Rule 5, Chapter 10.

- O4.01 The failure of a person to update water well ownership and irrigated acres records shall not jeopardize the well spacing protection provided under Rule 5, Chapter 10 unless the District determines that said person has knowingly attempted to deceive the District or has failed to act in good faith in matters pertaining to these rules and regulations.
- 05 Spacing for commingled water wells -

When water wells are commingled, combined, clustered, or joined and have a combined total capacity of more than fifty (50) gallons per minute, each water well shall comply with all provisions of Rule 5, Chapter 10.

06 Water well spacing exemption -

A water well with a pumping capacity of less than 100 gallons per minute, constructed between March 1, 1979 and February 29, 2004 is not subject to the well spacing provisions of Rule 5, Chapter 10.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 11 – GROUNDWATER TRANSFERS

- 01 On or after June 21, 2007 a person who intends to transfer groundwater from an overlying tract, shall apply for a transfer authorization on forms provided by the District
 - 01.01 A non-refundable application fee of fifty (50) dollars payable to the District shall accompany all requests for a groundwater transfer to cover costs associated with its review.

02 Transfers for Agricultural Users -

- 02.01 The District will consider a request for a new groundwater transfer by an Agricultural User, as defined in Rule 5, Chapter 4 ¶ 18.01, when the following criteria are met:
 - 02.01a the destination tract is directly adjacent or diagonal to the source tract, and
 - 02.01b at its closest point, the destination tract is not more than three thousand (3,000) feet from the source well, and
 - 02.01c the source well is at least one thousand (1,000) feet from all other water wells under separate ownership, including water well that have a pumping capacity of fifty (50) gallons per minute or less, and
 - 02.01d the groundwater use acres in the destination tract is limited to an amount less than or equal to the total number of acres in the source tract, and
 - 02.01e the total transfer from the source tract shall not apply groundwater to more than one-hundred and sixty (160) acres.
 - 02.01f On or after July 1, 2013 agricultural groundwater transfers are prohibited into, out of or within the "High Risk Groundwater Area" attached as Rule 5 Appendix D.

03 Transfers for uses for Municipal and Other Users -

- 03.01 A Municipal User or Other User, as defined in Rule 5, Chapter 4 ¶ 18.02 and ¶ 18.03, shall only be allowed to initiate new groundwater transfers to a government survey section that is directly adjacent or diagonal to the source tract.
- 03.02 Transfers proposing to withdraw more than two-hundred and fifty (250) acre feet annually shall conduct a hydrologic evaluation as provided in Rule 5, Chapter. 5, ¶ 05.

04 Report of Title Required -

04.01 A report of title must accompany the application if the proposed transfer

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 11 – GROUNDWATER TRANSFERS

- involves groundwater use in the integrated management area.
- 04.02 The report of title must be issued by an attorney or a registered abstracter, on a form prescribed by the District.
- 04.03 The report must include the following:
 - 04.03a the owner and legal description of the land from which the certified groundwater uses or certified irrigated acres are to be transferred, and
 - 04.03b the existence of all liens, evidenced by the filing of a mortgage, trust deed, or other equivalent consensual security interest, against the land from which the certified water uses or certified irrigated acres are to be transferred and the name and address of each such lien holder, if any.
 - 04.03c If the report of title reflects the existence of any lien evidenced by the filing of a mortgage, trust deed, or other equivalent consensual security interest, written consent to such transfer shall be obtained from each such lien holder.
- 04.04 The district may assess a fee against the person seeking such transfer to recoup its costs in reviewing the report of title.
- 05 In determining whether to grant a permit under Rule 5, Chapter 11, the Board of Directors shall consider the following
 - 05.01 Whether the proposed use is a beneficial use of groundwater;
 - 05.02 The availability to the applicant of alternative sources of surface water or groundwater for the proposed withdrawal, transport, and use;
 - O5.03 Any negative effect of the proposed withdrawal, transport, and use on groundwater supplies needed to meet present or reasonable future demands for water in the area of the proposed withdrawal, transport, and use, to comply with any interstate compact or decree, or to fulfill the provisions of any other formal state contract or agreement;
 - O5.04 Any negative effect of the proposed withdrawal, transport, and use on surface water supplies needed to meet present or reasonable future demands for water within the state, to comply with any interstate compact or decree, or to fulfill the provisions of any other formal state contract or agreement:
 - 05.05 Any adverse environmental effect of the proposed withdrawal, transport, and use of the groundwater;
 - 05.06 The cumulative effects of the proposed withdrawal, transport, and use

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 11 – GROUNDWATER TRANSFERS

- relative to the matters listed in Rule 5, Chapter 11, ¶ 05.03 through ¶ 05.05 of this section when considered in conjunction with all other withdrawals, transports, and uses subject to this section;
- 05.07 Whether the proposed withdrawal, transport, and use is consistent with the district's groundwater quantity and quality management plan and with any integrated management plan previously adopted or being considered for adoption in accordance with sections Nebraska Revised Statutes 46-713 to 46-719: and
- 05.08 Any other factors consistent with the purposes of these rules and regulations which the board of directors deems relevant to protect the interests of the state and its citizens.
- Of Issuance of a permit shall be conditioned on the applicant's compliance Issuance of a permit shall be conditioned on the applicant's compliance with the rules and regulations of the natural resources district from which the water is to be withdrawn and, if the location where the water is to be used to produce the intended benefits is in a different natural resources district, with the rules and regulations of that natural resources district. The Board of Directors may include such reasonable conditions on the proposed withdrawal, transport, and use as it deems necessary to carry out the purposes of this section.
- 07 The applicant shall be required to provide access to their property –
 The applicant shall be required to provide access to their property at reasonable times for purposes of inspection by officials of any district where the water is to be withdrawn or to be used.
- 08 New transfers of groundwater prohibited when allocation has been established New transfers of groundwater from within the District where a groundwater allocation has been established, is prohibited.
- 09 Not exempt from applicable state laws –
 Nothing in Rule 5, Chapter 11 shall exempt a person from the provisions of applicable state laws regarding groundwater transfers.
- 10 Transfers exempt from Rule 5, Chapter 11 –
 The following types of transfers are exempt from Rule 5, Chapter 11:
 - 10.01 A Groundwater transfer authorized by the Municipal Rural Domestic Ground Water Transfers Permit Act.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1 UPPER PLATTE RIVER BASIN INTEGRATED MANAGEMENT AREA

CHAPTER 11 – GROUNDWATER TRANSFERS

- 10.02 Transfer of groundwater that was started prior to August 1, 2007.
- 10.03 The physical transfer of groundwater within the same government survey section.
- 10.04 Groundwater transfer within the corporate limits of a municipality.

11 Authorization Revoked.

The District may revoke a groundwater transfer authorization if the Groundwater User does not comply with the provisions of Rule 5, Chapter 11 including any conditions placed on the groundwater transfer authorization at the time of issuance.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 12 – CERTIFICATION OF GROUNDWATER USE ACRES AND WATER WELLS

01 Public warning of groundwater declines -

The District shall issue a public notice warning Groundwater Users that groundwater use restrictions will be implemented if the District groundwater level falls below the 1978 District groundwater level.

02 Agricultural Users must report -

By March 1 after the issuance of the public notice described in Rule 5, Chapter 12, ¶ 01, an Agricultural User must report the following:

- 02.01 The number and location of groundwater use acres.
- 02.02 The water wells under their control.
- O2.03 A copy of the most recent property tax statement, or other documentation from the county assessor showing irrigated acres, must be attached.
 - 02.03a For tax exempt groundwater use acres, the Groundwater User shall provide available documentation as deemed necessary by the District.
- 02.04 Any other information deemed necessary by the District.

03 Board will certify groundwater use acres -

The Board will certify the number of groundwater use acres for each Agricultural User based on the county assessor's records.

- 03.01 The Board will certify tax exempt groundwater use acres based on available information.
- 03.02 The Board will consider new requests for certification of groundwater use acres monthly.
- 03.03 The Board may consider adjustment to certified groundwater use acres based on evidence presented by the Groundwater User.

04 Units of groundwater use acres -

The certified groundwater use acres under the control of the same Agricultural User in the same government survey section and/or irrigated by the same water well shall be considered one (1) unit for the purposes of allocation.

04.01 The owner of the land shall be considered the Agricultural User in control of groundwater withdrawal unless their land is included in a pooling agreement.

05 Pooling agreements -

Pooling agreements will be permitted between Agricultural Users and units of

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 12 – CERTIFICATION OF GROUNDWATER USE ACRES AND WATER WELLS

groundwater use acres under the following conditions:

- 05.01 Groundwater use acres served by the same water well which are under the control of two or more Agricultural Users shall be pooled unless the groundwater withdrawn by each Agricultural User is measured by a different flow meter.
- 05.02 Groundwater use acres in the same farming operation may be pooled.
- 05.03 The pooling agreement shall designate the water wells and groundwater use acres included in the pool. The pooling agreement shall also designate the person or persons responsible for all reporting of groundwater withdrawal and other information required by the District.
- 05.04 A new pooling agreement, or amendments to an existing pooling agreement, must be submitted to the District by March 1.
- 05.05 All Agricultural Users with groundwater use acres included in the pooling agreement must sign the agreement or provide appropriate power of attorney.
- 05.06 Certified groundwater use acres which have exhausted their allocation shall not be added to a pooling agreement.

06 Municipal Users must report -

- By March 1, after the issuance of the public notice described in Rule 5, Chapter 12, ¶ 01, a Municipal User must report the following information to the District:
- 06.01 The water wells operated by the Municipal User.
- 06.02 The total acreage within the municipal jurisdictional limits.
- 06.03 The irrigated agricultural acreage within the municipal jurisdictional limits.
- 06.04 The dryland agricultural acreage within the municipal jurisdictional limits.
- 06.05 Any acreage outside the municipal jurisdictional limits served by the municipal water supply system.
- 06.06 The municipality's population according to the most recent federal census.
- 06.07 The number of people served by the municipal water supply system.
- 06.08 Any other information deemed necessary by the District.

07 Other Users must report -

- By March 1 after the issuance of the public notice described in Rule 5, Chapter 12, ¶ 01, the Other User must report the following information to the District:
- 07.01 The water wells under the User's control.
- 07.02 The purpose of the groundwater withdrawal.
- 07.03 Historic annual groundwater withdrawal, if known.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 12 – CERTIFICATION OF GROUNDWATER USE ACRES AND WATER WELLS

- 08 Groundwater User must report changes in information –
 A Groundwater User must report any changes or additions to the information required in Rule 5, Chapter 12 within sixty (60) days.
- O9 Penalty for failure to report –

 The failure to report any information required by Rule 5, Chapter 12 may result in the issuance of a cease and desist order denying the withdrawal of groundwater.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 13 – ANNUAL GROUNDWATER USE REPORTS

- 01 Agricultural User groundwater withdrawal report required -
 - By December 1 of each year, an Agricultural User shall report the groundwater withdrawal from each water well he or she controlled during the twelve (12) months ending October 31.
 - 01.01 A Groundwater User's first report shall be due on December 1, following the initial information report required by Rule 5, Chapter 13.
 - 01.02 The totalizer reading for each flow meter must be included on the report.1.02a The totalizer may not be reset or altered without prior approval of the District.
- 02 Municipal and Other User groundwater withdrawal report required –
 By March 1 of each year, a Municipal User and each Other User shall report the
 groundwater withdrawal from each water well he or she controlled during the
 - 02.01 A Groundwater User's first report shall be due on March 1, following the initial information report required by Rule 5, Chapter 13.
 - 02.02 The totalizer reading for each flow meter must be included on the report.
 2.02a The totalizer may not be reset or altered without prior approval of the District.
- 03 Temporary methods of determining withdrawal –

previous calendar year.

- Prior to installation of a flow meter, the Groundwater User shall determine the acre inches of groundwater withdrawal by the hours pumped, multiplied by sixty (60) minutes, multiplied by the gallons per minute capacity of a water well, divided by twenty seven-thousand one hundred fifty four (27,154) gallons (Hours x 60 x G.P.M. ÷ 27,154).
- 03.01 Fuel or electrical consumption may provide information on actual hours pumped.
- 04 Assistance to determine groundwater withdrawal Upon request, the District will assist Groundwater Users in determining annual groundwater withdrawal.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 14 – WATER MEASURMENT REQUIREMENTS

01 Flow meters installed -

A flow meter shall be installed on all functional water wells prior to being used to withdraw groundwater, upon implementation of Rule 5, Chapters 15, 16 and 17 or by January 1, 2016, whichever occurs first.

01.01 A water well shall be considered functional if it is equipped with a pump.

02 All Groundwater withdrawal must be measured -

When a flow meter is installed all groundwater withdrawal must be measured.

02.01 Groundwater withdrawals from water wells that are connected by a common pipeline may be measured by one flow meter, provided all groundwater withdrawal is measured.

03 All flow meters installed must be approved -

The flow meter installed must be a brand and/or model approved by the District. The Minimum Specifications for Inclusion on the Approved Flow Meter List are included as Appendix E.

- O3.01 The flow meter must be installed according to manufacturer's specifications.
 O3.01a The flow meter must be installed into the size of pipe for which it was designed.
- 03.02 The flow meter must have a rated accuracy no greater than plus or minus two (2) percent throughout its flow range.
- 03.03 The totalizer shall have sufficient capacity to record the quantity of water measured in one calendar year.
 03.03a The totalizer may not be reset or altered without prior approval of the District.
- 03.04 The flow meter shall be capable of accurately registering the expected operating range of well discharge.
- 03.05 The flow meter must be installed in such a manner that there is a full pipe flow of water at all times while groundwater is being pumped.
- 03.06 The District will consider approval of flow meters installed prior to the implementation of Chapter 14 on a case by case basis.

04 Reporting flow meter installation -

The Groundwater User shall report the installation of a water flow meter in writing on the District's "Report of Flow meter Installation" form, within thirty (30) days after installation.

04.01

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 14 – WATER MEASURMENT REQUIREMENTS

05 Reporting malfunctioning meters -

During an allocation period a malfunctioning flow meter must be reported to the District within one (1) day after discovery.

06 Flow meter maintenance -

The District will inspect flow meters for proper installation and operation.

- 06.01 The Groundwater User shall be responsible for maintenance, repair and/or replacement of an improperly installed or malfunctioning flow meter.
 - 06.01a Maintenance must be done according to the schedule recommended by the manufacturer. If the manufacturer does not have written recommendations for maintenance, the NRD will determine an appropriate maintenance schedule.
 - 06.01b The District may offer maintenance of flow meters.
- 06.02 Removal of a flow meter or seal -
 - The flow meter or seal on a flow meter shall not be removed without prior approval of the District.
- 06.03 The Groundwater User must keep a record of the flow meter totalizer reading and report it to the District when a flow meter is removed for offsite service or replacement.
- 06.04 When a flow meter is removed for repair at a time when the Groundwater User desires to withdraw groundwater, the District may install a temporary flow meter.
 - 06.04a Another District approved method of determining groundwater consumption may be used if a flow meter is not available or cannot be readily installed.
- 06.05 The service provider shall certify in writing that a flow meter meets the manufacturer's specifications following repairs or calibration.
 - 06.05a The Groundwater User shall provide the District with a copy of the certification and the totalizer reading following the repairs.

07 Sealing of flow meters -

Flow meters may be sealed by the District to prevent tampering.

- 07.01 The District may consider whether or not to seal a flow meter when circumstances indicate doing so may cause unnecessary inconvenience for the Groundwater User or the District.
- 08 Random inspection of flow meters -

Flow meters shall be subject to random inspection.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 14 – WATER MEASURMENT REQUIREMENTS

09 Penalty for failure to comply -

A Groundwater User that does not install a flow meter, fails to report, or falsely reports groundwater withdrawal, removes a flow meter or a seal from a flow meter without prior approval of the District, damages or interferes with the operation of a flow meter, neglects to perform required maintenance, or allows another person to do so, shall be subject to forfeiture of allocation according to conditions set by the Board.

10 Variances will be considered -

The District will consider variances in instances where Nebraska Health and Human Services regulations governing municipal water supply systems conflict with these rules and regulations.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 15 – ALLOCATION TO AGRICULTURAL USERS

- 01 Amount of groundwater allocated -
 - Each Agricultural User shall limit groundwater withdrawal to the allocation amount per certified acre determined by the Board as provided in Rule 5, Chapter 8, ¶ 05.
- O2 Transfer of groundwater use acres to a different Groundwater User When the control of certified groundwater use acres is transferred to a different Agricultural User during a groundwater use period, the remaining allocation balance for said acres shall also be transferred to the new Agricultural User.
 - 02.01 If the groundwater use acres are in a pooling agreement, the affected agreements must be amended as provided in Rule 5, Chapter 12.
- 03 Carry Over of Unused Allocation -
 - Remaining allocation during a groundwater use period may be carried over to the next consecutive groundwater use period.
 - 03.01 The maximum carryover shall not exceed ten percent (10%) of the total allocation for the groundwater use period.
- 04 Next allocation set by the Board -
 - The Board will set a new allocation for the next groundwater use period by September 1 prior to the end of each groundwater use period.
 - 08.01 The new allocation will be set by amendments to Rule 5 in accordance with the requirements of state law.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 16 – ALLOCATION TO MUNICIPAL USERS

01 Allocation for Municipal User –

A Municipal User shall limit groundwater withdrawal to an average of two hundred and fifty (250) gallons per capita served per day plus the allocation amount per certified acre determined by the Board as provided in Rule 5, Chapter 8, ¶ 05, for one-third ($^{1}/_{3}$) of the non-agricultural lands within the municipal jurisdictional limits for the groundwater use period.

01.01 A Municipal User shall receive an allocation amount per certified acre determined by the Board as provided in Rule 5, Chapter 8, ¶ 05, for the groundwater use period for irrigated agricultural lands that it serves. This allocation shall be added to the Municipal User's total allocation.

02 Conservation procedures required -

By March 1 after implementation of Rule 5, Chapter 16, the Municipal User shall have adopted an administrative procedure that allows the Municipal User to require water conservation practices and restrict the water use of its customers.

03 Carry Over of Unused Allocation -

Remaining allocation during a groundwater use period may be carried over to the next consecutive groundwater use period.

03.01 The maximum carryover shall not exceed ten percent (10%) of the total allocation for the groundwater use period.

04 Population census used to determine per capita use -

The most recent population census information available from the United States Bureau of Census will be used to determine per capita groundwater use.

04.01 When a Municipal User provides evidence that it delivers water to persons that have not been counted as part of the most recent census or to lands that had not previously been considered, the District shall make adjustments to the Municipal User's allocation to compensate for these added water requirements.

05 Exempted groundwater uses -

Groundwater used for fire protection, water and sewage system maintenance and construction and repairs shall not be considered when calculating annual groundwater withdrawal.

- 05.01 The Municipal User shall provide documentation to estimate such uses.
- 05.02 The District shall consider other exemptions on a case by case basis when requested.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 16 - ALLOCATION TO MUNICIPAL USERS

- 06 A Municipal User must report Other Users which are supplied groundwater A Municipal User shall report to the District any Other User, as described in Rule
 - 5, Chapter 4, ¶ 18.03, which is served by its water system.
 - O6.01 Groundwater delivered to the Other User shall not be considered part of a Municipal User's allocation.
- 07 Allocation adjustments -

When a Municipal User provides evidence that it has begun to serve additional people and/or land, the allocation for these people and/or land, during a groundwater use period shall be based on the actual remaining part of the groundwater use period in which groundwater withdrawal is expected to occur.

- 08 Next allocation set by the Board -
 - The Board will set a new allocation for the next groundwater use period by September 1 prior to the end of each groundwater use period.
 - 08.01 The new allocation will be set by amendments to Rule 5 in accordance with the requirements of state law.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 17 – ALLOCATION TO OTHER USERS

01 Allocation for Other Users -

An Other User shall limit their groundwater withdrawal during the groundwater use period to one-hundred (100) percent of their historic withdrawal.

- 01.01 Historic withdrawal shall be determined based on the average annual withdrawal for the three (3) year period prior to the first groundwater use period.
- 02 New or modified operations requiring additional groundwater –

If, at any time, an Other User desires to start a new operation or modify an existing operation that will require a new or additional allocation, he or she shall request such an allocation. The request shall include:

- 02.01 The quantity of groundwater desired annually.
- 02.02 The purpose for which the groundwater is to be used.
- 02.03 An explanation of operation methods, including water conservation features, for that type of water use.
- 02.04 An estimate of the water use per unit of production, if applicable.
- 02.05 Other information requested by the District.
- 03 Consideration of requests for additional groundwater allocation –

When considering an Other User's request for additional groundwater, the District will approve, approve with conditions, deny, or request additional information before action on the request based on the following:

- 03.01 Satisfactory compliance with District rules and regulations.
- 03.02 The goals and objectives of these rules and regulations (Rule 5 Chapter 8).
- 03.03 Preference of use as follows: 1) domestic, 2) agriculture and 3) manufacturing and industry in accordance with Nebraska Revised Statutes ¶ 46-613.
- 03.04 Reasonable probability of adversely impacting other groundwater or surface water Users.
- 03.05 Protection of the public's interest and welfare.

04 Carry Over of Unused Allocation -

Remaining allocation during a groundwater use period may be carried over to the next consecutive groundwater use period.

- 04.01 The maximum carryover shall not exceed ten percent (10%) of the total allocation for the groundwater use period.
- 05 Next allocation set by the Board -

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #1

CHAPTER 17 – ALLOCATION TO OTHER USERS

The Board will set a new allocation for the next groundwater use period by September 1 prior to the end of each groundwater use period.

- 05.01 The new allocation will be set by amendments to Rule 5 in accordance with the requirements of state law.
- 06 Transfer of groundwater withdrawal to a different Groundwater User When the control of an Other User's withdrawal is transferred to a different Groundwater User during a groundwater use period, the remaining allocation balance for the groundwater use period shall also be transferred to the new Groundwater User.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 18 – PHASE I REQUIREMENTS

- 01 All Operators subject to Phase I requirements All Operators of land within the District are subject to the requirements of Phase I.
- 02 Anhydrous application date Pre-plant anhydrous ammonia may not be applied prior to November 1.
- 03 Other Nitrogen Fertilizer application date Pre-plant Nitrogen Fertilizer in liquid or dry forms may not be applied prior to March 1.
- 04 Fertilizer application exemptions The following fertilizer application activities are exempt from the provisions of Rule
 - 5, Chapter. 18, ¶ 02 and ¶ 03.04.01 The application of nitrogen fertilizer for any purpose other than fertilization
 - for spring planted crops.

 O4.02 The application of Nitrogen Fertilizer for spring planted small grains such as barley, oats and rye.
 - 04.03 The application of fertilizer that is not considered a "Nitrogen Fertilizer" as defined in Rule 5, Chapter 4, ¶ 25.
 - 04.04 The spreading of manure, sewage and other by-products conducted in compliance with state laws and regulations.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 19 - DETERMINATION OF A PHASE II MANAGEMENT AREA

- O1 Determination of a Phase II Management Area A Phase II Management Area will be designated when the median nitrate level, in the District designated monitoring wells, is seven (7) milligrams per liter or more.
- 02 Implementation of a Phase II Management Area –
 No more than one management zone shall be designated a Phase II management area each year.
 - 02.01 If more than one (1) management zone meets the criteria for Phase II designation, the zone with the highest median nitrate shall be designated a Phase II management area.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 20 – PHASE II REQUIREMENTS

- 01 Phase I requirements continued in Phase II All Phase I requirements continue to be in force in Phase II.
- 02 Phase II Operator training -

Within two (2) years following the designation of a Phase II Management Area, all Operators of land in the designated Management Area must attend a Natural Resources District approved training session and be certified by the District.

- 02.01 Training and certification must be renewed every four (4) years.
- 02.02 The District will accept certification by other Natural Resources Districts.
- 02.03 Renewal certification may be received by District approved methods which may include:
 - 02.03a Attending a Natural Resources District approved training session.
 - 02.03b Passing a Natural Resources District approved test.
 - 02.03c Completing a Natural Resources District approved home study course.

03 Phase II soil sampling -

Prior to applying Nitrogen Fertilizer each year, the Operator must obtain analysis for at least one (1) composite, zero to eight inch (0-8") soil sample per field for organic matter and residual nitrogen and one (1) composite eight to twenty-four inch (8-24") soil sample per field for residual nitrogen in years that corn or sorghum will be grown following a non-legume crop and/or when livestock, municipal or industrial waste was applied within the last twelve (12) months.

04 Phase II nitrogen needs calculations -

Prior to applying Nitrogen Fertilizer the Operator must calculate the nitrogen application rate needed for each field.

04.01 Calculations must be based on University of Nebraska recommended procedures and must account for soil analysis and all other nitrogen credits.

05 Phase II irrigation scheduling -

Each Operator must schedule irrigation in one field that is at least 65 acres in size or in their largest irrigated field in the Phase II area by one (1) of the following methods:

- 05.01 Capacitance probes
- 05.02 Resistance blocks
- 05.03 Other methods approved by the District.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 20 – PHASE II REQUIREMENTS

06 Phase II annual reporting required -

By April 1 of each year, each Operator must report information regarding the use of best management practices.

06.01 A copy of the soil analysis must be included with the annual report.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 21 – DETERMINATION OF PHASE III MANAGEMENT AREA

01 Phase III Criteria -

A Phase III Management Area will be designated when the median nitrate level, in the District designated monitoring wells, is equal to or greater than ten (10) milligrams per liter

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 22 – PHASE III REQUIREMENTS

- 01 Phase I and Phase II requirements continued All Phase I and Phase II requirements continue to be in force in Phase III.
- Phase III soil sampling requirements —
 Prior to applying Nitrogen Fertilizer each year, the Operator must obtain analysis for at least one (1) composite, zero to eight inch (0-8") soil sample per forty (40) acres, or any portion thereof, for organic matter and residual nitrogen and one (1) composite eight to twenty-four inch (8-24") soil sample per forty (40) acres, or any portion thereof, for residual nitrogen in years that corn or sorghum will be grown following a non-legume crop and/or when livestock, municipal or industrial waste was applied within the last twelve (12) months.
- O3 Phase III irrigation water nitrate analysis –
 The Operator must have the irrigation water tested for nitrates at least once every three (3) years.
- 04 Fall and winter application of anhydrous ammonia If anhydrous ammonia is applied between November 1 and February 29, a District approved nitrification inhibitor must also be applied at the manufacturer's recommended rate.

REGULATIONS FOR GROUNDWATER MANAGEMENT AREA #2

CHAPTER 23 – UPPER PLATTE BASIN INTEGRATED MANAGEMENT AREA

01 Moratorium on new and expanded uses of groundwater -

A person shall not construct a water well or use an existing water well to develop a new or expand an existing groundwater use unless the District has determined that:

- 01.01 An offset will be provided, or
- 01.02 There will be no increase in the consumptive use of groundwater.
- 02 Permit When required –

In addition to the requirements of Rule 5, Chapter 5, a person desiring to withdraw and/or consumptively use groundwater shall obtain a permit for the following.

- 02.01 Changing the type of groundwater use from an existing water well.
- 02.02 Adding or modifying infrastructure for the purpose of expanding the consumptive use of groundwater.
- 03 Additional Information Required -

In addition to the information required in Rule 5, Chapter 5, a permit application shall include the following:

- 03.01 The source of offset for the proposed groundwater use.
 - 03.01a If the source of the offset is to be transferred from another natural resources district, the applicant must provide evidence that the other district has approved the use of the proposed offset.
 - 03.01b The depletion factor at the source and destination tracts.
- 03.02 If the offset will require the physical transfer of groundwater.
- 03.03 If the proposed activity will result in a change in the type of groundwater use.
- 03.04 Any additional information deemed necessary by the District to determine compliance with these rules and regulations.
- 04 Source of offset limitations -

Groundwater offsets shall comply with the transfer criteria set out in Rule 5, Chapter 11.

REGULATIONS FOR HASTINGS WELLHEAD PROTECTION GROUNDWATER MANAGEMENT AREA

CHAPTER 24 – HASTINGS WELLHEAD PROTECTION GROUNDWATER MANAGEMENT AREA

- 01 When initiated -
 - The following requirements will be initiated on July 1, 2013.
- 02 Nitrogen application requirements -
 - 02.01 Anhydrous ammonia may not be applied prior to November 1.
 - 02.02 A nitrification inhibitor must be applied with all anhydrous ammonia applications made between November 1 and March 1 at the manufacturer's recommended rate.
 - 02.03 Liquid and dry Nitrogen Fertilizers may not be applied between September 1st and March 1.
 - O2.04 All pre-plant Nitrogen Fertilizer applied on or after March 1 at a rate greater than one-hundred (100) pounds of actual nitrogen per acre, must be applied with a nitrification inhibitor at the manufacturer's recommended rate.
 - 02.05 Fertilizer Application Exceptions.
 - The following fertilizer application activities are exempt from the provisions of Rule 5, Chapter 24, ¶ 02.01 through ¶ 02.04.
 - 02.05a The application of Nitrogen Fertilizer for any purpose other than fertilization for spring planted crops.
 - 02.05b The application of Nitrogen Fertilizer for spring planted small grains such as barley, oats, and rye.
 - 02.05c The application of Nitrogen Fertilizer on pastures.
 - 02.05d The application of a fertilizer that is not considered a "Nitrogen Fertilizer" as defined in Rule 5, Chapter 4, ¶ 25.
 - 02.02e The spreading of manure, sewage and other by-products conducted in compliance with state laws and regulations.
 - 02.06 Nitrogen Fertilizer means a chemical compound in which the percentage of nitrogen is greater than the percentage of any other nutrient in the compound or, when applied, results in an average application rate of more than twenty five (25) pounds of nitrogen per acre over the field onto which it is being applied.
- 03 Soil sampling requirements -
 - At least one zero to eight inch (0-8')soil sample per forty (40) acres, or portion thereof, shall be taken and tested for residual nutrients and organic matter each year and at least one eight to twenty-four inch (8-24") soil sample per forty (40) acres, or portion thereof, shall be taken and tested for residual nitrogen each year in which corn or sorghum will be grown following a non-legume crop and/or when livestock,

REGULATIONS FOR HASTINGS WELLHEAD PROTECTION GROUNDWATER MANAGEMENT AREA

CHAPTER 24 – HASTINGS WELLHEAD PROTECTION GROUNDWATER MANAGEMENT AREA

municipal or industrial waste was applied within the last twelve (12) months.

- 03.01 It is recommended that soil samples be collected as described in University of Nebraska NebGuide G1740.
- 03.02 It is recommended that a minimum of eight (8) cores be combined into one (1) sample per each forty (40) acres.
- 03.03 Deep soil sampling (8-24 inches) exemptions will be given for cornsoybeans rotations as referred to by University of Nebraska NebGuide G74-174-A.

04 Irrigation scheduling requirements -

Each Operator must conduct irrigation scheduling on one irrigated field in the management area by soil moisture measurements collected with electrical resistance sensors or similar devices. Other methods may be approved by the NRD.

05 Training requirements –

Within one (1) year of July 1, 2012 all Operators of crop land in the designated Management Area must attend a NRD approved training session and be certified by the NRD. NRD certification must be renewed every four (4) years. The NRD will accept certification by other NRDs. Renewal certification may be received by NRD approved methods. Approved methods may include items such as attending another training session, passing a test or completing an approved home study course.

- 05.01 Who is required to attend
 - 05.01a Yes Owner/Operator
 - 05.01b Yes Operator/Tenant if decision maker
 - 05.01c Yes Family Farm Operator all who make management decisions
 - 05.01d Yes Hired Hand if he or she is responsible for making decisions about fertilizer rates and irrigation operations
 - 05.01e Yes Crop consultants if serving Operators and making recommendations.

06 Annual reporting requirement –

By April 1 of each year, each Operator in the Management Area is required to report information regarding the use of best management practices. Forms will be provided by the NRD. The report must include the following information:

REGULATIONS FOR HASTINGS WELLHEAD PROTECTION GROUNDWATER MANAGEMENT AREA

CHAPTER 24 – HASTINGS WELLHEAD PROTECTION GROUNDWATER MANAGEMENT AREA

- 06.01 The nitrogen application rate must be calculated for each field where corn is grown. Calculations shall be based on University of Nebraska recommended procedures and must account for soil analysis and all other nitrogen credits.
 - 06.01a Nitrogen credits include, but are not limited to
 - 06.02a Irrigation water nitrates (if known)
 - 06.03a Previous crops
 - 06.04a Livestock, municipal and industrial waste
- 06.02 A copy of the soil sample results must accompany the annual report.
- 06.03 Farmers are encouraged to apply no more than the amount of Nitrogen Fertilizer needed as determined by the University of Nebraska recommendation.

07 Lawn care requirements -

Within one (1) year of July 1, 2012 all lawn care services that apply Nitrogen Fertilizer to lawns are required to complete a lawn nitrogen course recommended by the NRD every 4 years

- 07.01 This includes Operators and employees.
- 07.02 Annual reports will be required from all lawn care services on Nitrogen Fertilizer use.
 - 07.02a Reports will be due on December 1st of each year and must include the following:
 - 07.02a1 Total Nitrogen Fertilizer use within the Wellhead Protection Groundwater Management Area
 - 07.02a2 Total number of acres or square footage Nitrogen Fertilizer is applied.
- 07.03 All persons who apply Nitrogen Fertilizer to more than one (1) acre of grass or turf in the Hastings Wellhead Protection Groundwater Management Area are required to attend a lawn nitrogen course or other approved training. This may include web based training. Certification must be renewed every four (4) years
 - 07.03a Certification must be completed within one (1) year of July 1, 2012.
- 07.04 The utilization of mulching mowers and blades are encouraged to reduce the Nitrogen Fertilizer use for lawns.
- 07.05 Soil sampling is encouraged before applying Nitrogen Fertilizer to a lawn or turf.

RULE 5 – UPPER BIG BLUE NATURAL RESOURCES DISTRICT GROUNDWATER MANAGEMENT RULES AND REGULATIONS CHAPTER 25 – HIGH RISK GROUNDWATER AREA

01 NOTICE TO APPLICANT

Review of a permit for construction of a new water well in the High Risk Groundwater Area may require that the District notify the owners of adjacent property and field verification of wells on adjacent property. The applicant should expect the permitting process to take up to thirty (30) days. Applications for replacement wells will be expedited, to the extent possible, between June 1 and September 1.

- 02 A new water well constructed shall meet the following spacing requirements. -
 - 02.01 It must be located at least twelve hundred fifty (1,250) feet from any other water well regardless of ownership.
 - 02.02 It must be located at least two (2) miles (10,560 feet) from any municipal well.
 - 02.03 It must be located at least twelve hundred fifty (1,250) feet from a documented domestic water well under different ownership, including domestic water wells with a pumping capacity of fifty (50) gallons per minute or less.
 - 02.03a A domestic water well shall be considered "documented" if it is registered with the Nebraska Department of Natural Resources or if the District has been notified of its existence and location.
 - 02.04 No more than one (1) water well shall be constructed on a tract, a part of a tract, or tracts of land that are eighty (80) acres or less in size, with a maximum of two (2) water wells per one-hundred sixty (160) acres.
 - 02.04a Each individual water well that is commingled, combined, clustered, or joined with other water wells in a series shall be considered a water well.
 - 02.05 Each existing water well on a tract of land may be replaced.
 - 02.05a When a water well located less than twelve hundred fifty (1,250) feet from another water well or less than two (2) miles (10,560 feet) from a municipal water well is replaced, the replacement water well may be constructed no more than fifty (50) feet closer to the other water well.
 - 02.06 Municipal wells are exempt from Rule 5, Chapter 25, ¶ 02 through ¶ 02.05a.
- 03 Illegal water wells not protected -
 - Illegal water wells are not protected by the provisions of Rule 5, Chapter 25.
 - The failure of a person to update water well ownership and irrigated acres records shall not jeopardize the well spacing protection provided under Rule 5, Chapter 25 unless the District determines that said person has knowingly attempted to deceive the District or has failed to act in good faith in matters pertaining to these rules and regulations.

RULE 5 – UPPER BIG BLUE NATURAL RESOURCES DISTRICT GROUNDWATER MANAGEMENT RULES AND REGULATIONS CHAPTER 25 – HIGH RISK GROUNDWATER AREA

- 04 Municipal Conservation Procedures Required in the High Risk Groundwater Area By March 1 after implementation of Rule 5, Chapter 25, the Municipal User in the High Risk Groundwater Area shall have adopted an administrative procedure that allows the Municipal User to require water conservation practices and restrict the water use of its customers.
- O5 Domestic Water Wells in the High Risk Groundwater Area.

 New or replacement domestic water wells shall be constructed to such a depth that they are less likely to be affected by seasonal water level declines caused by other water wells in the same area. Any person who installs a new or replacement domestic water well shall submit a certification from the water well contractor that the well was constructed in compliance with this section. The certification shall be submitted to the District within 90 days of completing construction.

APPENDIX A

APPENDIX B

Legal Description of the Upper Big Blue NRD Groundwater Management Area 1

Commencing at a point on the Clay-Adams County line at the SW corner of Sec. 7, T7N, R8W of the 6th PM; thence westerly to the SW corner of Sec. 9, T7N, R9W of the 6th PM; thence northerly to the SW corner of Sec. 33, T8N, R9W of the 6th PM; thence westerly to the SW corner of Sec. 34, T8N, R10W of the 6th PM; thence northerly to the SW corner of Sec. 22, T8N, R10W of the 6th PM; thence westerly to the SW corner of Sec. 19, T8N, R10W of the 6th PM; thence northerly to the Adams-Hall County line at the NW corner of Sec. 6, T8N, R10W of the 6th PM; thence easterly along the Adams-Hall County line to the SW corner of Hamilton County at the SW corner of Sec. 31, T9N, R8W of the 6th PM; thence northerly along the Hamilton-Hall County line to its intersection with the middle of the south channel of the Platte River; thence along the middle of said channel to the NW corner of Sec. 6, T11N, R7W of the 6th PM; thence easterly to the NW corner of Sec. 3, T11N, R7W of the 6th PM; thence northerly to the NW corner of Sec. 34, T12N, R7W of the 6th PM; thence easterly to the NW corner of Sec. 31, T12N, R6W of the 6th PM; thence northerly to the NW corner of Sec. 19, T12N, R6W of the 6th PM; thence easterly to the NW corner of Sec. 21, T12N, R6W of the 6th PM; thence northerly to the NW corner of Sec. 16, T12N, R6W of the 6th PM; thence easterly to the NW corner of Sec. 15, T12N, R6W of the 6th PM; thence northerly to the NW corner of Sec. 3, T12N, R6W of the 6th PM; thence easterly to the SW corner of Sec. 36, T13N, R6W of the 6th PM; thence northerly to the NW corner of Sec. 36, T13N, R6W of the 6th PM; thence easterly to the NW corner of Sec. 32, T13N, R5W of the 6th PM; thence northerly to the NW corner of Sec. 29, T13N, R5W of the 6th PM; thence easterly to the NW corner of Sec. 27, T13N, R5W of the 6th PM; thence northerly to the NW corner of Sec. 22, T13N, R5W of the 6th PM; thence easterly to the NW corner of Sec. 23, T13N, R5W of the 6th PM; thence northerly to the NW corner of Sec. 14, T13N, R5W of the 6th PM; thence easterly to the Hamilton-Polk County line at the SW corner of Sec. 7, T13N, R4W of the 6th PM; thence northerly to the NW corner of Sec. 7, T13N, R4W of the 6th PM; thence easterly to the NW corner of Sec. 10, T13N, R4W of the 6th PM; thence northerly to the NW corner of Sec. 27, T14N, R4W of the 6th PM; thence easterly to the NW corner of Sec. 27, T14N, R3W of the 6th PM; thence northerly to the NW corner of Sec. 15, T14N, R3W of the 6th PM; thence easterly to the NW corner Sec. 13, T14N, R3W of the 6th PM; thence northerly to the NW corner of Sec. 12, T14N, R3W of the 6th PM; thence easterly to the NW corner of Sec. 7, T14N, R2W of the 6th PM; thence northerly to the NW corner of Sec. 31, T15N, R2W of the 6th PM; thence easterly to the NW corner of Sec. 34, T15N, R1W of the 6th PM; thence northerly to the NW corner of Sec. 22. T15N. R1W of the 6th PM; thence easterly to the Polk-Butler County line at the NW corner of Sec. 19, T15N, R1E of the 6th PM; continuing easterly to the NE corner of Sec. 24, T15N, R2E of the 6th PM; thence southerly to the SE corner of Sec. 36, T15N, R2E of the 6th PM; thence easterly to the NE corner of Sec. 6, T14N, R4E of the 6th PM; thence southerly to the SE corner of Sec. 7, T14N, R4E of the 6th PM; thence westerly to the SE corner of Sec. 12, T14N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 24, T14N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 19, T14N, R4E of the 6th PM; thence southerly to the SE corner of Sec. 7, T13N, R4E of the 6th PM; thence westerly to the SE corner of Sec. 12, T13N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 24, T13N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 19, T13N, R4E of the 6th PM; thence southerly to the SE corner of Sec. 19, T13N, R4E of the 6th PM; thence westerly to the SE corner of Sec. 22, T13N, R2E of the 6th PM; thence southerly to the south Butler County line at the SE corner of Sec. 34, T13N, R2E of the 6th PM; continuing southerly to the NE corner of Sec. 15, T12N, R2E of the 6th PM; thence easterly to the NE corner of Sec. 14, T12N, R2E of the 6th PM; thence southerly to the NE corner of Sec. 26, T12N, R2E of the 6th PM; thence easterly to the NE corner of Sec. 25, T12N, R2E of the 6th PM; thence southerly to the NE corner of Sec. 36, T12N, R2E of the 6th PM; thence easterly to the NE corner of Sec. 31, T12N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 7, T11N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 8, T11N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 17, T11N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 16, T11N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 28, T11N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 27, T11N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 15, T10N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 14, T10N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 35, T10N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 36, T10N, R3E of the 6th PM; thence southerly to the NE corner of Sec. 24, T9N, R3E of the 6th PM; thence easterly to the NE corner of Sec. 20, T9N, R4E of the 6th PM; thence southerly to the Seward-Saline County line at the SE corner of Sec. 32, T9N, R4E of the 6th PM; thence easterly to the NE corner of Sec. 3, T8N, R4E of the 6th PM; thence southerly to the SE corner of Sec. 15, T8N, R4E of the 6th PM; thence westerly to the SW corner of Sec. 18, T8N, R2E of the 6th PM; thence northerly to the SW corner of Sec. 7, T8N, R2E of the 6th PM; thence westerly to the SE corner of Sec. 9, T8N, R1E of the 6th PM; thence southerly to the SE corner of Sec. 16, T8N, R1E of the 6th PM; thence westerly to the Saline County line at the SW corner of Sec. 18, T8N, R1E of the 6th PM; thence southerly on the Saline-Fillmore County line to the SE corner of Sec. 12, T6N, R1W of the 6th PM; thence westerly to the SE corner of Sec. 8, T6N, R1W of the 6th PM; thence southerly to the SE corner of Sec. 20, T6N, R1W of the 6th PM; thence westerly to the SE corner of Sec. 24, T6N, R2W of the 6th PM; thence southerly to the SE corner of Sec. 25, T6N, R2W of the 6th PM; thence westerly to the SE corner of Sec. 26, T6N, R2W of the 6th PM; thence southerly to the SE corner of Sec. 35, T6N, R2W of the 6th PM; thence westerly to the Fillmore-Clay County line at the SW corner of Sec. 31, T6N, R4W of the 6th PM; thence northerly to the SE corner of Sec. 36, T7N, R5W of the 6th PM; thence westerly to the SW corner of Sec. 34, T7N, R6W of the 6th PM; thence northerly to the SW corner of Sec. 27, T7N, R6W of the 6th PM; thence westerly to the SW corner of Sec. 27, T7N, R7W of the 6th PM; thence northerly to the SW corner of Sec. 10, T7N, R7W of the 6th PM; thence westerly to the point of beginning and shall include all unconsolidated and semiconsolidated materials of Pleistocene to Recent Age within those boundaries.

APPENDIX C

APPENDIX D

High Risk Groundwater Area

Adams County

Township 8 North, Range 9 West - Sections 1, 2, 10 thru 12, 15, 16, 20 thru 22, 28, 29, and 33.

Butler County

Township 13 North, Range 2 East - Sections 1 thru 3, 10 thru 15, 22 thru 24, 27, and 34,..

Township 13 North, Range 3 East - Sections 1 thru 24.

Township 13 North, Range 4 East – Sections 6, 7, 19.

Township 14 North, Range 1 East – Sections 1, 12, and 13.

Township 14 North, Range 2 East – Sections 1, thru 29, and Sections 34 thru 36. Township 14 North, Range 3 East – Sections 1 thru 36 (All Sections).

Township 14 North, Range 4 East – Sections 6, 7, 19, 30, 31.

Township 15 North, Range 1 East – Sections 25 and 36.

Township 15 North, Range 2 East - Sections 25 thru 36.

Clay County

Township 7 North, Range 5 West – Sections 25 thru 36.

Township 7 North, Range 5 West – Sections 25 thru 29, 34, 35, and 36.

Township 8 North, Range 5 West – Sections 1 thru 5, 8 thru 16, 23, and 24.

Township 8 North, Range 8 West – Sections 5 and 6.

Fillmore County

Township 6 North, Range 1 West – Sections 1 thru 3, 8 thru 12, 17, 19 and 20.

Township 6 North, Range 2 West – Sections 24 thru 26, and 34, and 35.

Township 6 North, Range 4 West – Sections 2 thru 11.

Township 7 North, Range 1 West - Sections 34 thru 36.

Township 7 North, Range 4 West – Sections 27 thru 35.

Township 8 North, Range 3 West - Sections 18, 19.

Township 8 North, Range 4 West – Sections 5 thru 24.

Hamilton County

Township 9 North, Range 8 West – Sections 14 thru 16, 20 thru 23, and 26 thru 35.

Township 12 North, Range 5 West – Sections 6 and 7.

Township 12 North, Range 6 West – Sections 1 thru 3, 10 thru 12, 14 thru 16, and 21.

Township 13 North, Range 5 West - Sections 13, 14, and 31

Township 13 North, Range 6 West - Section 36.

Polk County

Township 13 North, Range 4 West – Sections 2, 3, 7 thru 10, and 18.

Township 14 North, Range 3 West – Sections 28 thru 30.

Township 14 North, Range 4 West – Sections 25 thru 27, and 34 thru 36.

Saline County

Township 8 North, Range 3 East – Sections 1 thru 6.

Township 8 North, Range 4 East – Sections 3 thru 6, 9, 10, 15, and 16.

Seward County

Township 9 North, Range 2 East – Sections 2 thru 5, 9 thru 11, 13 thru 15, 22 thru 26, and 36.

Township 9 North, Range 3 East – Sections 1 thru 4, 10 thru 15, 19, and 22 thru 36.

Township 9 North, Range 4 East – Sections 19, 29 and 29 thru 32.

Township 10 North, Range 3 East – Sections 3 thru 10, 14 thru 18, 20 thru 23, 26 thru 29 and 33 thru 36.

Township 11North, Range 2 East – Sections 1 thru 5, 8 thru 13, and 24.

Township 11North, Range 3 East – Sections 6 thru 8, 16 thru 21, and 27 thru 34.

Township 12North, Range 2 East – Sections 3 thru 5, 8 thru 10, 14 thru 17, 20 thru 23, 25 thru 29, and 32 thru 36.

Township 12North, Range 3 East – Section 31.

APPENDIX E

Upper Big Blue Natural Resources District

Minimum Specifications
For Inclusion on the Approved Flow Meter List
February 1, 2014

Flow meters are critical in implementing accurate groundwater use reporting. In order to promote accuracy, the District has established the following minimum specification to determine if a brand or model of flow meter can be approved for use in the District as required by the Groundwater Management Are Rules and Regulations (District Rule 5).

- 1. Flow meters which require an external electrical power source are not approved for use in the District. Flow meters installed prior to February 1, 2014 will be considered on a case by case basis.
- 2. The flow meter must have a rated accuracy of plus or minus two (2) percent throughout its flow range when installed according to the manufacturers minimum specifications.
- 3. The flow meter must be constructed of non-corrosive materials and have a minimum one (1) year manufacturer's warranty for both parts and labor on accuracy and workmanship.
- 4. The flow meter must have a visual volume recording totalizer. Flow meters used to record groundwater withdrawal used for irrigation must record in **acre inches**. Flow meters used to record groundwater withdrawal for other uses must record in gallons, acre inches or acre feet.
- 5. The flow meter must have a rate of flow indicator showing the instantaneous flow in gallons per minute, or a sweep hand indicator from which the flow rate can be determined by timing.
- 6. The registry must be adequately protected from the elements.
- 7. The totalizer shall provide a direct reading and the multiplier shall be clearly indicated.
- 8. The totalizer shall be constructed so that it records in the forward flow directions only (anti-reverse).
- 9. The flow meter shall have a storage temperature range of -40 to 140 degrees Fahrenheit and shall be constructed in such a manner as to allow it to remain in the field during the winter months.
- 10. The flow meter must have a method of sealing the meter in the pipe and sealing the registry to prevent unauthorized tampering or removal.
- 11. The flow meter size, serial number, model number and direction of flow shall be clearly

tamped on the body of the meter.

12. For saddle and insertion style flow meters, the inside pipe and outside diameter for which the flow meter has been calibrated shall be clearly shown on flow meters to the nearest one-thousandth of an inch.
